

American Community Survey

Internet Data Collection Instrument Screen Capture Guide
2022

How to Use This Guide

This document contains copies of screens respondents will see in the ACS Internet Questionnaire¹. You can use this guide as a reference when talking to respondents.

On the next page, you will see a table of contents that contains links rather than page numbers. Because you will be using this guide on your computer, this format will allow you to use **Ctrl + Click** on a page name and navigate directly to that page. Most of the screen capture names are the same as the page names in the instrument. Respondents can provide the page names to you from the URL in the address bar of their browsers. For example, the question for the type of unit at the sample address (e.g., mobile home, single family home detached from any other homes, etc.) is “typeofunit” in the Internet questionnaire. If respondents are on this screen, the address bar will display, “https://respond.census.gov/acs/typeofunit.”

Some screens may change text and appearance depending on the situation or makeup of the household. For example, the “pselect” screen asks respondents to choose the person for whom they will answer questions next. If only one person remains on the roster, the text displays differently than if multiple names are available. A second screen capture for the “pselect” screen reads “pselect (one person left on roster).”

Note: in the 2016 data collection year a mobile optimized view was introduced for the Internet Data Collection instrument. If respondents are viewing the online instrument via a mobile device the screen layout will appear different based upon screen size. In addition, navigation buttons containing “Previous” and “Next” are replaced with forward and backward arrows. Instructions, FAQs and Save and Logout text are removed and replaced with links on the right-hand side of the header. Questions with a large amount of text will not be displayed on one screen and users will have to scroll to view the entire questions text.

¹ This screen capture guide does not contain any Title 13 data or other personally identifiable information (PII). All data are fictitious and any resemblance to actual data is coincidental.

Help

Why We Ask?

We request names of everyone living in the household to make it easier for you to keep track of each person's information when completing the survey.

Help

Create a list of everyone who is living or staying at this address. You can list up to 20 people.

Do Include yourself and everyone else who is living or staying there.

Do NOT include anyone who lives separately from you in the same building/structure if they have direct access from the outside or through a common hall.

If a person has a suffix on their name, such as "Jr." or "Sr." enter it into the last name field.

away_now help

Help

Why We Ask?

We ask a series of specific questions about who lives or stays at an address to make sure everyone is included in the list and the list is complete based on the Census Bureau's definition of "live or stay."

Help

Selecting "Yes" will take you to another screen where you can select which people are away now for more than two months.

By "away now for more than two months," we mean that a person:

- Has already been away for more than two months
- Is planning to be away for more than two months, but has been away only a short amount of time so far

Select "Yes" if anyone on this list:

- Is a college student and is living away at school for more than two months, either in on-campus or off-campus housing
- Is in the armed forces and is living away for more than two months, for example someone who is living in the barracks or who is deployed overseas
- Is away now for more than two months for any other reason, for example someone who is in jail or living in a rehabilitation facility, nursing home, or traveling in a circus

Select "No" if:

- Everyone on this list is there now
- The people who are away now do NOT plan to be away for more than two months
- The only people staying away now for more than two months are children in boarding school or summer camp

- Armed forces personnel who are living away for more than two months, for example someone who is living in the barracks or who is deployed overseas
- Children in shared custody who are NOT staying there right now
- Anyone who stays somewhere else part of the week to be closer to work if this address IS the place that is closer to work
- Anyone who has another place to stay or live, like a vacation or seasonal home
- Anyone who has another place to stay or live for any other reason

Do NOT Select:

- People on this list if they live there and have no other place where they live or stay
- Children in shared custody who ARE staying there right now
- Children who live at boarding school or summer camp
- Anyone who stays somewhere else part of the week to be closer to work if this address is NOT the place that is closer to work

Help

Why We Ask?

We ask a series of specific questions about who lives or stays at an address to make sure everyone is included in the list and the list is complete based on the Census Bureau's definition of "live or stay."

Help

Please determine whether this person is staying there for MORE than two months. If they have been there, or intend to be there, for more than two months then select "Yes".

Select "Yes" if this person:

- Has been there for more than two months
- Intends to be there for more than two months, but has been there less time than that as of today

Also, select "Yes" if this person has not been there for more than 2 months BUT:

- Lives away to be closer to work and this is the place where he or she lives when he or she is NOT at work
- Is a boarding school student or a child in summer camp
- Is a child in shared custody and IS staying there now

Select "No" if this person:

- Has not stayed there, and does not intend to stay there, for more than two months

Also, select "No" if this person:

- Lives away to be closer to work and this is the place where he or she lives when he or she IS at work
- Is a child in shared custody and is NOT staying there now

This question helps the Census Bureau determine which people will be asked additional questions for this survey.

Why We Ask?

This screen allows the respondent to review the list of people living or staying at an address to make sure it is correct based on the Census Bureau's definition.

Help

These are the people who we need to collect data for today.

Some of the people you told us about in previous questions might not have been eligible for this survey. Those people will no longer appear in the list of people you created.

The rest of the survey questions will only ask about the people on this final list. In addition, the survey will also collect information about the housing unit where these people live.

relationship help

Help

Why We Ask?

We ask about the relationship of each person in a household to the person who owns or rents the home -- the householder. This allows the creation of estimates about families, households, and other groups, and to present other estimates.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to describe the housing needs of different types of households (number of people, couples, families, roommates, etc.). State and Local governments receiving grants from Community Development Block Grants program, HOME Investment Partnership Program, Emergency Solutions Grant and Housing Opportunities for Persons with AIDS programs, are required by law to report these needs.
- Used to plan federal programs designed to help families, including Temporary Assistance for Needy Families (TANF).

