Assumptions:

- a. This ICR assumes a total of 39,812 commercial facilities exist in any given year, and that 1,618 new sources per year will be constructed. These commercial facilities comprise both the miscellaneous surface coating and commercial motor vehicle and mobile equipment refinishing categories. This ICR also assumes that existing sources will shut down at a rate equal to that replaced by new sources. Therefore, the total number of affected sources subject to this rule (i.e., 41,430 sources) will not change in any given year.
- b. This ICR uses the following labor rates: \$112.98 for technical, \$149.35 for managerial, and \$54.81 for clerical labor. These rates are from the United States Department of Labor, Bureau of Labor Statistics, December 2013, "Table 2. Civilian workers, by occupational and industry group." The rates are from column 1, "Total compensation." The rates have been increased by 110 percent to account for the benefit packages available to those employed by private industry.
