35	What type of site location is this (cell site, mobile switching center, central office, network operations center, headquarters, or other? If "other," briefly describe.	Information assists in identifying the type of site location to help the FCC determine the type of costs most likely incurred at the location for the removal, replacement, and disposal of equipment and services on the Covered List.
Cost Estimates		
36	Identify if the cost estimate is associated with a single site, multiple sites, across all sites, or non site-specific (select one).	Reimbursement Program is designed to provide eligible applicants with support available for draw down based on cost estimates for the removal, replacement, and disposal of covered communications equipment or service. This information will assist with the FCC's cost estimate assessment and award of a funding allocation. Applicant will need to provide detailed information by site Location ID on (1) the covered equipment or services being replaced, removed, and disposed; (2) the replacement equipment and services; and (3) costs related to the overall removal, replacement, and disposal process.
37	Identify the Location ID associated with the cost estimate.	This information will help the FCC link up cost estimates to the location that is subject to the removal, replacement, and disposal of covered communications equipment and service.
38	Indicate whether cost estimated is associated with a technology upgrade that exceeds a comparable replacement?	Question will help identify participants seeking a technology upgrade solution so that the Fund Administrator and the Bureau can review the applications accordingly. Participants may obtain Reimbursement Program support for an amount equivalent to the cost estimate of a comparable replacement. If a participant upgrades to a higher quality, more advanced, non-comparable replacement, then the participant bears the difference in cost between the comparable replacement and the technology upgrade solution chosen.
39	Indicate whether cost estimate is related to the following categories (select all that apply): <ul style="list-style-type: none"> • Access layer; • Distribution layer; • Core layer; 	This information will assist with the FCC's cost estimate assessment and award of a funding allocation.

Applicants that submit their own cost estimates must submit supporting documentation and certify that the estimate is made in good faith.
41	Identify a cost by referencing the Catalog of Eligible Expenses prepared by the Wireline Competition Bureau for pre-determined cost estimate ranges for typically anticipated categories of cost associated with the removal, replacement, and disposal of covered communications equipment and service. (Cost Catalog)	This will auto-populate with the average cost of the item selected in the Cost Catalog. The cost estimate will be based on the average of the low-end and high-end range of cost estimates identified in the Cost Catalog.
42	For individualized cost estimates not based on the Cost Catalog, provide a cost estimate reasonably incurred for the permanent removal, replacement, and disposal of covered communications equipment or service.	If an applicant finds a Cost Catalog cost estimate average does not fully account for its costs or a cost category is not identified in the Cost Catalog, the applicant can instead provide its own individualized cost estimate. Applicants providing individualized cost estimates must submit additional supporting documentation (e.g., quotes issued by vendor) and certify the cost estimate is made in good faith, as required by the Commission's rules.
43	Provide justification as to why Applicant is submitting individualized cost estimate including additional documentation.	Applicants providing individualized cost estimates must submit additional supporting documentation (e.g., quotes issued by vendor).