Examples of Other Uses

- State and local agencies use this information to plan programs to aid families and children, and provide funds and services for single parents, low-income families, older people living alone, etc.
- Advocacy groups use this information to advocate for policies that benefit single parents, working parents, grandparents caring for grandchildren, and other groups.

Help

Category:	Definition:
Opposite-sex unmarried partner	Is in an intimate relationship with the householder, such as a boyfriend or girlfriend.
Same-sex unmarried partner	Is in an intimate relationship with the householder, such as a boyfriend or girlfriend.
Other relative	Related by birth, marriage, or adoption, but NOT one of the options listed- for example, niece or nephew. If a foster child is related to the householder, include in the appropriate relative category, such as grandchild, or include in the "Other relative" category.
Foster child	Under the age of 21 AND involved in the formal foster care system
Other nonrelative	Not related AND not one of the options listed

Help

Why We Ask?

We ask about a person's sex to create statistics about men and women and to present other estimates, such as occupation, by sex. These statistics are used to understand the needs and characteristics of each group and to monitor against discrimination.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to enforce against discrimination in education, employment, voting, financial assistance, and housing.
- Used to investigate whether there are differences for men and women in education, employment, home ownership, health, income and many other areas of interest to policymakers.

Examples of Other Uses

- State and local agencies use these statistics to understand the needs of men and women in their community over time.
- Researchers and advocacy groups use these statistics to understand current and future challenges and to advocate for policies that benefit their groups.

dateofbirth help

Help ×

Why We Ask?

We ask questions about a person's age and date of birth to create statistics about different age groups, and to present other estimates by age group. Age statistics are used in planning and evaluating government programs and policies that provide funds or services for specific age groups, such as children, working-age adults, women of childbearing age, or the older population. These statistics are also used to monitor against age discrimination in government programs and in society.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Required to enforce against age discrimination in education, employment, voting, financial assistance, and housing.
- Used to plan programs and forecast future needs for programs that serve the elderly, including housing assistance programs.

Examples of Other Uses

- State and local agencies use these statistics to understand population changes, and the needs of a community over time.
- Researchers and advocacy groups use statistics about specific age groups (children, college students, working men and women, workers nearing retirement, older people, etc.) to understand current and future challenges and to advocate for policies that benefit their groups.

Help

This question consists of two parts: the first part asks for the date of birth, and the second part asks for the age of the person.

Date of Birth

- If you know the date of birth, enter it. The person's age will be automatically calculated.
- If you do not know the exact date of birth, enter as much as you know.
- If you do not know the date of birth at all, leave it blank and fill in the person's age.

Age

Enter the person's age. If you do not know the exact age, please estimate. For babies less than 1 year old, do not enter the age in months. Enter 0 as the age.

hispanic help

Help

Why We Ask?

We ask a question about whether a person is of Hispanic, Latino, or Spanish origin to create statistics about this ethnic group.

Local, state, tribal, and federal programs use these data, and they are critical factors in the basic research behind numerous policies, particularly for civil rights. Data on the Hispanic and non-Hispanic populations are used in planning and funding government programs that provide funds or services for specific groups.

These data are also used to evaluate government programs and policies to ensure that they fairly and equitably serve the needs of the Hispanic population and to monitor compliance with antidiscrimination laws, regulations, and policies.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Establish and evaluate the guidelines for federal affirmative action plans under the Federal Equal Opportunity Recruitment Program.
- Monitor compliance with the Voting Rights Act and enforce bilingual election requirements.
- Monitor and enforce equal employment opportunities under the Civil Rights Act of 1964.
- Identify segments of the population who may not be getting needed medical services under the Public Health Service Act.
- Allocate funds to school districts for bilingual services under the Bilingual Education Act.

Examples of Other Uses

- The National Science Foundation uses these data to provide information on the Hispanic population in the science and engineering workforce.
- Several federal agencies use these data to investigate whether housing or transportation improvements have unintended consequences for the Hispanic population.
- Data on the Hispanic population are used with age and language data to address language and cultural diversity needs in health care plans for the older population.

Help

Please answer BOTH the question about Hispanic origin AND the question about race. For this survey, Hispanic origin is not a race.

An individual's response is based upon self-identification. People may choose one or more response categories to represent their identity or identities. The categories included in the questionnaire generally reflect social definitions recognized in this country, and do not attempt to define groups biologically, anthropologically, or genetically.

"Hispanic, Latino, or Spanish origin" includes all individuals who identify with one or more nationalities or ethnic groups originating in Mexico, Puerto Rico, Cuba, Central and South American, and other Spanish cultures. Examples of these groups include, but are not limited to, Mexican or Mexican American, Puerto Rican, Cuban, Salvadoran, Dominican, and Colombian. "Hispanic, Latino or Spanish origin" also includes groups such as Guatemalan, Honduran, Spaniard, Ecuadorian, Peruvian, Venezuelan, etc.

If a person is not of Hispanic, Latino, or Spanish origin, answer "No, not of Hispanic, Latino, or Spanish origin".

If a person selects the "Another Hispanic, Latino, or Spanish origin" box, enter the name of the specific group(s) in the space provided."

race help

Help

Why We Ask?

We ask a question about a person's race to create statistics about race and to present other estimates by race groups.

Local, state, tribal, and federal programs use these data, and they are critical factors in the basic research behind numerous policies, particularly for civil rights. Race data are used in planning and funding government programs that provide funds or services for specific groups.

