SUPPLEMENTARY INFORMATION: The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission’s burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might “further reduce the information collection burden for small business concerns with fewer than 25 employees.”

General Description of Collection: The FDIC's market risk capital rules (12 CFR part 324, subpart F) enhance risk sensitivity, increase transparency through enhanced disclosures and include requirements for the public disclosure of certain qualitative and quantitative information about the market risk of state nonmember banks and state savings associations (covered FDIC-supervised institutions). The market risk rule applies only if a bank holding company or bank has aggregated trading assets and trading liabilities equal to 10 percent or more of quarter-end total assets or \$1 billion or more (covered FDIC-supervised institutions). Currently, only one FDIC regulated entity meets the criteria of the information collection requirements that are located at 12 CFR 324.203 through 324.212. The collection of information

is necessary to ensure capital adequacy appropriate for the level of market risk. Section 324.203(a)(1) requires covered FDIC-supervised institutions to have clearly defined policies and procedures for determining which trading assets and trading liabilities are trading positions and specifies the factors a covered FDIC-supervised institution must take into account in drafting those policies and procedures. Section 324.203(a)(2) requires covered FDIC supervised institutions to have clearly defined trading and hedging strategies for trading positions that are approved by senior management and specifies what the strategies must articulate. Section 324.203(b)(1) requires covered FDIC-supervised institutions to have clearly defined policies and procedures for actively managing all covered positions and specifies the minimum

requirements for those policies and procedures. Sections 324.203(c)(4) through 324.203(c)(10) require the annual review of internal models and specify certain requirements for those models. Section 324.203(d) requires the internal audit group of a covered FDIC supervised institution to prepare an annual report to the board of directors on the effectiveness of controls supporting the market risk measurement systems. Section 324.204(b) requires covered FDIC-supervised institutions to conduct quarterly back testing. Section 324.205(a)(5) requires institutions to demonstrate to the FDIC the appropriateness of proxies used to capture risks within value-at-risk models. Section 324.205(c) requires institutions to develop, retain, and make available to the FDIC value-at-risk and profit and loss information on sub

portfolios for two years. Section 324.206(b)(3) requires covered FDIC supervised institutions to have policies and procedures that describe how they determine the period of significant financial stress used to calculate the institution's stressed value-at-risk models and to obtain prior FDIC approval for any material changes to these policies and procedures. Section 324.207(b)(1) details requirements applicable to a covered FDIC-supervised institution when the covered FDIC-supervised institution uses internal models to measure the specific risk of certain covered positions. Section 324.208 requires covered FDIC-supervised institutions to obtain prior written FDIC approval for including equity positions in its incremental risk modeling. Section 324.209(a) requires prior FDIC approval for the use of a comprehensive risk measure. Section 324.209(c)(2) requires covered FDIC-supervised institutions to retain and report the results of supervisory stress testing. Section 324.210(f)(2)(i) requires covered FDIC supervised institutions to document an internal analysis of the risk characteristics of each securitization position in order to demonstrate an understanding of the position. Section 324.212 applies to certain covered FDIC supervised institutions that are not subsidiaries of bank holding companies, and requires quarterly quantitative disclosures, annual qualitative disclosures, and a formal disclosure policy approved by the board of directors that addresses the approach for determining the market risk disclosures it makes.

Relative to the 2019 information collection request (ICR), the set of information collections (ICs) included in the above burden estimates has been revised. A detailed review of the 18 ICs included in the 2019 ICR showed that seven of the ICs appear inconsistent with the requirements in subpart F or potentially repeat other identified PRA requirements in subpart F. Those seven ICs have been deleted from the set of ICs retained in this renewal.¹ Additionally, a detailed review of subpart F found five provisions that require covered institutions to conduct third-party disclosure, recordkeeping, or reporting and were not included in the 2019 ICR. The PRA requirements of these five provisions have been introduced as ICs

¹ The ICs deleted from the 2019 ICR are: IC 4—Review of internal models; IC 5—Internal audit report; IC 6—Backtesting adjustments to risk-based capital ratio calculations; IC 10—Modeled specific risk; IC 13—Requirements of stress testing; IC 14—Securitization position; IC 17—Quantitative disclosures for each portfolio of covered positions (IC numbers refer to those in the 2019 ICR memo).

in the burden estimate above.² Lastly, a review of the 2019 Supporting Statement for the Federal Reserve's approved information collection (OMB No. 7100-0314) for its Market Risk Capital Requirements regulations (12 CFR 217 subpart F) shows that the OMB No. 7100-0314 list of ICs corresponds with the modified set of ICs in this renewal, and would therefore promote consistency among how the banking agencies estimate the PRA burden for the market risk capital rule.³
