

OMB Control No. 0693-0078 Expiration Date: 07/31/2022

Thank you very much for participating. This survey was developed by the National Institute of Standards and Technology (NIST) Community Resilience Program in an effort to better understand the experiences and expectations of community staff and officials regarding *resilience*, *adaptation*, and *sustainability planning*. It will take approximately 20 minutes to complete.

The information you provide will help NIST understand the needs of communities like yours, and inform the shape and direction of support from federal agencies and other groups.

We are interested in hearing from people who have had professional experience with community resilient adaptation, or sustainability planning in the past 10 years. Does this apply to you? Yes
○ No
Your responses will be confidential and results will only be reported in aggregate. By selecting "Yes" below you consent to your responses being used as part of this effort.
Yes, I consent to my responses being used confidentially in this research.
No, I do not consent to my responses being used, even confidentially, in this research. (Note: Selecting this option will cause you to exit the survey.)

Definitions

Thank you. As you may be aware, definitions for *resilience*, *adaptation*, and *sustainability* can vary, and there may even be some overlap. For this survey, we are interested in the ways these concepts are applied in the context of *community planning*. The following definitions, derived from NIST and the American Planning Association (APA), are used:

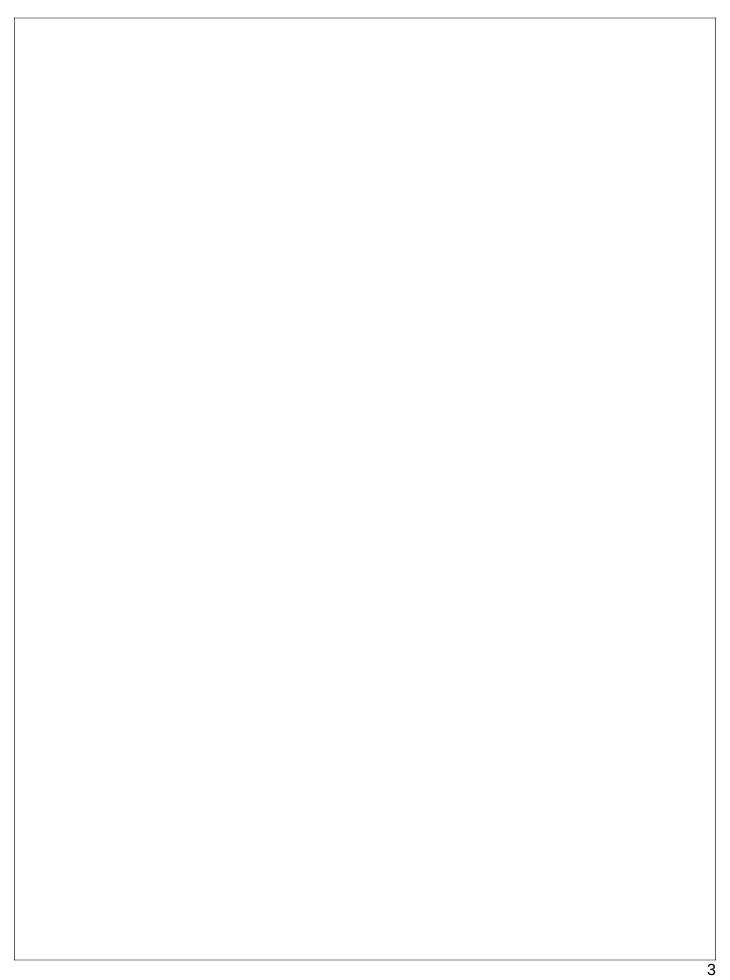

- Community *resilience* planning includes the processes and actions undertaken to prepare for hazards and changing conditions, and to resist and rapidly recover from disruptions; it may include activities related to disaster preparedness, prevention, protection, mitigation, response, and recovery. For resilience ["R"], think: *prepare, resist, recover*.
- **Community** *adaptation* **planning** includes the processes and actions involved in modifying the natural or built environment, or behavior, for the purpose of safeguarding human and environmental health, making the community better suited to changing conditions, reducing risks, and preparing for projected impacts. For adaptation ["A"], think: *modify for future conditions*.
- Community sustainability planning includes the processes and actions through which communities meet the needs of current and future generations without compromising the systems upon which they depend by balancing social, economic, and environmental resources, and linking local actions to regional and global concerns. For sustainability ["S"], think: balance resources for the future.

(Note: The hints in blue can be recalled later in the survey by hovering over the <u>underlined</u> phrase in the question text.)

In general, how well do these definitions align with your understanding of the concepts of resilience, adaptation, and sustainability, as related to community planning?

Definitions				Definitions		Definitions
do not align		Definitions		somewhat		align
at all	S	lightly align		align		perfectly

What would you change in the above definitions to align them more closely with your preferred definitions of community *resilience*, *adaptation*, and *sustainability* planning?