These data are also used to evaluate government programs and policies to ensure that they fairly and equitably serve the needs of all racial groups and to monitor compliance with antidiscrimination laws, regulations, and policies.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Establish and evaluate the guidelines for federal affirmative action plans under the Federal Equal Opportunity Recruitment Program.
- Monitor compliance with the Voting Rights Act and enforce bilingual election requirements.
- Monitor and enforce equal employment opportunities under the Civil Rights Act of 1964.
- Identify segments of the population who may not be getting needed medical services under the Public Health Service Act.
- Allocate funds to school districts for bilingual services under the Bilingual Education Act.

Examples of Other Uses

- The National Science Foundation uses these data to provide information on people of different racial backgrounds in the science and engineering workforce.
- Several federal agencies use these data to investigate whether housing or transportation improvements have unintended consequences for specific race groups.
- Data on race are used with age and language data to address language and cultural diversity needs in health care plans for the older population.

Help

- Please answer BOTH the question about Hispanic origin AND the question about race. For this survey, Hispanic origins are not races.
- People who identify their origin as Hispanic, Latino, or Spanish may be of any race.
- The concept of race, as used by the Census Bureau, reflects self-identification by individuals according to the race or races with which they identify. The federal government treats Hispanic origin and race as separate and distinct concepts.
- You may select one or more races.
- If you select the "White" box, enter the name of the specific White origin(s) in the space provided (for example, German, Irish, English, Italian, Lebanese, Egyptian, etc.).
- If you select the "Black or African Am." box, enter the name of the specific Black or African American origin(s) in the space provided (for example, African American, Jamaican, Haitian, Nigerian, Ethiopian, Somali, etc.).
- If you select the "American Indian or Alaska Native" box, enter the name of the person's enrolled or principal tribe(s) in the space provided (for example, Navajo Nation, Blackfeet Tribe, Mayan, Aztec, Native Village of Barrow Inupiat Traditional Government, Nome Eskimo Community, etc.).
- If you select the "Other Asian" box, enter the name of the specific Asian origin(s) in the space provided (for example, Pakistani, Cambodian, Hmong, etc.).
- If you select the "Other Pacific Islander" box, enter the name of the specific Pacific Islander origin(s) in the space provided (for example, Tongan, Fijian, Marshallese, etc.).
- If you select the "Some other race" box, enter the name of the specific group(s) in the space provided.

Help

Why We Ask?

We ask about a person's employer, the kind of business or industry of that employer, the work a person was doing, and that person's most important duties at that job to produce industry and occupation statistics. These statistics are used to understand more about the labor force, to plan and measure education, employment, career development and job training programs, and to measure compliance with antidiscrimination policies.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to enforce against discrimination in employment by private employers, government agencies, and labor organizations. Used in federal affirmative employment programs, to identify underrepresentation in job categories and specific occupations.
- Used to help make other federal surveys more accurate, including those that produce the nation's official labor market estimates.

Examples of Other Uses

- Used by Federal, State and local agencies to identify the demand of specific occupational categories by geographic areas.
- Used by companies to decide where to locate new plants, stores, or offices.

Help

- Provide clearly and specifically a description of the kind of work the person does.
- If possible, avoid single words such as: nurse, manager, or engineer.
- Enter descriptions like the following:
 - Registered nurse
 - Human resources manager
 - Industrial engineer
- If trainee, apprentice, or helper, then include in this description

yearbuilt help

Help

Why We Ask?

We ask about when a building was built and when a person moved into that home to produce statistics about housing availability, understand changes in the age of homes, and measure neighborhood stability.

- [Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to understand the age of the existing housing stock. State and Local governments receiving certain grants are required by law to describe housing needs.
- Used to fund low-income housing assistance in a fair and equitable manner.

Examples of Other Uses

- State and local agencies use these statistics to determine the housing needs of people in the community.
- Advocacy groups use this information to educate the public about health hazards in older housing, such as lead.

Help

- For building → select year original construction was completed, NOT remodeling, additions or conversions
- Boat → select manufactured model year
- Mobile home → select manufactured model year
- If year is not known → provide estimate

whenmovedin help

Help

Why We Ask?

We ask about when a building was built and when a person moved into that home to produce statistics about housing availability, understand changes in the age of homes, and measure neighborhood stability.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to understand the age of the existing housing stock. State and Local governments receiving certain grants are required by law to describe housing needs.
- Used to fund low-income housing assistance in a fair and equitable manner.

Examples of Other Uses

- State and local agencies use these statistics to determine the housing needs of people in the community.
- Advocacy groups use this information to educate the public about health hazards in older housing, such as lead.

acres help

Help

Why We Ask?

We ask about the acreage and agricultural sales of a property to create statistics about agricultural properties, and to better understand statistics about home value.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to determine Qualified Census Tracts and Difficult Development Areas for the Low Income Housing Tax Credits (LIHTC) program and to determine state allocations of credit ceilings.
- Used to support agricultural research on the development and improvement of rural home and rural life and maximizing the contribution of agriculture to the welfare of consumers.

Examples of Other Uses

- State and local agencies use these statistics to understand lot sizes, housing density, zoning, and property values.
- Developers may use this information to improve areas with desirable lot sizes.

facilities help

Help

Why We Ask?

