Subject: Invitation to inform ACF's licensing research and resources for licensing staff

Dear [CHILD CARE LICENSING ADMINISTRATOR NAME]:

Child Trends and ICF would like to invite you to participate in a phone interview about your child care licensing system, on behalf of the Administration for Children and Families (ACF). We are especially interested in understanding how licensing in your state or territory has been affected by COVID-19, as well as learning more about your licensing data system, research needs, and implementation of the CCDBG Reauthorization of 2014.

We have attached a letter of support from the Office of Child Care (OCC). We are hoping to speak with child care licensing administrators in all 50 states, plus the District of Columbia and the five territories, about their experiences with their child care licensing systems. The goals of these interviews are to inform future research about child care licensing and create evidence-based resources to support your work.

Here are some additional details about this effort:

When?

We hope to complete interviews by [DATE], starting as soon as possible. Please click on the link above to schedule a time.

How much time will this phone interview take?

This will be a one-time phone call, lasting about 60 minutes.

Who is conducting these interviews?

These interviews are part of *The Role of Licensing in Early Care and Education* (TRLECE) project, led by Child Trends and ICF. TRLECE is funded by the Office of Planning, Research, and Evaluation

(OPRE), which is part of the Administration for Children and Families (ACF) at the U.S. Department of Health and Human Services (HHS). TRLECE aims to identify and address gaps in knowledge about how key features of the child care licensing system are related to program quality and outcomes for children, families, and key stakeholders (e.g., providers, licensing agencies); and develop resources to support states and territories in evaluating and strengthening their licensing systems.

What information are you collecting?

The questions will focus on your child care licensing system and changes that resulted from the COVID-19 pandemic; how you use data and research; and what you would like to learn about licensing systems.

How will the information be used?

Child Trends, ICF, and OPRE staff will use these interviews to inform future research efforts and develop resources about child care licensing to support states and territories. We know that there is a lot of variation among states and territories and want to be certain we understand the full range of needs for information about child care licensing. Child Trends will develop an internal report for OPRE which may be shared with its federal partners to inform other federal efforts. This report will not public, but it may be used to inform future research efforts such as design documents, background materials for technical work groups, conceptual frameworks, and to contextualize research findings from follow-up data collections. We may also produce an informational report for OCC and its technical assistance (TA) providers to support federally-funded TA.

Will my name or the name of my state or territory be used in the report?

No, your individual name and/or contact information will not be included in the internal report for OPRE. The information you give us will be combined with other states' and territories' information to help us learn more about child care licensing systems. OPRE staff working on this research project may also receive a data file including all responses at the state agency level, but it will not include your name and/or contact information.

What are the next steps?

Click here [LINK TO SCHEDULING PLATFORM] or use the link above to select a time that works best for you. If none of these times work for you, please contact [NAME OF SCHEDULER] at [EMAIL] or [PHONE NUMBER]. Once you identify a time, we will email you a calendar invitation.

We are also interested in talking to the person in your licensing unit who knows the licensing administrative data the best. By "licensing administrative data" we mean all the information the licensing unit regularly collects, including information about licensing inspections, violations, complaints, enforcement, and initial applications. We would like to ask them questions about the types of data collected, the quality of the data, how far back it goes, and how it is used. You

can provide us with the name of that person and their contact information in the scheduling link above or during your interview.

If you do not schedule an interview, we will follow up via telephone and email. If you do not want to participate, please click here [\[LINK TO SCHEDULING PLATFORM\]](#).

Each state and territory is unique, so it is important for us to talk with every licensing administrator. We also know that you have limited time, so we will do everything possible to make this convenient and easy. Your participation is greatly appreciated, and your perspective will provide important information to inform OPRE's work.

Sincerely,

Kelly Maxwell
