Determination Start Date

08/26/19

Description

The purpose of this evaluation is to assess select cross-cutting outputs and outcomes of the PHHS Block Grant and demonstrate the utility of the grant on a national level. This evaluation will describe the grant as a whole—not individual grantee activities or outcomes. Findings from this evaluation will be used to 1) describe the outcomes and achievements of grantees’ public health efforts and identify how the use of PHHS Block Grant funds contributed to those results and 2) help assess how the grant advances work of the public health system and provide evidence to support future budgetary requests. The Block Grant evaluation team is using the Block Grant Measurement Framework as an innovative approach to assessing cross-cutting outputs and outcomes resulting from

grantees' use of flexible grant funds. The framework defines a set of measures that enable CDC to standardize the collection of data on grantee achievements. These four measures capture aspects of three cross-cutting outcomes considered to be most important, relevant, measureable, and feasible: 1. Public Health Infrastructure • Measure 1.1. (Information Systems Capacity Improved): Number of state, territorial, tribal, and local agencies whose capacity to collect or enhance data that provide information of public health importance was improved or maintained through the use of PHHS Block Grant funds • Measure 1.2. (Quality Improved): Number of state, territorial, tribal, and local agencies in which the efficiency or effectiveness of operations, programs, or services was improved through the use of PHHS Block Grant funds 2. Emerging Public Health Needs • Measure 2.1. (Emerging Public Health Needs Addressed): Number of emerging public health needs that were addressed through the use of PHHS Block Grant funds 3. Evidence-Based Public Health Practice • Measure 3.1 (Evidence-Based Public Health Interventions Implemented): Number of evidence-based public health interventions implemented through the use of PHHS Block Grant funds

Goals/Purpose

The purpose of the PHHS Block Grant evaluation is to assess the value of the program and strengthen program performance and accountability. In addition, evaluation efforts will be used to describe select program outputs and outcomes.

Objective

There are 2 overarching evaluation questions that are being addressed by this evaluation: How does the PHHS Block Grant support grantees in addressing their jurisdictions' prioritized public health needs related to Healthy People 2020 objectives? How does the PHHS Block Grant contribute toward the achievement of organizational, systems, and health-related outcomes?

Does this project include interventions, services, or policy change work aimed at improving the health of groups who have been excluded or marginalized and/or decreasing disparities?

Not Selected

Project does not incorporate elements of health equity science

Not selected

Measuring Disparities

CDC's Role

Activity originated and designed by CDC staff, or conducted at the specific request of CDC, or CDC staff will approve study design and data collection as a condition of any funding provided

Method Categories

Survey

Methods

Data will be collected using a web-based data collection instrument using Qualtrics®. • Respondents: Respondents include 61 PHHS Block Grant coordinators, or their designees, across 61 health departments funded under the PHHS Block Grant, acting in their official capacities. These respondents represent 50 states, the District of Columbia, 2 tribes, 5 U.S. territories, and 3 freely associated states. • Analysis: Descriptive statistics will be used to analyze quantitative data. Qualitative analyses will be performed on open-ended questions. Responses will be analyzed using Microsoft Excel®.

Collection of Info, Data, or Bio specimens

Data will be collected using a web-based data collection instrument using Qualtrics®. Data collection will be conducted biennially, in fall 2019 and fall 2021, via a web-based data collection instrument

Expected Use of Findings/Results and their impact

The purpose of this ICR is to assess select cross-cutting outputs and outcomes of the PHHS Block Grant and demonstrate the utility of the grant on a national level. This data collection will describe the grant as a whole—not individual grantee activities or outcomes. Findings from this assessment will be used to 1) describe the outcomes and achievements of grantees' public health efforts and identify how the use of PHHS Block Grant funds contributed to those results and 2) help assess how the grant advances work of the public health system and provide evidence to support future budgetary requests.

Could Individuals potentially be identified based on Information Collected?

No

Will PII be captured (including coded data)?

No

Does CDC have access to the Identifiers (including coded data)?

No

Is this project covered by an Assurance of Confidentiality?

No

Does this activity meet the criteria for a Certificate of Confidentiality (CoC)?

No

Is there a formal written agreement prohibiting the release of identifiers?

No