We ask questions about the presence of hot and cold running water, a bathtub or shower, a sink with a faucet, a stove or range, and a refrigerator to create statistics about indicators of housing quality, and to help identify areas eligible for housing assistance, rehabilitation loans, and other programs that help people access and afford decent, safe, and sanitary housing. Public health officials may also use this information to locate areas in danger of ground water contamination and waterborne diseases.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to define substandard housing. State and Local governments receiving certain grants are required by law to describe housing needs, including substandard housing (defined as the lack of complete kitchen or bathroom facilities).

Examples of Other Uses

- State and local agencies use these statistics to identify poor quality housing by measuring the lack of facilities.
- Developers and aid groups may use this information to improve areas with substandard housing, while advocacy groups may use this information to educate the public about potential water-related environmental and health hazards.

Help

Hot and cold running water: Even if unit has hot water only part of the time → select "Yes"

Sink with a faucet: If sink is inside the house, apartment or mobile home AND the water can be turned on and off with a faucet → select "Yes"

Stove or range: Portable cooking equipment, including microwaves, hot plates, or camp stoves, is NOT considered a stove or range

vehicles help

Help

**Why We Ask?**

We ask about the vehicles available to people to produce statistics about vehicle access. These statistics, along with the place of work and journey to work questions, provide information about commuting, road congestion, and access to transportation in emergencies.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used in mass transportation and metropolitan planning to ensure compliance with the Clean Air Act.
- Used to summarize the conditions and performance of the nation's highways, bridges, and transit.

Examples of Other Uses

- State and local agencies use these statistics to estimate clearance times for regional evacuations.
- Local transportation planners use these statistics to determine which types of transportation people are dependent on; i.e. do people bike or take public transportation by choice?

Help

heatingfuel help**Help****Why We Ask?**

We ask about home heating fuel to create statistics about home energy use. These statistics help to understand community air quality and energy needs, forecast future energy demand, analyze the fuels available to community residents, and plan and fund programs that help low-income residents afford to heat their homes.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used in the Low Income Home Energy Assistance Program (LIHEAP) to determine income-eligible households by heating fuel type.
- Used to research and report on the relationships among different development patterns (including housing and travel information) and public health and pollution.

Examples of Other Uses

- State and local agencies use this information to estimate energy consumption, improve energy efficiency in their communities, decrease air pollution, and develop affordable housing.
- Nonprofits use this information to encourage policies that decrease air pollution.

Help

Category:	Definition/examples:
Solar energy	A system that collects, stores, and distributes heat from sun

Why We Ask?

We ask about the use and cost of common utilities, any applicable condominium fees, taxes, utilities, mortgages and home loans as part of the cost of homeownership. When combined with income, selected monthly owner costs help federal planners measure housing affordability and excessive shelter costs.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to describe the housing cost burden. State and Local governments receiving certain grants are required by law to use this information.
- Used in many programs that seek to assess poverty, and determine eligibility for housing assistance programs, including the need for housing assistance for elderly, low-income households.

Examples of Other Uses

- States and local agencies use this information to estimate residential costs of energy consumption, improve energy efficiency in their communities, and develop affordable housing.
- Researchers use these statistics to investigate the costs of replacing conventional home heating fuels (including electricity) with renewable energy alternatives.

Help

Why We Ask?

We ask about the use and cost of common utilities, any applicable condominium fees, taxes, utilities, mortgages and home loans as part of the cost of homeownership. When combined with income, selected monthly owner costs help federal planners measure housing affordability and excessive shelter costs.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to describe the housing cost burden. State and Local governments receiving certain grants are required by law to use this information.
- Used in many programs that seek to assess poverty, and determine eligibility for housing assistance programs, including the need for housing assistance for elderly, low-income households.

Examples of Other Uses

- States and local agencies use this information to estimate residential costs of energy consumption, improve energy efficiency in their communities, and develop affordable housing.
- Researchers use these statistics to investigate the costs of replacing conventional home heating fuels (including electricity) with renewable energy alternatives.

Help

- If you don't know the gas costs → estimate
- Report amount even if bill is unpaid or paid by someone else
- If bill includes another apartment or business → estimate amount for this house or apartment only

foodstamps help

Help ×

Why We Ask?

We ask about food stamps/Supplemental Nutrition Assistance Program (SNAP) to understand and forecast participation in food assistance programs. In 2008, the food stamp program was renamed SNAP, but the question uses both program names to minimize confusion.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to streamline administration of the National School Lunch Program and School Breakfast Program by replacing administrative paperwork with ACS estimates of students eligible for free and reduced-price meals.
- Used in the Supplemental Nutrition Assistance Program (SNAP) to calculate the annual Program Access Index (PAI), a measure used to award bonuses to States for strong performance in SNAP administration.

Examples of Other Uses

- State and local agencies use these statistics to assess state food assistance needs and performance, participation rates for eligible families and individuals, and to determine gaps in services and programs.
- Faith-based and other nonprofit organizations use information about food assistance needs to determine where food banks, food kitchens, and other programs could be beneficial, and how their needs can be met with additional resources and services.

Help

- On October 1, 2008, the federal Food Stamp Program was renamed SNAP (Supplemental Nutrition Assistance Program).
 - Although most states have SNAP in their program name, some states may also have their own specific name for the program.

Alabama	Food Assistance Program/SNAP
Arizona	Nutrition Assistance Program/SNAP
California	CalFresh/Food Stamp Program/SNAP
Colorado	Food Assistance Program/SNAP
Delaware	Food Supplement Benefit Program/SNAP

Help

Why We Ask?

