SUPPLEMENTARY INFORMATION:

I. Background

The USDA eAuthentication Service provides USDA Agency customers and employees single sign-on capability and electronic authentication and authorization for USDA Web applications and services. Through an online self-registration process, USDA Agency customers and employees can obtain accounts as authorized users that will provide access to USDA resources without needing to re-authenticate within the context of a single Internet session. Once an account is activated, users may use the associated user ID and password that they created to access USDA resources that are protected by eAuthentication. Information stored in the eAuthentication Service may be shared with other USDA components, as well as appropriate Federal, State, local, tribal, foreign, or international government agencies as outlined in the routine uses or authorized by statute. This sharing will take place only after USDA determines that the receiving component or agency has a need to know the information to carry out national security, law enforcement, immigration, intelligence, or other functions consistent with the routine uses set forth in this system of records notice. The revisions to this system of records include renaming the system to be consistent with the Department's naming system; updating the system location, storage policies, storage safeguards, and retention and disposal policies; and the system manager's location; and the notification, record access, and contesting procedures in order to be consistent with the Department's best practices. In addition, the routine uses were amended as follows:

- Former Routine Use 1 was deleted.
- Former Routine Use 2 was renumbered Routine Use 1 and revised.
- Former Routine Use 3 was renumbered Routine Use 2 and revised.

- Former Routine Use 4 was renumbered Routine Use 3 and revised.
- Former Routine Use 5 was renumbered Routine Use 4 and revised.
- Former Routine Use 6 was renumbered Routine Use 5 and revised.
- Routine Use 6 is added to permit disclosure to the Department of Justice in order to represent the government's interest in litigation.

Information contained in this system may be disclosed outside USDA as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

1. To external Web applications integrated with the government's federated architecture for authentication. Prior to any disclosure of information under this architecture, the user will request access to an external application with their USDA credential. 7. To appropriate agencies, entities, and persons when (1) USDA suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised; (2) the USDA has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by the USDA or another agency or entity) that rely upon the compromised information; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the USDA's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

U.S. Department of Agriculture Narrative Statement on Revised eAuthentication System of Records Under the Privacy Act of 1974 USDA/OCIO-2 eAuthentication Service

The U.S. Department of Agriculture (USDA) eAuthentication Service provides USDA Agency customers and employees single sign-on capability and electronic authentication and authorization for USDA Web applications and services. Through an

online self-registration process, USDA Agency customers and employees can obtain accounts as authorized users that will provide access to USDA resources without needing to re-authenticate within the context of a single Internet session. Once an account is activated, users may use the associated user ID and password that they created to access USDA resources that are protected by eAuthentication. Information stored in the eAuthentication Service may be shared with other USDA components, as well as appropriate Federal, State, local, tribal, foreign, or international government agencies as outlined in the routine uses or authorized by statute. This sharing will take place only after USDA determines that the receiving component or agency has a need to know the information to carry out national security, law enforcement, immigration, intelligence, or other functions consistent with the routine uses set forth in this system of records notice. USDA is publishing the routine uses pursuant to which it may disclose information about individuals to the extent the disclosure is consistent with the purpose for which the information was collected. Routine uses include disclosure to external Web applications upon user request, to other government agencies for law enforcement purposes if the record on its face or in conjunction with other records indicates a violation of law, to a court or adjudicative body if relevant and necessary to appropriate litigation, to a congressional office upon written request of the individual, to other government entities of USDA partners upon user request, to USDA contractors or industry to identify fraud, waste, or abuse to the Department of Justice if relevant and necessary for appropriate litigation, or to agencies, entities, or persons to prevent or remedy security breach. The authority for maintaining this system is derived from: Government Paperwork Elimination Act (GPEA, Pub. L. 105-277) of 1998; Freedom to E-File Act (Pub. L. 106-222) of 2000; Electronic Signatures in Global and National Commerce Act (E-SIGN, Pub. L. 106-229) of 2000; eGovernment Act of 2002 (H.R. 2458).

Probable or potential effects on the privacy of individuals:

Although there is some risk to the privacy of individuals, that risk is outweighed by the benefits to those individuals who will be able to access multiple programs and applications with a single login. In addition, the safeguards in place will protect against unauthorized disclosure. Records are accessible only to individuals who are authorized, and physical and electronic

safeguards are employed to ensure security. eAuthentication has a current Authority to Operate obtained via the completion of a Cyber Security Certification and Accreditation (C&A). A satisfactory risk assessment has been performed.
