INTRODUCTION:

VEDCION

[Introduce yourself, and ask for the operator. Rephrase in your own words.]

We are collecting information on chemical use and need your help to make the information as accurate as possible. The information you provide will be used for statistical purposes only. Your responses will be kept confidential and any person who willfully discloses ANY identifiable information about you or your operation is subject to a jail term, a fine, or both. This survey is conducted in accordance with the Confidential Information Protection provisions of Title V, Subtitle A, Public Law 107-347 and other applicable Federal laws. For more information on how we protect your information please visit: https://www.nass.usda.gov/confidentiality. Response is **voluntary**. We encourage you to refer to your records during the interview.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0535-0218. The time required to complete this information collection is estimated to average 60 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

	004
BEGINNING TIME [MILITARY]	
[Name, address and partners verified and updated if necessary.]	

During the screening phase of the Vegetable Chemical Use Survey conducted in June and July, your operation was found to be growing or intending to grow vegetables this year. I now need to verify some of the information collected during the screening survey.

Verify operation name and operator on label and/or screener.

If no changes, go to Section A, page 4.

No - [Continue.]

• If changed, continue to "Change in Operating Status".

CHANGE IN OPERATING STATUS

[ENUMERATOR NOTE: *Skip this section if there is no change in operation name or operator.*] Has there been a change in operation name or operator? **NO** - [Go to Enumerator Note below.] CODE **YES** - [Enter code 1, complete name and address information below for new operator, 023 and read Enumerator Note.]..... Operation Name _____ Operator Name Address _____ Phone (_____) ____ **[ENUMERATOR NOTE:** *If the operation on the face page was in business part of the 2020 crop year, complete this questionnaire* for the part of the year during which the operation did business, unless the operation has been taken over by a new operator. If the operator has changed midyear, please conduct this interview start to finish with the new operator after reading "Valid Substitution" rules in section 4 of the Interviewer's Manual.] Has the operation printed on this questionnaire been combined or merged with any other farming operations? Yes - [Go to "Conclusion".]

SCREENING

Did this operation have any of the target crops during the 2020 crop year? VES - [Continue]	
■ NO - [Write notes explaining situation then go to "Conclusion" on back page.]	
Notes:	
Are the day-to-day decisions for this operation (<i>name on label</i>) made by – [<i>Check one.</i>]	
one individual? [Go to Section A.]	
a hired manager? [Go to Section A.]	
partners? [Continue with questions 3 and 4.]	
How many individuals are involved in the day-to-day decisions of this operation? [Enter the number of partners, including the partner named on the label. Identify the other persons in this partnership below, then go to Section A.] (Partners jointly operate land and share in decision making. Do not include landlords and tenants as partners.).	NUMBER
	YES - [Continue.] NO - [Write notes explaining situation then go to "Conclusion" on back page.] Notes: Are the day-to-day decisions for this operation (name on label) made by − [Check one.] one individual? [Go to Section A.] a hired manager? [Go to Section A.] partners? [Continue with questions 3 and 4.] How many individuals are involved in the day-to-day decisions of this operation? [Enter the number of partners, including the partner named on the label. Identify the other persons in this partnership below, then go to Section A.] (Partners jointly operate land and share in decision making. Do not include landlords and tenants as

4. Please identify the other person(s) in this partnership, then go to Section **A**. [Verify partners' names and make necessary corrections if names have already been entered.]

0			11 :	12	13		which are not yet bearing (asparagus & strawberries)
_ 1			11	12	13		• All vegetables grown for commercial transplanting.
 2			11	12	13		 All mushrooms, potatoes, dry beans, sweet potatoes.
3			11	12	13		All vegetable acreage grown
 4			·	12	13		for seed only.
5			11	12	13		 All vegetable acres grown by institutional, experimental, research and university farms.

NOTES:			

[ENUMERATOR ACTION: If pesticides were reported in Section B, column 5, continue. Otherwise, skip to Section E.]

1. Now I need to get complete information on all of the chemicals applied, including applications made by you and/or by custom applicators during the 2020 crop year to each of the **target VEGETABLE crops** you grew. **Let's start with the first application to your** [*crop*] **since the 2017 crop year harvest.**

[Complete the table for all chemical applications to the target VEGETABLE crops. Use supplemental tables if necessary.]