We ask about whether a home is owned or rented, and the amount of the monthly rent or how much the home and property are worth to produce statistics about tenure, rent and home value. These statistics are used to analyze whether adequate housing is affordable for residents, property owners and renters, and provide and fund housing assistance programs.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to describe the balance of owners and renters. State and Local governments receiving certain grants are required by law to use this information.
- Used to identify rental distribution of housing units used to determine Fair Market Rents (FMRs).

Examples of Other Uses

- States and counties use these statistics to understand changes in local housing markets, ensure residents have affordable housing options, qualify for assistance and grant programs designed for property owners and renters, and reduce the tax revenue losses from vacant or abandoned properties.
- Businesses and mortgage lenders use these statistics to guide future operations.

COVID-19 Guidance:

If you have had a change in your payment for your mortgage or rent due to the COVID-19 pandemic, please note the new help instructions for COVID-19 in the table below.

If mortgage payments have been completely deferred, select 'Owned by you or someone in this household with a mortgage or loan'.

If rent has temporarily been suspended or not paid for any reason, select 'Rented'.

Only select 'Occupied without payment of rent' if there were no rent payments prior to the COVID-19 pandemic and there is no legal obligation to pay rent.

New help for COVID-19	
If:	Then select:
Mortgage payments have been completely deferred due to an assistance program	Owned by you or someone in this household with a mortgage or loan. Include home equity loans
Rent has been temporarily suspended or not paid for any reason	Rented
No rent payments prior to the COVID-19 pandemic and there is no legal obligation to pay rent	Occupied without payment of rent

Help

Why We Ask?

We ask about whether a home is owned or rented, and the amount of the monthly rent or how much the home and property are worth to produce statistics about tenure, rent and home value. These statistics are used to analyze whether adequate housing is affordable for residents, protect owners and renters, and provide and fund housing assistance programs.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to describe the balance of owners and renters. State and Local governments receiving certain grants are required by law to use this information.
- Used to identify rental distribution of housing units used to determine Fair Market Rents (FMRs).

Examples of Other Uses

- States and counties use these statistics to understand changes in local housing markets, ensure residents have affordable housing options, qualify for assistance and grant programs designed to protect owners and renters, and reduce the tax revenue losses from vacant or abandoned properties.
- Businesses and mortgage lenders use these statistics to guide future operations.

Help

COVID-19 Guidance:

Because of the COVID-19 pandemic, several rent deferral and forgiveness programs have been created to prevent evictions. Renters may also have made arrangements with their landlord to reduce or defer their payment.

Do include:

- Rent agreed to or contracted for, even if unpaid or paid by someone else
- Rent that is **normally due**, even if the payment has been suspended or reduced temporarily due to the COVID-19 pandemic.

Do NOT include:

- Any subsidy amount which may be paid by a local housing authority or other agency

If rent is paid:	To convert to monthly amount:
By day	Multiply amount by 30
By week	Multiply amount by 4
Every other week	Multiply amount by 2
4 times a year	Divide amount by 3
2 times a year	Divide amount by 6

Help

Why We Ask?

We ask about the use and cost of common utilities, any applicable condominium fees, taxes, utilities, mortgages and home loans as part of the cost of homeownership. When combined with income, selected monthly owner costs help federal planners measure housing affordability and excessive shelter costs.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to describe the housing cost burden. State and Local governments receiving certain grants are required by law to use this information.
- Used in many programs that seek to assess poverty, and determine eligibility for housing assistance programs, including the need for housing assistance for elderly, low-income households.

Examples of Other Uses

- States and local agencies use this information to estimate residential costs of energy consumption, improve energy efficiency in their communities, and develop affordable housing.
- Researchers use these statistics to investigate the costs of replacing conventional home heating fuels (including electricity) with renewable energy alternatives.

Help

- Report taxes for all taxing jurisdictions, including:
 - City or town
 - County
 - State
 - School district
- Report taxes even if:
 - Included in mortgage payments
 - Not yet paid
 - Paid by someone else
 - Delinquent
- Do NOT report taxes:
 - Past due from previous years
 - Not deductible as a real estate tax for income tax purposes

Help

COVID-19 Guidance:

Because of the COVID-19 pandemic, several mortgage abatement and deferral programs have been created to prevent foreclosures. DO NOT include any changes to the amount paid towards the mortgage unless it is a permanent change to the mortgage payment. Respond with the legally obligated amount of the mortgage, per the agreement with the lender.

- Enter the mortgage that is **normally due**, even if the payment has been suspended or reduced temporarily due to the COVID-19 pandemic
- Enter monthly amount, even if unpaid or paid by someone else
- Enter zero for no regular payment required or for reverse mortgages
- Include payments on:
 - First mortgage
 - Contracts to purchase
 - Mobile home - Installment loans
- Do NOT include payments on:
 - Second mortgages
 - Junior mortgages
 - Home equity loans
 - Mobile home - Personal property taxes, site rent, registration fees, or license fees on mobile home and site

If mortgage is paid:	To convert to monthly amount:
By week	Multiply amount by 4
Every other week	Multiply amount by 2
4 times a year	Divide amount by 3
2 times a year	Divide amount by 6

hunitstatus help

Help

Why We Ask?

We ask about whether a home is owned or rented, and the amount of the monthly rent or how much the home and property are worth to produce statistics about tenure, rent and home value. These statistics are used to analyze whether adequate housing is affordable for residents, protect owners and renters, and provide and fund housing assistance programs.

[Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to describe the balance of owners and renters. State and Local governments receiving certain grants are required by law to use this information.
- Used to identify rental distribution of housing units used to determine Fair Market Rents (FMRs).

