Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled Assessment of Outcomes Associated with the Preventive Health and Health Services Block Grant to the Office of Management and Budget (OMB) for review and approval. CDC last published a "Proposed Data Collection Submitted for Public Comment and Recommendations" notice on X DATE to obtain comments from the public and affected agencies. CDC did not receive comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

- (a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of

the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639-7570 or send an email to [omb@cdc.gov](mailto:omb@cdc.gov). Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street, NW, Washington, DC 20503 or by fax to (202) 395-5806. Provide written comments within 30 days of notice publication.

## Proposed Project

Assessment of Outcomes Associated with the Preventive Health and Health Services Block Grant- Center for State, Tribal, Local and Territorial Support (CSTLTS), Centers for Disease Control and Prevention (CDC).

### Background and Brief Description

The Preventive Health and Health Services Block Grant (PHHS Block Grant) has provided funding for all 50 states, the District of Columbia, two American Indian tribes, five U.S. territories, and three freely associated states to address the unique public health needs of their jurisdictions in innovative and locally defined ways. First authorized by Congress in 1981 through the Public Health Service Act (Public Law 102-531), the fundamental and enduring purpose of the grant has been to provide grantees with localized control to address their priority public health needs. In 1992, Congress amended the law to align PHHS Block Grant funding priorities with the 22 chapters specified in Healthy People (HP) 2000, a set of national objectives designed to guide health promotion and disease prevention efforts. Additional amendments included set-aside funds specifically dedicated to sex offense prevention and victim services, thus requiring grantees receiving this support to include related HP

objectives and activities as part of their PHHS Block Grant - funded local programs.

CDC has increased the accountability of the PHHS Block Grant by establishing a comprehensive, standardized method to collect data to describe select outputs and outcomes. The CDC PHHS Block Grant Measurement Framework is an innovative approach to: collecting data on public health infrastructure(i.e., information systems, quality improvement, efficiency and effectiveness of programs, services, and operations); emerging public health needs addressed; and evidence-based public health interventions implemented.

The purpose of this information collection request (ICR) is to collect data that assess select cross-cutting outputs and outcomes of the grant (as defined by the framework measures) and that demonstrate the utility of the grant on a national level. This data collection will describe the outcomes of the PHHS Block Grant as a whole – not individual grantee activities or outcomes.

The respondent universe consists of 61 PHHS Block Grant coordinators, or their designees, across 61 health departments (50 states, the District of Columbia, 2 tribes, 5 US territories, and 3 freely associated states). The assessment will be administered to PHHS Block Grant coordinators electronically via a web-based questionnaire. A link to the assessment will be

provided by email invitation. The survey will be completed once every 2 years. The total annualized estimated burden is 46 hours.

Estimated Annualized Burden Hours

Type of Respondents	Form Name	Number of Respondents	Number of Responses per Respondent	Average Burden per Response (in hours)
PHHS Block Grant Coordinators, or Designees	PHHS Block Grant Assessment	61	1	45/60
