Abstract: The USGS National Wildlife Health Center (NWHC) collects information on the presence of highly consequential wildlife diseases and the occurrence of wildlife morbidity/mortality events nationwide to aid in outbreak investigations conducted by land-management agencies and as part of their mission-critical activities associated with response to animal health emergencies (Emergency Support Function 11). The collected information is used to provide situational awareness of potential zoonotic disease threats to human- and agricultural-health agencies and to assist land-management agencies with management decisions. NWHC requests that state, federal, and tribal natural-resource managers report wildlife morbidity and mortality events and collaborate on national-scale surveillance. Reported information includes the location, land ownership, and date(s) where the event occurred or sample was taken; capture methods and sample type, species sampled, and individual characteristics such as sex, age, and size; any clinical signs or other

event history observed; habitat characteristics known to affect the suspected disease process, such as habitat type, habitat cover, temperature, precipitation, or others; laboratory-confirmed or suspected diagnoses; and contact information for the person reporting the event or submitting the sample. NWHC reports back the results of diagnostic testing and cause of death (if applicable) to the submitter and provides generalized information to registered users through our WHISPer platform, where users can search and download current and historical trends in wildlife diseases (in accordance with the open data policy and FAIR standards).

Title of Collection: Wildlife morbidity/mortality or disease surveillance event reporting.

OMB Control Number: 1028-NEW.

Form Number: None.

Type of Review: An existing collection without an OMB number.

Respondents/Affected Public: Employees of state, federal, or tribal agencies with wildlife-management authority.

Total Estimated Number of Annual Respondents: 400.

Total Estimated Number of Annual Responses: 400.

Estimated Completion Time per Response: 15 min.

Total Estimated Number of Annual Burden Hours: 100.

Respondent's Obligation: Voluntary.

Frequency of Collection: Per wildlife health event, frequency depends on the number of events experienced by an agency/management unit.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor, nor is a person required to respond to, a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Director, National Wildlife Health Center.