Examples of Other Uses

- States and counties use these statistics to understand changes in local housing markets, ensure residents have affordable housing options, qualify for assistance and grant programs designed to protect owners and renters, and reduce the tax revenue losses from vacant or abandoned properties.
- Businesses and mortgage lenders use these statistics to guide future operations.

Help

If unit is:	Then select:
• For rent OR for sale at the same time	For rent
• Paid or agreed upon, BUT the renter has not yet moved in	Rented, not occupied
• In cooperatives AND the individual units are offered "For sale only"	For sale only
• In condominium projects AND the individual units are offered "For sale only"	For sale only
• Recently sold, BUT new owner has not yet moved in	Sold, not occupied
• Used OR intended for use in certain seasons or for weekend or other occasional use throughout the year, including: <ul style="list-style-type: none"> • Units used for summer or winter sports or recreation, such as beach cottages and hunting cabins • Quarters for such workers as herders and loggers. 	For seasonal, recreational, or occasional use
• An interval ownership units, sometimes called shared ownership or time-sharing condominiums	
• Intended for occupancy by migratory workers employed in farm work during the crop season	Other vacant
• Held for settlement of an estate	
• Held off market for personal reasons, such as: <ul style="list-style-type: none"> • The owner has not yet decided whether or not the unit will be torn down • The owner is remodeling or repairing the unit AND will not make it available for rent or sale until the work is completed 	
• Held for the occupancy of a caretaker or janitor	
• Temporarily used for storage of excess house furniture	
• Has renters who moved during the month although rent has been paid to the end of the month

Help

Why We Ask?

We ask about place of birth, citizenship, and year of entry to provide statistics about citizens and the foreign-born population. These statistics are essential for agencies and policy makers setting and evaluating immigration policies and laws, understanding the experience of different immigrant groups, and monitoring against discrimination. These statistics are also used to tailor services to accommodate cultural differences.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used in the enforcement responsibilities under the Voting Rights Act's bilingual requirements, to determine who is eligible to vote, and in court cases.
- Used to enforce against discrimination in education, employment, voting, financial assistance, and housing.

Examples of Other Uses

- State and local agencies use these statistics to understand the needs of all the groups in their communities over time.
- Researchers and advocacy groups use the data to examine the size and characteristics of the native and foreign-born populations over time.

Help

Help

Why We Ask?

We ask about place of birth, citizenship, and year of entry to provide statistics about citizens and the foreign-born population. These statistics are essential for agencies and policy makers setting and evaluating immigration policies and laws, understanding the experience of different immigrant groups, and monitoring against discrimination. These statistics are also used to tailor services to accommodate cultural differences.

- [Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used in the enforcement responsibilities under the Voting Rights Act's bilingual requirements, to determine who is eligible to vote, and in court cases.
- Used to enforce against discrimination in education, employment, voting, financial assistance, and housing.

Examples of Other Uses

- State and local agencies use these statistics to understand the needs of all the groups in their communities over time.
- Researchers and advocacy groups use the data to examine the size and characteristics of the native and foreign-born populations over time.

Help

Why We Ask?

We ask about whether a person is attending school or college to create statistics about school enrollment. These statistics are used to analyze the characteristics and needs of school-age children and to understand the continuing education needs of adults.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to enforce against discrimination in education by state and local governments, including ensuring appropriate action to assist English language learners in overcoming language barriers, and monitoring desegregation.
- Used to provide funds to states based on the number of adults without a diploma.

Examples of Other Uses

- Colleges, universities, and businesses may use this information to bridge gaps between the education of people who need jobs and the requirements of employers.

Help	
Category:	Definition:
Public School	Supported and controlled primarily by local, county, state or federal government
Private school	Supported and controlled primarily by religious organization or other private group
Home school	Parental guided education outside of public or private school for grades 1-12

If:	Then select:
The person's school was open and the person was attending school at any time within the last 3 months.	Yes, public school or college or Yes, private school or college or homeschool (Depending on the type of school attended).
Within the last 3 months, the person was completing public school coursework at home (online, paper, or any other form) given to them by their public school.	Yes, public school or college
Within the last 3 months, the person was completing private school coursework at home (online, paper, or any other form) given to them by their private school.	Yes, private school or college
The person was enrolled in a formal home-schooling program within the last 3 months.	Yes, private school or college or home school
The person was not enrolled and the person was not following a course of study provided by a formal school within the last 3 months.	No, has not attended in the last 3 months

highestlevel help

Help

Why We Ask?

We ask about the highest degree or level of school a person has completed, and the field any Bachelor's degree, to produce statistics about educational attainment. These statistics are used to measure changes in education over time, evaluate the educational attainment of the workforce, and to identify the educational and training needs of adults.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to enforce against discrimination in employment, recognizing that some occupations have educational qualifications.
- Used to enforce against discrimination in education by state and local governments, including ensuring appropriate action to assist English language learners, and monitoring desegregation.

