[MAIN QUESTIONNAIRE - NEW SURVEY PAGE]

The U.S. Food and Drug Administration (FDA) is developing a visual image, also called a symbol, to help consumers make healthier food choices in grocery stores and other places where they buy food. The healthy food symbol will be available for food manufacturers to voluntarily place on food packaging to indicate foods that have met the FDA criteria for healthy. This survey will show you a series of draft symbols that could be used for the healthy food symbol. As you view each symbol, please think about how you would perceive it if you saw it on a food package.

1. If you saw the following symbols on food packages, which symbol would you think is most effective in showing that the food product is healthy? Which symbol would you think is least effective in showing that the food product is healthy? (ALLOW ONE ANSWER FOR “MOST” AND ONE ANSWER FOR “LEAST”.)

[SHOW SYMBOLS 3 AT A TIME; REPEAT MAXDIFF QUESTION UNTIL ALL 15 SYMBOLS, SHOWN 3 AT A TIME, ARE SHOWN AT LEAST 3 TIMES EACH].
