

Survey Questionnaire

TITLE OF INFORMATION COLLECTION: Consumer Product Safety Survey

[Introduction]

The U.S. Consumer Product Safety Commission (CPSC) is trying to improve its communication of hazards associated with consumer products. By “consumer products,” we are referring to products for personal use by consumers, such as clothing, toys, furniture, infant products, art materials, and fireworks. We are *not* referring to automobiles, food, drugs, cosmetics, or medical devices.

There are no “right” or “wrong” answers to the questions in this survey. What matters is your honest and valuable feedback for improving product safety. Your identity will not be associated with your responses, and it will remain strictly confidential. Your participation in this survey is completely voluntary. You may end the survey at any time; however, your responses will not be recorded if you end the survey before completing all of the items. On average, this survey should take no more than 10 minutes to complete.

Thank you so much for taking the time to help make our country a safer place.

NOTE: You will not be able to go back to previous pages of the survey. Please do not click your web browser's "back" button.
