Description of Available Data

Pursuant to 15 CFR Part 960, CRSRA categorizes license applicants based upon the capability of the licensed system to collect unenhanced data substantially the same as unenhanced data already available. To be considered in the data availability analysis, data must be available per the definition in 960.4, "available means readily and consistently obtainable by an entity or individual other than the U.S. Government or a foreign government."

If you are uncertain if the data are unenhanced per the definition given in 960.4, please submit the form including as much information as you know, and CRSRA will make a determination.

What is the name of the remote sensing space system (satellite or constellation) that collects the data? *

Your answer

Type of Data *

Choose

If "Other," what type of data do you wish to report?

Your answer

What is the spatial resolution of the data (please include unit)? *

Your answer

What is the spectral resolution of the data (if applicable)?

Your answer

What are the thermometric accuracy and/or minimum resolvable temperature difference of the data (if applicable)?

Your answer

What is the revisit rate of the sensor or constellation?

Your answer

What processing has the data undergone before being sold?
