

ILLINOIS NUTRIENT LOSS REDUCTION STRATEGY SURVEY

OMB No.0535-0218
 Approval Expires: 7/31/2022
 Project Code: 483
 Survey ID: 3879
 FIPS: 17

USDA/NASS - Illinois
 Heartland Region
 9700 Page Ave, #400
 St. Louis, MO 63132-1547
 Phone: 1-800-551-1014
 Fax: 1-855-270-2717

I

Please make corrections to name, address, and ZIP Code, if necessary.

The information you provide will be used for statistical purposes only. Your responses will be kept confidential and any person who willfully discloses ANY identifiable information about you or your operation is subject to a jail term, a fine, or both. This survey is conducted in accordance with the Confidential Information Protection and Statistical Efficiency Act of 2018, Title III of Pub. L. No. 115-435, codified in 44 U.S.C. Ch. 35 and other applicable Federal laws. For more information on how we protect your information please visit: <https://www.nass.usda.gov/confidentiality>. Response is voluntary.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB number is 0535-0218. The time required to complete this information collection is estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

SECTION 1 - CROPLAND ACRES

Please report your total cropland acres on all the land you operated in 2021. Also, provide a breakdown of acres with tiling and without tiling. **NOTE: TILE DRAINED** acres refers to acres drained by clay tiles, perforated plastic pipes, and pattern tile systems

Please report your operations total cropland acres on all the land you operated including a breakdown of acres with tile drained and non-tile drained in 2021.

Note: TILE DRAINED acres refers to acres drained by clay tiles, perforated plastic pipes, and pattern tile systems.

	Tiled	Non-tiled	Total (Tiled + Non-tiled)
Of all land operated in 2021, how many acres were ...	xxx	xxx	xxx
Acres planted to corn	xxx	xxx	xxx
Acres planted to soybeans	xxx	xxx	xxx
Other acres of cropland	xxx	xxx	xxx
Total Cropland	105	106	104

SECTION 2 - NITROGEN MANAGEMENT

Please consider your nutrient applications in preparation for the 2021 crop season. **Review the enclosed map of Illinois and the table of Nitrogen application rates. Our goal is to gather the number of CORN acres you fertilized AT OR BELOW the MRTN rate for your area.**

Consider your total CORN acres in 2021 and all of the nitrogen applications to those acres:

1. On how many CORN acres did your operation use the University of Illinois Recommended total Nitrogen rate (also known as Maximum Return to Nitrogen – MRTN) OR LESS than that rate. (refer to attached map and chart)?.....
- a. What influenced your decision in determining your total Nitrogen rate (e.g. fertilizer provider, crop consultant, farm management software, etc.). List all that apply.....

2021 ACRES
xxx

Of the total CORN ACRES in 2021, please record the acres fertilized with the strategies listed below. EXCLUDE manure applications.

Please consider all the acres of CORN you planted in 2021, and all the fertilizer you applied for that crop.	Corn Acres
2. How many CORN acres were fertilized with dry fertilizer blends containing Nitrogen in the fall and winter preceding 2021?	xxx
3. How many CORN acres were fertilized with Anhydrous Ammonia during the Fall and winter preceding 2021?	xxx
a. Of those acres fertilized with Anhydrous Ammonia in the fall, on how many acres did you fertilize using a nitrification or inhibitor?	xxx
4. Of your total corn acres, how many acres were part of a split-application, where some of the nitrogen was applied in the spring and some in fall or winter (split application acres)?	xxx
5. How many CORN acres were fertilized with 100% of your Nitrogen needs during the spring of 2021 (spring only Nitrogen applications)?	xxx
6. Of all the acres you fertilized in the spring with Nitrogen, including split application acres and spring only acres, on how many acres did you fertilize using a nitrification or urease inhibitor?	xxx

SECTION 3 - PHOSPHORUS APPLICATIONS and REASONS for REDUCING

1. Did your operation reduce PHOSPHORUS applications since 2011?

- 1 Yes - Continue 3 No - Go to Section 4

a. On how many acres has your operation reduced phosphorus application rates since 2011?

ACRES
xxx

2. What influenced your operations decision in reducing phosphorus applications:

a. The Illinois Agronomy Handbook removal rates for phosphorus were updated in 2017?

- 1 Yes - Continue 3 No - Go to Section 3, Question 2b

i. On how many acres did your operation reduce phosphorus applications because of the Illinois Agronomy Handbook?.....

ACRES
701

b. Soil test Information?

- 1 Yes - Continue 3 No - Go to Section 3, Question 2c

i. On how many acres did your operation reduce phosphorus applications because of soil test results?.....

ACRES
702

c. Other reasons, including cost: Please list below.

i. If other reasons, On how many acres did your operation reduce phosphorus applications?.....

ACRES

703

3. Has your operation changed the placement of phosphorus to move from broadcast to subsurface application or banding application?.....

Yes - Continue No - Go to Section 4

a. On how many acres did your operation change placement of phosphorus from broadcast to subsurface or banding?

ACRES

--

SECTION 4 – COVER CROPS

COVER CROPS refers to crops including grasses, legumes and forbs planted for conservation purposes, including erosion control, improving soil structure, moisture, and nutrient content, increasing beneficial soil biota, or providing habitat for insects, pollinators and wildlife.

1. On how many acres did you plant cover crops preceding the 2021 crop?

- a. Of those acres, how many acres utilized cover crops prior to CORN?
- b. Of those acres, how many acres utilized cover crops prior to SOYBEANS?
 - a. Please exclude double-crop soybeans planted after a winter wheat cash crop.

SECTION 5 - GENERAL KNOWLEDGE

For these next questions please enter the code that best describes your operation’s level of knowledge.

1. What is your operations level of knowledge of:

- a. The Illinois Nutrient Loss Reduction Strategy?.....
- b. Maximum Return to Nitrogen (MRTN) strategy?.....
- c. Wood chip bioreactors?.....
- d. Constructed Wetlands?.....
- e. Cover crop management (species selection, planting dates, termination strategy, etc.)?.....
- f. Saturated buffers?.....

1 - Not at all knowledgeable
2 - Slightly knowledgeable
3 - Somewhat knowledgeable
4 - Knowledgeable
5 - Very knowledgeable

2. How many of those acres did you fertilize using a Nitrification Inhibitor?
3. How many acres were fertilized with Nitrogen during the spring of 2021?
4. How many of those acres did you fertilize using a Nitrification Inhibitor?

SECTION 6 - OTHER TECHNIQUES

1. Does this operation use any other practices to reduce nutrient losses from your fields?

1 Yes - Continue 3 No - Go to Survey Results

2. What practices are you using? Please list/explain below

810 _____
 a. Specify: _____

811 _____
 b. Specify: _____

812 _____
 c. Specify: _____
