Purpose and Instructions

Purpose of this Document

This document provides guidance and the Evaluation Reporting Template for CDC-RFA-DP20-2001: Nat an annual evaluation report of their funded activities each performance year, with the first report due afte

Evaluation reports are an important component of demonstrating the value of comprehensive tobacco co will be used to track progress, identify promising practices, and gather information on lessons learned in provides guidance for completing the reporting template.

Submission Instructions

Completed templates and any supporting materials should be uploaded to the Awardee Management Pla under "Other Deliverables" select "Evaluation Report - Year #" for the appropriate year (please note, the Completed excel templates in .xlsx format should be uploaded using the "Files" box at the bottom of the I template file name (e.g. the state of Montana would rename their document as "MT_DP20-2001_N" be uploaded at the discretion of the recipient and may include relevant campaign materials, publications, included at the start of the supporting file name, followed by a brief descriptive title (e.g., "MT_Press_Reland any changes to the submission protocol each year.

Notes

Recipients' Evaluation Reports should reflect each component for which they are funded. For example, re Component 2 ("C2") and can skip any tabs labeled "C1".

Recipients must report on strategies, populations of focus, and indicators, as specified in the recipient's ϵ should be approved by recipient's assigned CDC OSH Evaluator prior to completing the Evaluation Repo

Please use the following template to enter the evaluation results for the first two budget years (combined combined into a single report. Each subsequent year's evaluation report will build on the prior year's reporting section is required or optional for each reporting year.

Suggested word counts are provided as a guide; however, strict adherence is not necessary.

Your assigned CDC OSH Evaluator is available for support in answering questions and can assist with reyou need help filling in this template or otherwise meeting reporting requirements.

Component One Template - Tab 5. Health Systems Changes

Change Concepts and Ideas [Required each reporting period]

Report on each 'change idea' promoted or implemented as part of your DP20-2001 workplan. For each selected change idea indicate the number of healthcare facilities that have implemented the change during the past performance year. Recipients should only report on change ideas they worked on. Recipients can reference the full list of change concepts and change ideas (pages 1-2) from the Tobacco Cessation Change Package.

*IHS: Indian Health Services. **UIH: Urban Indian Health. *** The "Other" column should include any health systems that do not clearly fit into another category or any large health systems that encapsulate multiple categories. Describe these facilities or large health systems in the text box below each section. For large health systems that span categories, please note if changes were implemented system-wide or within a specific setting in the large health system. Each column should be mutually exclusive, (i.e., a single health system should not be counted in more than one column).

Key Foundations

Make Tobacco Cessation a Practice and System Priority

Identify one or two key champions and assemble a multidisciplinary team

As a multidisciplinary group, conduct an assessment of your clinic/system and develop an action plan to address the current gaps

Adopt or update a unit, practice, or system-wide policy to reflect prioritization of tobacco treatment

Create a Supportive Environment for Cessation

Implement and strengthen hospital or clinic-wide tobacco-free or smoke-free campus policies

Leverage mass-reach media campaigns to encourage and normalize quitting (e.g., with media in waiting rooms, throughout clinic or hospital system)

Support employees and their family members in quitting smoking by providing health benefits for tobacco cessation

***If applicable, describe "other" healthcare facilities here:

Equipping Care Teams

Equip All Staff to Engage in Tobacco Cessation Efforts

Adopt a clinician/staff training policy to train and retrain staff

Conduct onboarding and annual trainings on tobacco policies, systems, and procedures

Optimize billing practices by leveraging existing codes to capture all billable services

Provide Clinician and System-Level Feedback on Progress and Impact

Set and communicate specific, measurable performance and quality goals

Make tobacco cessation a quality improvement measure at the clinician or system level

Track clinician, clinic, hospital, and system performance to provide feedback to clinicians and decision-makers

***If applicable, describe "other" healthcare facilities here:

Screening

Make Tobacco Use a Vital Sign: Screen Every Patient for Tobacco Use at Every Visit