Examples of Other Uses

- Researchers use this information to investigate changes in educational attainment over time, and how it is related to other factors such as parents' education and health

Help

- Select highest grade or level of schooling person has **COMPLETED** or **highest degree** received
- School completed in foreign or ungraded school → report equivalent level of schooling in regular American school system
- No college courses completed for credit → select highest level completed below college level
- If currently enrolled and the school year is in progress → select previous grade or level completed prior to this year

Category:	Definition:
General Education Development (GED) or alternative credential	The person did not receive a regular high school diploma, BUT Completed high school by receiving a GED or other formal recognition of high school completion from a school or government authority
Some college credit, but less than 1 year of college credit	The person has NOT completed enough college credit to be counted as a sophomore
Professional degree beyond a bachelor's degree	Do NOT include: <ul style="list-style-type: none"> • Certificates or diplomas for training in specific trades or occupations, such as computer and electronics technology, medical assistant, or cosmetology • Post-bachelor's certificates that are related to occupational training, such as teaching, accounting, or engineering

If:	Then select:
The person is currently enrolled and the school year is in progress.	The previous grade or level which the person completed prior to this year
If the person was attending school earlier this year, and the school is no longer in session:	
If:	Then select:
If the school has said that the person has not yet officially completed the grade in which he or she was enrolled.	The previous grade or level which the person completed prior to this year
If the school has said that the person has completed the grade in which he or she was enrolled, or has not provided a final answer on this question	The current grade or level in which the person has been enrolled this year

ancestry help

Help

Why We Ask?

We ask about a person's ancestry to understand the ethnic origins of the population. These statistics are needed to measure the characteristics of ethnic groups and to tailor services to accommodate cultural differences.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to enforce against discrimination in education, employment, voting, financial assistance, and housing.
- Used to investigate whether there are differences by ancestry in education, employment, home ownership, health, income and many other areas of interest to policymakers.

Examples of Other Uses

- State and local agencies use these statistics to understand the needs of all the groups in their communities.
- Researchers and advocacy groups use the data to examine the size and characteristics of ancestry groups over time.

Help

- Ancestry refers to the person's ethnic origin or descent, "roots," or heritage
- Ancestry may also refer to the country of birth of the person or the person's parents or ancestors before their arrival in the U.S.
- Do NOT report a religious group as person's ancestry
- A person may report two ancestry groups (for example: German, Irish)
- Answer for **ALL** persons, regardless of race, Hispanic origin, or place of birth.

whatlanguage help

Help

Why We Ask?

We ask questions about whether a person speaks a language other than English at home, what language they speak, and how well they speak English, to create statistics about language. These statistics help the federal government understand how well people in each community speak English, and plan programs for adults and children who do not speak English well. This information is also used to ensure that information about public health, law, regulations, voting, and safety is communicated in languages that community members understand.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to report the housing needs of minorities, including non-native English speakers. State and Local governments receiving grants from Community Development Block Grants program, HOME Investment Partnership Program, Emergency Solutions Grant and Housing Opportunities for Persons with AIDS programs, are required by law to report these needs.
- Used in the enforcement responsibilities under the Voting Rights Act's bilingual requirements, to determine who is eligible to vote, and in court cases.

Examples of Other Uses

- State and local agencies use these statistics to provide translation services and information about voting, emergency planning, law enforcement, etc. in languages that residents understand.
- Public health officials use this information to determine whether there could be language or cultural barriers to obtaining health care.

Help

residencelastyear help

Help

Why We Ask?

We ask questions about whether a person moved in the last year, and where he or she lived one year ago to create statistics about where people are moving (among countries, and within the United States). These statistics help federal agencies understand the effects of immigration and migration in both urban and rural areas.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to produce estimates of international migration.
- Used to provide funds to States with unusually large refugee populations and high refugee concentrations.

Examples of Other Uses

- State and local agencies use these statistics to estimate residential turnover in their communities and to forecast population changes.
- These statistics are used to plan programs, services, and infrastructure for new residents when there is a trend in people arriving, or to plan programs that attract new residents or employers when there is a trend in people leaving.

insurance help

Help

Why We Ask?

We ask questions about health insurance to create statistics about the percentage of the population covered by health insurance, and the sources of their health insurance. These statistics help federal agencies better understand health insurance coverage, state and local health insurance needs, and to help federal agencies accurately distribute resources and plan programs.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to identify vulnerable populations that might have limited health care access, poor health quality, and poor health outcomes.
- Used in the Marketplace, Medicaid, and Children's Health Insurance Program (CHIP) to target efforts to enroll eligible people and provide Navigator funding.
- Used to project the demand for VA extended health care services.

Examples of Other Uses

- State and local agencies use these statistics to understand gaps in community services, and to plan services for everyone, including the uninsured.
- Researchers use these statistics to understand the effect of health care policies, and to understand who is covered by health insurance and the sources of their insurance.

Help

Do NOT include:

- Plans that cover only one type of health care (such as dental plans)
- Plans that only cover a person in case of an accident or disability

Help

Why We Ask?

We ask questions about a person's difficulty with specific daily tasks to produce disability statistics. These statistics are used by federal agencies to understand the population with disabilities, to monitor against discrimination, and to distribute funds, provide services, and develop programs for people with disabilities.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to report the housing needs of disabled persons. State and local governments receiving grants from the Community Development Block Grant program, the HOME Investment Partnership Program, the Emergency Solutions Grants program, and the Housing Opportunities for Persons with AIDS program are required by law to report these needs.
- Used to enforce against discrimination in education and employment.
- Used to prepare and respond to disasters. Information about disability status is used to estimate the size and nature of populations in a disaster-affected area and determine how best to respond to community needs.

