Subtotal for Recordkeeping Requirements				
TOTAL LABOR BURDEN AND COSTS (rounded):^m				
TOTAL CAPITAL and O&M COST:^m				
GRAND TOTAL (rounded):^m				

Assumptions:

^a We have assumed that the average number of respondents that will be subject to this rule will be 270. There will be the rule over the three-year period of the ICR. It is estimated that 135 sources that have a total annual benzene (T) file an annual report. It is also estimated that 135 sources that have a TAB greater than 10 Mg/yr required to complete reports.

^b This ICR uses the following labor rates: \$149.84 per hour for Executive, Administrative, and Managerial labor; \$49.95 per hour for Clerical labor. These rates are from the United States Department of Labor, Bureau of Labor Statistics, Septe industry group.” The rates are from column 1, “Total compensation.” The rates have been increased by 110 percent employed by private industry.

^c We have assumed that it will take each respondent two hours once per year to create the annual waste determination.

^d We have assumed that all facilities above 1 Mg/yr must evaluate waste streams annually for TAB.

^e We have assumed that it will take one hour each month for each respondent to create the monthly treated waste analysis (all samples and 0.5 hours per sample for analysis for a total of 1 hour per sample).

^f We have assumed that 90 percent of 135 sources (121) will monitor process parameters, and the remaining 14 will not.

^g We have assumed that 135 facilities that are expected to be greater than 10 Mg per year must comply with the recordkeeping requirements.

^h We have assumed that 135 respondents will each take six hours once per year to comply with the annual method.

ⁱ We have assumed that 10 percent of facilities with a TAB greater than 10 Mg/yr (14 facilities) will choose to submit a report.

^j We have assumed that 135 respondents will take 78 hours once per year to comply with the recordkeeping requirements.

^k We have assumed that 121 respondents will take 30 minutes twelve times per year to repeat the benzene quantification.

^l We have assumed that this is a one-time only activity.

^m Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.

There will be no additional new sources that will become subject to RCRA (CERCLA) quantity waste between 1 Mg/yr and 10 Mg/yr must comply with the control requirements must file quarterly

Rate: \$122.66 per hour for Technical labor, and \$60.88 per hour for other labor. Source: EPA, "Table 2. Civilian Workers, by occupational and economic sector, 1997-2000" (September 2002), available at <http://www.bls.gov/news.release/ocw2.tbl.htm>. Adjusted to account for the benefit packages available to those workers.

Assumptions:

1. Site analysis information (0.5 hours for collection activities for

2. 14 sites (14) must conduct monthly sampling.

3. 14 sites must conduct quarterly visual inspection requirements.

4. 14 sites must conduct monthly monitoring requirements.

5. 14 sites must ship their waste offsite once a month for treatment.

6. 14 sites.

7. 14 sites for site characterization determination.

Table 2: Average Annual EPA Burden and Cost – NESHAP for Benzene Waste Operations (40 C

Burden item	(A) Person hours per occurrence	(B) No. of occurrences per respondent per year	(C) Person hours per respondent per year (AxB)	(D) Respondents per year ^a	(E) Technical person-hours per year (CxD)	(F) Management person hours per year (Ex0.05)

Annual recertification ^e	1	1	1	270	270	13.5
TOTAL (rounded) ^f						1,550

Assumptions:

^a We have assumed that the average number of respondents that will be subject to this rule will be 270 and there will be no that will become subject to the rule over the three-year period of the ICR. It is estimated that 135 sources that have a total quantity waste between 1 Mg/yr and 10 Mg/yr must file an annual report. It is also estimated that 135 sources that have a T. and have complied with the control requirements must file quarterly reports.

^b This cost is based on the following labor rates: \$69.04 for Managerial, \$51.23 for Technical, and \$27.73 for Clerical. The Office of Personnel Management (OPM), 2021 General Schedule, which excludes locality rates of pay. The rates have been to account for the benefit packages available to government employees.

^c We have assumed that this is a one-time activity for each new facility.

^d We have assumed that the Agency will review quarterly reports for 135 respondents.

^e It is assumed that it will take one hour per year to review the annual recertification from each respondent.

^f Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.
