Medicare Current Beneficiary Survey

Medical Planner
2021-2022

A Message from

Thank you for participating in the Medicare Current Beneficiary Survey (MCBS). With your help, we are working to make Medicare a more cost-effective and more high-quality form of health insurance that meets the needs of all beneficiaries. As a reminder, whether you take part in the survey is entirely your choice. Your Medicare benefits will not be affected by the answers that you give, or by whether or not you participate. Also, your answers must be kept private and confidential. The Federal Privacy Act of 1974 requires this.

William Long—Project Officer

A Message from

Your participation in the MCBS provides valuable information to both researchers and policymakers about the needs of Americans who have Medicare health insurance.

CMS collects large amounts of information about hospitals, doctors, and other medical professionals. They can tell how Medicare works for those groups, but the only way to learn about how the Medicare program works for people like you is to ask. AARP supports this survey because we think it is important. Please take part and help improve your Medicare program.

How to Use Your Planner

We are providing this planner to help you organize your doctor visits, possible hospital stays, and other health care-related events. This will help you by providing you one place to keep track of all of these items, both for planning purposes and when trying to recall events with your interviewer. It will also help us ensure that the information we collect is as accurate as possible. If the information we collect does not accurately represent what is going on in your life, it will not be as helpful at improving Medicare.

When using this planner, it is important to record the following types of information in the appropriate date square:

- Doctor and dentist appointments
- When prescribed medicines are filled or re-filled
- The total cost of an event and what you paid
- Hospital visits, including to the emergency room or as an outpatient
- Labs, x-rays, and other tests
- Nursing home stays
- Home health visits by a medical professional, family member, or friend
- Eyeglasses, diabetic equipment, ambulance services, or other medical items purchased
