2137-0635 Non-Substantive Change Justification

Summary:

PHMSA is requesting a non-substantive change to the information collection under OMB Control No. 2137-0635. This information collection contains various natural gas pipeline incident reports. PHMSA seeks to streamline its data collections by having all the incident-related data collections under one OMB Control No. This change will cause a shift to the distribution of burden hours. Burden hours that are currently covered under OMB Control No. 2137-0522 would be transferred to OMB Control No. 2137-0635. PHMSA is not requesting the approval for any additional data collection as each of the impacted collections are currently approved by OMB.