Adopt a tobacco use screening protocol

Establish a workflow and determine roles for tobacco use screening and documentation

Embed a tobacco use status prompt in the EHR or other patient record-keeping system

Embed decision support scripts for screening into the EHR or other patient record-keeping system

***If applicable, describe "other" healthcare facilities here:

Treatment

Establish a Tobacco Treatment Protocol

Implement a treatment intervention

Establish a workflow to determine roles for delivering the treatment intervention

Enhance Clinical Decision Support

Embed treatment intervention prompts into the EHR or other patient record-keeping system

Embed decision support scripts for each intervention step into the EHR or other patient record-keeping system

Implement standard order sets for counseling and medication

Adopt tools to guide medication selection

Implement Standardized Approaches to Support Cessation Efforts

Deliver standard patient education regarding cessation medication

Adopt a clinical decision support tool for helping patients plan their quit attempt

***If applicable, describe "other" healthcare facilities here:

Referral and Follow-Up

Establish Protocols to Identify and Connect Patients to Referral Resources

Implement a protocol or workflow to ensure clinician follow-up with patients

Identify and partner with referral services that can serve as an adjunct to care

Set up direct referrals to internal and external resources by creating standard referral orders

Establish two-way communication with referral services to get information on whether referrals were accepted by the patient

Employ Population Management Strategies to Better Identify and Reach Patients Who Us

Use tobacco registries or other methods to track patients who use tobacco

Conduct proactive follow-up with patients who use tobacco

***If applicable, describe "other" healthcare facilities here:

Number of healthcare facilities:					
Federally Qualified Health Center	IHS*, UHI**, Tribal Health Center	Other facilities or large health systems***

Appendix 1. Additional Resources

<u>Conducting Quitline Evaluations</u> – This workbook is a guide to facilitate the evaluation of quitlines and is intended for staff and stakeholders, state tobacco control program managers, and evaluators.

<u>Developing an Effective Evaluation Plan</u> – This workbook was developed to help public health program managers, a and evaluators develop an effective evaluation plan. It is intended to assist in developing an evaluation plan and car with other evaluation resources.

<u>Developing an Effective Evaluation Report</u> – A workbook that applies the CDC Framework for Program Evaluation in to construct a final evaluation report by laying out a six-step process for the decisions and activities involved in plant conducting an evaluation.

DP20-2001 Notice of Funding Opportunity – This document provides details about the DP20-2001 funding opportunity

<u>DP20-2001 Performance Measure Guidance</u> – This document provides performance measure definitions, data colle and example data sources.

<u>Eliminating Exposure to Secondhand Smoke: Outcome Indicators for Comprehensive Tobacco Control Programs</u> – is the third in a series of updates to the 2005 publication Key Outcome Indicators for Evaluating Comprehensive Tol Programs. This update provides a revised logic model and set of outcome indicators for Goal Area 2 of the National Control Program - Eliminating Exposure to Secondhand Smoke.

<u>Evaluators' Network</u> – Built for the surveillance and evaluation staff of Tobacco Control Programs across the country provides an opportunity for peer engagement and provides evaluation support staff and contractors working on tobac programs. Check the <u>networking site</u> to find DP20-2001 evaluation support, dues dates, and learning opportunities. already a member of the Evaluators' Network, contact <u>ntcpevaluators@cdc.gov</u>

<u>Guidance for the Development and Submission of the DP20-2001 Evaluation Plan</u> – This document describes the return the DP20-2001 evaluation plan and outlines reporting expectations for each reporting year.

Identifying and Eliminating Tobacco-Related Disparities: Key Outcome Indicators for Evaluating Comprehensive Tolerograms – This guide supports and complements broader monitoring and evaluation efforts to identify and eliminate related disparities. Tobacco prevention and control program managers and evaluators can use the indicators in this focus their evaluations, inform the selection of indicators, link these to intended outcomes, and assist in gathering creating control program managers.

