

NIST Hurricane Maria Investigation
Emergency Communications Household Survey

Part 1 - Intro ONLINE

OMB Control #0693-0078
Expiration Date: 07/31/2022

Agency contact information may be found at the end of this survey.

Part 1: Introduction

Thank you for responding to the postcard you received. We are investigating information sharing and emergency risk communication during Hurricane Maria in Puerto Rico on behalf of the National Institute of Standards and Technology (NIST). We are interested in your experience with emergency communications before and during Hurricane Maria on September 20, 2017. Since the hurricane was over three years ago, we understand that you may not remember everything perfectly. That's okay, please answer to the best of your ability. We expect findings from these surveys will lead to recommendations for policy, procedures, and codes that benefit life safety during future hurricanes.

This survey poses no risks or benefits to you personally. Your participation is voluntary and without compensation. You may refuse to answer any question raised. The survey will take approximately 25 minutes. Any sensitive or personal information that you provide will be kept confidential to the extent permitted by law. We will not release information such as your name, phone number, or address. You will remain anonymous, and the information collected will be combined or aggregated with information that we obtain from other individuals. Information collected in this survey may be shared by NIST with researchers at NIST or with researchers outside NIST. The information that you provide may be used in future research. Any future research will include protections to ensure that both the sharing and use of the information complies with the conditions just described.

Do you consent to our using the information that you provide in the way that was described?

Please confirm your consent to participate in this survey by selecting one of the following:

- I consent
 I do not consent

Part 2: Screening Questions

Are you at least 21 years of age?

- Yes
 No

Were you living on Puerto Rico in 2017 and on the island during Hurricane Maria?

- Yes
 No

Were you involved in household preparations for Hurricane Maria?

- Yes
 No

Lastly, do you still live at the same location as before Hurricane Maria?

- Yes
 No

Is there someone else in your household who is:

- at least 21 years of age?
- was living on Puerto Rico in 2017 and on island during Hurricane Maria?
- was involved in household preparations for Hurricane Maria?
- and still lives at this location?

If so, select yes, and please have them take the survey. Thank you.

Yes

No

Part 3: Background & Previous Experience Questions

Part 3: Background & Previous Experience Questions

We would like to learn about your experiences with hurricanes and other natural hazards before Hurricanes Irma and Maria in 2017.

Q6. Before Hurricanes Irma and Maria, how many hurricanes had you experienced? *(Select only one)*

None; Irma and Maria were the first hurricanes I experienced

Part 8 - Closing

Part 8: Closing

Thank you so much for taking the time to complete this survey. Your responses will assist us in providing recommendations that can help reduce future hurricane risks.

Q42. Do you have any comments or questions about the survey? Also, please let us know if you would be interested in participating in a longer interview exploring similar issues.

A Federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with an information collection subject to the requirements of the Paperwork Reduction Act of 1995 unless the information collection has a currently valid OMB Control Number. The approved OMB Control Number for this information collection is 00693-0078. Without this approval, we could not conduct this survey. Public reporting for this information collection is estimated to be approximately 45 minutes in total, per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the information collection. All responses to this information collection are voluntary. Send comments regarding this burden estimate or any other aspect of this information collection, including suggestions for reducing this burden to the National Institute of Standards and Technology at: 100 Bureau Drive, Gaithersburg, Maryland 20899, Attn: Katherine Johnson, Social Scientist and National Construction Safety Team Member, NIST Engineering Laboratory; or contact at katherine.johnson@nist.gov.