(Include herbicides, insecticides, nematicides, miticides, fungicides, chemical thinners, growth regulators, microbial agents, pheromones, rodenticides, and soil fumigants. Exclude seed treatments, foliar applications of nutrients, and applications made to VEGETABLE after harvest.)

Now I have some questions about pest management practices you may have used on any of the **total vegetable acres** on this operation. (*Include* both target and non-target vegetable crops grown.) By pests, we mean insects, weeds, and diseases.

[Eı	numerator Action: Were PESTICIDE	APPLICATIONS reported in Section B, column 5 or	n page 5?]	
	YES - [Continue.]	No - [Go to item 4.]		
1.	Was weather data used to assist in dete when to make pesticide applications?.	rmining either the need or	YES = 1	CODE 600
2.	Were any biological pesticides such as Bt (<i>Bacillus thuringiensis</i>), insect growth regulators (<i>Courier</i> , <i>intrepid</i> , <i>etc.</i>), neem or other natural/biological based products sprayed or applied to manage pests?			601
3.	Were pesticides with different mechanimized for the primary purpose of keep resistant to pesticides?		YES = 1	602
4.	In 2020, how were your vegetable acres primarily scouted for insects, weeds, diseases and/or beneficial organisms?	 By deliberately going to the vegetable acres specifically for scouting activities. (<i>Enter code 1 and go to item 5</i>.) By conducting general observations while performing routine tasks. (<i>Enter code 2 and go to item 7</i>.) The vegetable acres were not scouted. (<i>Enter code 3 and go to item 10</i>.) 		608
5.				609
6.	Was scouting for pests done on these v	egetable acres due to		
	a. a pest advisory warning?		YES = 1	610
	b. a pest development model?		YES = 1	611

1		7
		[If column 1 is YES , ask]
		Who did the majority of the scouting for [column 1]—
7. Were your vegetable acres scouted for		1 Operator, partner or family member 2 An employee 3 Farm supply or chemical dealer 4 Independent crop consultant or commercial scout 5 Processor 6 Other (specify:)
7. Were your vegetable acres seouted for	YES = 1	CODE
a. weeds?	612	614
b. insects and mites?	615	617
c. disease?	618	620

		CODE
8. Were written or electronic records kept to track the activity or numbers of weeds, insects or diseases?	YES = 1	623
9. Was scouting data compared to published information on infestation thresholds to determine when to take measures to manage pests?	YES = 1	624
10. Was field mapping data used for making pest management decisions?	YES = 1	625
11. Were the services of a diagnostic laboratory used for pest identification or soil or plant tissue pest analysis?	YES = 1	626
12. Were crop residues plowed down or removed to manage pests?	YES = 1	627
13. Were crops rotated during the past three years for the purpose of managing pests?	YES = 1	628
14. Were ground covers, mulches, or other physical barriers maintained to manage pest problems?	YES = 1	629
15. Was a crop variety chosen because it had resistance to a specific pest?	YES = 1	630
16. Was no-till or minimum till used to manage pests?	YES = 1	631
17. Were planting locations planned to avoid infestation of pests?	YES = 1	632
18. Were planting or harvesting dates adjusted to manage pests?	YES = 1	633
19. Were row spacing or plant density adjusted to manage pests?	YES = 1	634
20. Was a trap crop grown to help manage insects?	YES = 1	635
21. Were any beneficial organisms (<i>insects</i> , <i>nematodes</i> , <i>fungi</i>) applied or released to manage pests?	YES = 1	636
22. Were floral lures, attractants, repellants, pheromone traps or other biological pest controls used on any vegetable acres?	YES = 1	637
23. Were any vegetable acres cultivated for weed control during the growing season?	YES = 1	640
24. Were field edges, lanes, ditches, roadways or fence lines chopped, mowed, plowed, or burned to manage pests on any vegetable acres?	YES = 1	642
25. Were equipment and implements cleaned after completing field work to reduce the spread of pests?	YES = 1	643
26. Were any vegetable acres irrigated for the 2020 crops?	YES = 1	644
a. [<i>If item 26 = YES, ask</i>]Were water management practices (excluding chemigation)		
such as irrigation scheduling, controlled drainage, or treatment of retention water used to manage pests?	YES = 1	645