<u>Introduction to Program Evaluation for Public Health Programs: A Self-Study Guide</u> – This document is a "how to" g planning and implementing evaluation activities. The manual, based on CDC's <u>Framework for Program Evaluation is</u> is intended to assist managers and staff of public, private, and community public health programs to plan, design, in use comprehensive evaluations in a practical way.

<u>Practical Strategies for Culturally Competent Evaluation</u> – CDC's Division for Heart Disease and Stroke Prevention Asthma Control Program developed this guide for program staff and evaluators to promote cultural competence. Th strategies to make sure evaluation efforts have cultural relevance and generate meaningful findings

<u>Preventing Initiation of Tobacco Use: Outcome Indicators for Comprehensive Tobacco Control Programs</u>—2014 - T is the first in a series of updates to the 2005 publication Key Outcome Indicators for Evaluating Comprehensive Tobacco Control Programs. This update provides a revised logic model and set of outcome indicators for Goal Area 1 of the National Control Program.

Promoting Quitting Among Adults and Young People: Outcome Indicators for Comprehensive Tobacco Control Programme Indicators for Comprehensive Indicators for Comprehe

This publication is the second in a series of updates to the 2005 publication Key Outcome Indicators for Evaluating Tobacco Control Programs. This update provides a revised logic model and set of outcome indicators for Goal Area National Tobacco Control Program, which addresses promoting quitting among adults and young people.

<u>Surveillance and Evaluation Data Resources for Comprehensive Tobacco Control Programs</u> - Surveillance and Eva Resources is an at-a-glance compilation of surveillance and evaluation resources for comprehensive tobacco control

<u>Tobacco Cessation Change Package</u> – This document contains a list of change concepts and change ideas (pages relevant to specific health systems changes that recipients may be evaluating.

Appendix 2. DP20-2001 Required Evaluation

This list of evaluation questions was originally published in the document:

Evaluation Plan

EVALUATION PIAN
Evaluation Focus Areas
Statewide Disparities Requirement (behavioral health or low income)
AND
Community-based Disparities Requirement (selected population group)
Policy or Health Systems Change Evaluation Requirement*
Quitline Requirement

^{*}For the policy and health systems change evaluation requirement, recipier change that was implemented as part of the E-cigarette Youth and Young A

Questions

Guidance for the Development and Submission of the DP20-2001

Evaluation Questions

Effectiveness: What evidence-based strategies, promising practices, and/or culturally tailored interventions were effective (and not effective) at reaching and improving positive tobacco-related outcomes among the selected populations affected by tobacco-related disparities? What were lessons learned, promising practices, and unintended consequences?

Outcomes: To what extent did recipient efforts improve tobacco-related outcomes, such as increased protection and reduced exposure from secondhand smoke, increased use of evidence-based cessation treatment, increased quit attempts and sustained quits, and reduced tobacco use and dependence among the selected populations affected by tobacco-related disparities?

Outcomes: What impact did the policy or systems change have on achieving tobacco-related outcomes for one of the following: 1) Decreasing access and tobacco use among youth, including e-cigarette use, 2) Increasing protection and reducing exposure to secondhand smoke, or 3) Promoting cessation, such as increasing use of evidence-based cessation treatment and increasing quit attempts and sustained quits?

Intended and unintended consequences: What effect did the policy or health systems change have overall, and as appropriate among population experiencing tobacco-related disparities? To what extent were there unintended consequences (e.g., exacerbating disparities or disproportionately benefiting population groups, illicit sales of tobacco products)?

Effectiveness: What services and modalities and/or combination of services resulted in increased quit attempts and sustained quits at 7-month follow-up? For whom?

Outcomes: To what extent did recipient efforts contribute to a measurable change in quit attempts and sustained quits at 7-month follow-up, overall, and among populations experiencing tobacco-related disparities?

nts are encouraged, but not required, to evaluate a policy or systems dult NOFO Requirement.
