<sup>1</sup> Assuming that 3,000 Institutions solicit disclosures on an annual basis by sending a notification to all Investigators.

<sup>2</sup> Although an estimated 992 reports of Conflict of Interest are expected annually, the 2,000 responding Institutions must review all financial disclosures associated with PHS-funded awards to determine whether any conflicts of interest exist. Thus, the review burden of 76,000 hours is based upon estimates that it will take on the average 2 hours for an institutional official(s) to review each of 38,000 financial disclosures associated with PHS funded awards. The burden for developing a management plan for identified FCOI is estimated at 80 hours x 992 cases = 79,360 hours.

<sup>3</sup> Assuming that this is a rare occurrence based on prior experience.

<sup>4</sup> Assuming only a fraction of the newly identified SFIs will constitute FCOI.

<sup>5</sup> Assuming only a fraction of the newly identified SFIs will constitute FCOI.

<sup>6</sup> Number based on 50.605/94.5 (a)(3)(i)—of those only a fraction will relate to a project of clinical research whose purpose is to evaluate the safety or effectiveness of a drug, medical device, or treatment, but we are calculating the maximum estimated burden.

<sup>7</sup> Assuming an average of 3 publications annually.