Community sustainability planning	\circ	\circ	C)	0	\circ
Would you care to ela prioritization of resilie			•		d on your commi	unity's

In general, how effective do you believe your community has been in the pursuit of <u>resilience</u> , adaptation, and sustainability planning?									
	Not at all effective	Minimally effective	Moderately effective	Very effective	Extremely effective	N/A (my community does not pursue this type of planning)	Not sure		
Community resilience planning	\bigcirc	\bigcirc	\bigcirc	\circ	\bigcirc				
Community adaptation planning	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
Community sustainability planning	\bigcirc	\bigcirc	\circ	\bigcirc	\circ				

Barriers

Which of the following have been **barriers** to your community's pursuit of <u>resilience</u>, <u>adaptation</u>, or <u>sustainability planning</u>? Check the boxes in each row to indicate that a barrier impeded your community resilience, adaptation, and/or sustainability planning efforts.

esilience planning	Adaptation planning	Sustainability planning	Not a barrier to any of these	Not sure
	_	-		daptation, and/
orate on how thes nity?	e barriers prevo	ented resilience, a	adaptation, and/or s	ustainability
)	(Or is there anyth	Or is there anything you'd like to	Or is there anything you'd like to clarify about you rate on how these barriers prevented resilience, a	riers that have prevented your community from pursuing resilience, a (Or is there anything you'd like to clarify about your answers above?) rate on how these barriers prevented resilience, adaptation, and/or shity?

External information and support

Now, thinking about **external information and support** for <u>community resilience</u>, <u>adaptation</u>, <u>and/or sustainability planning</u>, please indicate whether your community sought information/support for each of the following at some point in the past 10 years, and whether you received that support.

	Sought <i>and received</i> external information/support	Sought <i>but did not</i> receive external information/support	Did not seek external information/support	Not sure
Data about my community (e.g. economic, infrastructure, social)		0		0
Data about relevant hazards, including projections of future conditions				
Analytical models for hazard impact analysis	0	\bigcirc	\circ	0
Decision support tools to optimize solutions or strategies		\bigcirc	\bigcirc	\bigcirc
Planning process guidance (e.g. getting started, facilitation)	0	0		0
Funding resources for planning	\bigcirc	\bigcirc	\bigcirc	\bigcirc
Funding resources for implementation		\bigcirc		\circ
Public education and outreach	\circ	\bigcirc	\bigcirc	\bigcirc
			ommunity resilience, ada vears? Did you receive tl	

For each of the following, what was the source of the external information/support?									
	Federal government	State government	Educational institution	Nonprofit organization	For-profit organization	Other	Did not receive support for this	Not sure	
Data about my community (e.g. economic, infrastructure, social)									
Data about relevant hazards, including projections of future conditions									
Analytical models for hazard impact analysis									
Decision support tools to optimize solutions or strategies									
Planning process guidance (e.g. getting started, facilitation)									
Funding resources for planning									
Funding resources for implementation									
Public education and outreach									
Other types of external information or support (as specified above)									

External information and support -- future

Now, please indicate the importance of each of the following external information/support types to your community's **future resilience**, **adaptation**, **and/or sustainability planning**.

	Not at all important	Slightly important	Moderately important	Very important	Extremely important	Not sure
Data about my community (e.g. economic, infrastructure, social)	\circ			0	0	0
Data about relevant hazards, including projections of future conditions	\bigcirc	\bigcirc		\circ	\bigcirc	\bigcirc
Analytical models for hazard impact analysis		0	\bigcirc			
Decision support tools to optimize solutions or strategies		\bigcirc	\bigcirc	\circ		\circ

punity Posiliance, Adaptation, and Sustainability Planning: Experiences

of Local Staff and Officials
Survey conclusion
We're very pleased to hear of your interest. Please provide your preferred contact email address in the space below.
Finally, is there anything else you would like to share with NIST at this time regarding your experiences with community resilience, adaptation, and/or sustainability planning?
Public Burden Statement A Federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with an information collection subject to the requirements of the Paperwork Reduction Act of 1995 unless the information collection has a currently valid OMB Control Number. The approved OMB Control Number for this information collection is 0693-0078. Without this approval, we could not conduct this survey. Public reporting for this information collection is estimated to be approximately 20 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the information collection. All responses to this information collection are voluntary. Send comments regarding this burden estimate or any other aspect of this information collection, including suggestions for reducing this burden to the National Institute of Standards and Technology, Attn: Chris Clavin, NIST, 100 Bureau Drive, MS 8662, Gaithersburg, MD 20899-8662; via telephone: 240-205-5860; or via email: christopher.clavin@nist.gov.

Survey exit

Ok, thank you. Is there another employee(s) in your community who works on resilience, adaptation, and/or sustainability planning that you believe would be a more appropriate respondent for this survey? If so, please provide their name(s) and contact information.

(If you believe you arrived at this page in error, you can select the "Prev" button, below, to return to the						
	previous page and continue the survey.)					

Public Burden Statement [early survey exit]

A Federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with an information collection subject to the requirements of the Paperwork Reduction Act of 1995 unless the information collection has a currently valid OMB Control Number. The approved OMB Control Number for this information collection is 0693-0078. Without this approval, we could not conduct this survey. Public reporting for this information collection is estimated to be approximately 20 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the information collection. All responses to this information collection are voluntary. Send comments regarding this burden estimate or any other aspect of this information collection, including suggestions for reducing this burden to the National Institute of Standards and Technology, Attn: Chris Clavin, NIST, 100 Bureau Drive, MS 8662, Gaithersburg, MD 20899-8662; via telephone: 240-205-5860; or via email: christopher.clavin@nist.gov.
