Audit Daviau Daviad	
Audit Review Period:	
Issue of non-compliance:	Coordination of 24-hour Care Delivery
·	·
Scope:	• The scope of this Impact Analysis is limited to 50% of the participants enrolled during the audit review period who were not included in the provision of services sample selection.
	• The auditor will select the participants to be reviewed and enter their identifying information on the Participant Impact tab.
Definitions:	<u>Delayed</u> : Means a service was fully or partially provided at some point but <u>not</u> on the intended date.
	Facility: Nursing facilities (including long-term, rehabilitation, and respite stays), assisted living facilities, board and care facilities, and other sub-acute residential facilities.
	IDT authorized services: Any service that is determined necessary by the IDT or an IDT member, approved by the IDT, ordered by a PACE PCP, or care planned.
	Not provided: Means a service was never provided.
	<u>Partially provided</u> : Means a service was provided in-part but not as authorized by the IDT. Example: The care plan required home care twice daily (morning and evening), and the participant only received morning home care.
Instructions:	• Review only the participant medical records selected by the auditor. The selected participants are identified in the Participant Impact tab.
	• Review the selected medical records (e.g., medical record documentation) to determine if all IDT authorized care and services (and only IDT authorized care and services) were
	provided to participants who resided in, or received care from, a nursing facility, assisted living facility, board and care facility, or other sub-acute residential facility where coordination of care was required to ensure the delivery of necessary services. This includes temporary placement in a facility (e.g., for respite care or rehabilitation). For the purposes of this
	impact analysis, do not identify services for participants who ONLY received services in the PACE center and the participant's home.
	• Consider all relevant documentation and/or evidence, including but not limited to, the medical record, facility records, invoices, outside specialist notes, etc., when determining if
	services were provided.
	• A 'service' means all Medicare-covered services, all Medicaid-covered services, and other services determined necessary by the interdisciplinary team to improve and maintain the
	participant's overall health status, including items and drugs.
	• Respond to the questions in the participant impact tab. If a participant was not in a nursing facility (including long-term, rehabilitation, and respite stays), assisted living facility, board
	and care facility, or other sub-acute residential facility during the audit review period, during the audit review period, the PO should enter No in column H and then NA in all additional blue fields.
	After completing the Impact Analysis, if any changes need to be made to the Root Cause Analysis, please update the RCA tab.
