General Comment

nobody in america should trust cdc. this is a political organization full of fat cat bureaucrats who have never practiced with real patients. they are into pandering to rich big pharma execs and care not one fig for the average american. they are sneaks with vaccines who want power over everybody's body no matter if the person will die from a vaccine injection. they approve inferior vaccines that cause deaths and brain injuries and all kinds of other injuries. what is worse, they hurt babies. little tiny babies are hurt by this agency. i am all for this agency shut down. they sent our tax dollars to wuhan china. with no concern, they funneled our precious american tax dollars into that site of political intrigue. and then we got sars and then we got corona, what the heck is next with our american tax dollars there in china? i see no brain power in this group. i see duplicity, sneakiness, and you certainly can't trust them with figures. they have been lying about deaths from flu for years. no verification ever and everything is counted as a death from flu. no data, no verification, no autopsy. just mark it down as cdc wants it. this agency should be shut down. it has outlived any usefulness to the american public. they should not be given one penny of american tax dollars to spend.
