

TRC Performance Indicator Data Collection Tool

The Telehealth Resource Center (TRC) Performance Indicator Data Collection Tool is intended to collect data elements that are required for reporting to the Office for the Advancement of Telehealth (OAT) on TRC performance measures. The performance measures and associated data elements are designed to assess how the TRC program is meeting its goals to:

1. Expand the availability of telehealth services in underserved communities
2. Improve the quality, efficiency, and effectiveness of telehealth services
3. Promote knowledge exchange and dissemination about efficient and effective telehealth practices and technology
4. Establish sustainable technical assistance (TA) centers providing quality, unbiased TA for the development and expansion of effective and efficient telehealth services in underserved communities

OAT will require all TRC grantees to complete this tool every twelve months based on TRC activity for the preceding twelve-month reporting period. The TRC Performance Indicator Data Collection Tool collects telehealth service data at the telehealth program/network level, the originating site level, and also collects data on TRC activities, client service assessments and the impact of TRC activities. Please respond to all questions based on the **current reporting period**.
