- Person Records – include largely biographic data about the individual;

- Case Records – include overarching case processing and assurance information, as well as family unit processing information; and

- Activity Records – include information used to track the progress of each activity or processing step for an individual's case (e.g., pre- and post-arrival requirements).

Person Records – this information may be populated in Hummingbird through the connection to USCIS systems or during the intake and interview processes at safe havens.

- Name

- Person Type (indicates if the applicant is the *Principal* or a *Derivative* of the principal)

- Relationship to Principal (if not principle)
