Hi Arianne,

Please see the questions below from the State of Louisiana.

- Will there be a section other than number 6 to capture the information for mandatory programs? It would definitely be confusing to add a column to number 6, in the number who participated in each component, just for mandatory participation.
- If there is another section for the mandatory programs, will that section capture information for ABAWD and Non-ABAWDs as number 6 does?
- Please explain the reason for reporting the number of participants who received case management when it is a requirement for all SNAP E&T participants. That number should be the same number as number 7 on the FNS 583 Report.

Thanks,
Robertine Stewart

Hi Robertine,

FNS is in the process of seeking OMB approval for a new information collection request (ICR) for the Food Programs Reporting System (FPRS), specifically relating to updates in the reporting requirements for the Supplemental Nutrition Assistance Program Employment and Training (SNAP E&T) FNS-583 form, as well as the 366B Program Activity Statement form. This ICR provides details on the reporting requirements which Mandatory E&T States must begin reporting on in the FNS-583 form, the reason behind the new requirements, and the estimated burden on stakeholders as a result. The ICR also includes new updates to the FNS-366B, to revise currently collected metrics related to SNAP recertification policy.

The next step in the ICR process is requesting stakeholder feedback on the proposed information collection which is outlined in the attached 60-Day Federal Register notice. Would you be willing to review the attached notice and provide any feedback you may have by November 19th?

If so, please let me know as soon as possible.

Thank you.
