SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for an extension of a current information collection

sponsored by NMFS' WCR. The information required by the International Dolphin Conservation Program Act, amendment to the Marine Mammal Protection Act, is needed to: (1) Document the dolphin-safe status of tuna import shipments; (2) verify that import shipments of fish were not harvested by large-scale, high seas driftnets; and (3) verify that tuna was not harvested by an embargoed nation or one that is otherwise prohibited from exporting tuna to the United States. Collected information includes the U.S. Customs and Border Protection Entry Identification, date of entry, and contact details on the exporting and importing companies.

Collected information also includes harvest characteristics such as fishing vessel name, fishing trip dates, vessel flag, vessel gear type, and ocean area of harvest, as well as the declaration of the dolphin safe status of the shipment, and if applicable, the attachment of required certifications. Forms are submitted by importers and processors. NMFS uses this information to verify the dolphin-safe status of tuna shipments.

II. Method of Collection

Importing respondents are required to submit the form electronically to U.S. Customs and Border Protection before or at the time of importation via the Automated Commercial Environment as per regulations at 50 CFR 216.24(f)(2). Domestic processors typically submit the forms monthly via email as per regulations at 50 CFR 216.93(d)(2).
