**RE: Statement of Compliance for Qualification of Airborne Radar Approaches or
Offshore Standard Approach Procedure (OSAP) Task**

(Sponsor Name) requests evaluation of our (Aircraft Type) Level D Flight Simulation Training Device (FSTD) with FAA ID (#####) for qualification of Airborne Radar Approaches (ARA) or Offshore Standard Approach Procedure (OSAP) training tasks. Our Pilot(s), (List Name(s)), who are qualified on the (Aircraft Type) aircraft have assessed the FSTD and have found that it conforms to the (Sponsor Name) (Aircraft Type) flight deck configuration and that the simulated systems and subsystems function equivalently to those in the aircraft. In addition, the navigation systems (i.e. Airborne Radar, GPS, and Radio Altimeter) accurately replicate the operator's equipment in conducting ARA or OSAP training tasks and are based on original equipment manufacturer's (OEM) or aircraft manufacturer's design data.

Sincerely,

(Sponsor Management Representative)
