

ASPA COVID-19 PUBLIC EDUCATION CAMPAIGN

A campaign to increase vaccine acceptance and reinforce basic prevention measures

CET – Annotated Questionnaire (Wave 52)

Note: The questions below are the proposed questions for the fifty-second wave of the Weekly Current Events Tracker (CET). Questions highlighted in yellow will be asked every week; questions highlighted in blue will be rotated into the survey on a monthly basis; and questions highlighted in green are meant to be asked in Wave 52 only or are being asked again to update data on a variable of interest. We will be fielding questions about pandemic assessments, vaccine/social distancing/mask mandates, and parents' vaccination decisions.

cdc_commlevels: The CDC relaxed its mask guidance last week, dropping its recommendation for universal masking in areas of low or medium risk of COVID-19. They also unveiled a new method for calculating risk in each U.S. county, called COVID-19 Community Levels, which focuses on the impact of severe COVID-19 disease on local hospitals. The below map depicts COVID-19 Community Levels across the United States as of late February.

| ptn_w52_2 | Recent studies suggest that your overall risk of COVID is lowest if you get a vaccine after you've already had COVID. | ptn_w52_2: Vaccination after COVID lowers risk |
| ptn_w52_3 | Vaccines for children 5 and older provide strong protection against severe illness and hospitalization from COVID. | ptn_w52_3: Vaccine protection for children 5+ |
| ptn_w52_4 | Unvaccinated people who get COVID have about double the risk for long COVID that vaccinated people have. | ptn_w52_4: Unvaccinated risk of long COVID |
| ptn_w52_5 | Children have a low risk of getting very sick from COVID, but "low risk" isn't the same as "no risk" – and there's no way to predict how COVID might affect your child. | ptn_w52_5: Children at low risk |
