

E. National Agricultural Statistics Service (NASS) Comments

NASS Comments

Today I reviewed the FNS day care homes docket. Just as the last FNS docket I reviewed, it was very thorough and professional.

I have only one meaningful edit, which is that they mix up respondent burden and full respondent/non-response burden in one paragraph. Also, there are two assumptions in their burden calculation for which I was not able to identify the source. If possible, they should describe the reasoning behind the assumptions. Lastly, I found one extremely minor typo in one of the forms they'll be sending out to respondents.

I also noticed that all of the Spanish documents were currently labeled "placeholder", but I wouldn't have been able to check those anyway because I can't read Spanish.

I've attached the two documents with potential issues.

My suggestions here don't require a response from FNS – this was a well-done survey that I'm confident will be successful.