Examples of Other Uses

- State and local agencies use these statistics to plan programs and services for the disabled population.
- Advocacy groups use this information to advocate for public policy that ensures the independence and inclusion of people with disabilities in society.

marriedstatus help**Help****Why We Ask?**

We ask about a person's marital status, changes in marital status in the past 12 months, and lifetime marital history to create estimates about marital status and marital history. These estimates are used to help federal agencies understand marriage trends, forecast future needs of programs that have spousal benefits, and measure the effects of policies and programs that focus on the well-being of families, including tax policies and financial assistance programs.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to project usage of programs with spousal benefits, including veterans' and social security programs.
- Used to understand the different types of families in need, in federal programs that benefit low-income families.

Examples of Other Uses

- State and local agencies use these statistics to determine what kinds of social services might be needed in local communities, such as support for older adults living without a spouse.
- Researchers use these statistics to understand marriage trends.

birth help

Help

Why We Ask?

We ask whether a woman has given birth in the past 12 months to create fertility statistics. These statistics can be used to project the future size of the population, and to understand more about growing families.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to estimate current and future populations eligible for federal programs and services, such as health care.
- Used in programs that investigate poverty, families, and children's health.

Examples of Other Uses

- State and local agencies use these statistics, in combination with their vital statistics, to understand future demands on local education systems, health programs and services, etc.
- Businesses, especially in baby-related industries, use this information to estimate business markets for specific needs in different areas based on fertility rate, and to understand their markets.

Help

- Select "Yes" if the person has given birth in the PAST 12 MONTHS to at least one child born alive, even if the child died or no longer lives with the mother
- Do not consider miscarriages, or stillborn children, or any adopted, foster, or stepchildren

grandchildrenhome help

Help

Why We Ask?

We ask questions about grandparents with primary responsibility for their grandchildren to create statistics about grandparent caregivers. While a variety of events may result in grandparents caring for their grandchildren, older Americans are often in different financial and health circumstances than those in middle-age. Estimates about these grandparents help many federal programs understand the needs of this group and design programs that assist both generations.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to provide performance measures for the administration of the Temporary Assistance for Needy Families (TANF) program.

Examples of Other Uses

- State and local agencies use these statistics to plan programs and services that benefit grandparent caregivers.
- Advocacy groups use this information to provide community support for grandparent caregivers.

veteranstat help

Help x**Why We Ask?**

We ask about a person's military service to create estimates of veterans and their needs at the community level. Though the Department of Veterans' Affairs (VA) maintains veterans' records, ACS statistics are able to provide federal program planners, policy-makers and researchers with additional statistics about all veterans, regardless of whether they utilize VA services. Statistics about where veterans are moving throughout the country, their ages, and their VA service-connected disability rating status, help communities plan for future health care and nursing homes. Statistics about whether veterans are in school or working help plan and fund job training, and statistics about veterans' homes help improve the home loan guarantee program.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to estimate the number of nursing home and domiciliary beds necessary for VA extended care services to serve older veterans.
- Used to assess the eligible population for federal programs benefiting veterans, such as the VA Home Loan Guarantee program, the Post-9/11 GI Bill, health care and job training, and the effect of these programs on participants.

Examples of Other Uses

- State and local agencies use these statistics to determine what kinds of social services might be needed in a community.
- Businesses may use these estimates to understand potential employees or trainees.

Help

Examples of Federal Uses

- Used to estimate the number of nursing home and domiciliary beds necessary for VA extended care services to serve older veterans.
- Used to assess the eligible population for federal programs benefiting veterans, such as the VA Home Loan Guarantee program, the Post-9/11 GI Bill, health care and job training, and the effect of these programs on participants.

Examples of Other Uses

- State and local agencies use these statistics to determine what kinds of social services might be needed in a community.
- Businesses may use these estimates to understand potential employees or trainees.

vadisability help

Help

Why We Ask?

We ask about a person's military service to create estimates of veterans and their needs at the community level. Though the Department of Veterans' Affairs (VA) maintains veterans' records, ACS statistics are able to provide federal program planners, policy-makers and researchers with additional statistics about all veterans, regardless of whether they utilize VA services. Statistics about where veterans are moving throughout the country, their ages, and their VA service-connected disability rating status, help communities plan for future health care and nursing homes. Statistics about whether veterans are in school or working help plan and fund job training, and statistics about veterans' homes help improve the home loan guarantee program.

worklastweek help

Help

Why We Ask?

We ask about whether a person worked last week, and if the answer is no, why they were not working, and whether they are looking for work to produce statistics about the labor force. These statistics about the employed, unemployed, and those out of the labor force help the federal government understand more about unemployment and the availability of workers, plan unemployment programs and services, and plan programs to grow employment over time.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to enforce nondiscrimination provisions in employment by private employers, employment agencies, and labor organizations. Used in federal affirmative employment programs, to identify under-representation in job categories, including veterans and people with disabilities.
- Used to help make other federal surveys more accurate, including those that produce the nation's official labor market estimates.

Examples of Other Uses

- State and local agencies use these statistics to identify labor surplus areas (areas with people available for hiring and training), plan workforce development programs including job fairs and training programs, and to promote business opportunities.

Help

- Count as work → Select "Yes" if this person performed:
 - Work for someone else for wages, salary, piece rate, commission, tips, or payments "in kind" (for example, food or lodging received as payment for work performed)
 - Work in own business, professional practice, or farm
 - Any work in a family business or farm, paid (for any amount of time) or without pay (for 15 or more hours per week).
 - Any part-time work including babysitting, paper routes, etc.
 - Active duty in the Armed Forces
- Do not count as work → Select "No" if this person's activities were limited to the following:
 - Housework or yard work at home
 - Unpaid volunteer work
 - School work done as a student
 - Work done as a resident or inmate of an institutional facility (like a nursing facility or correctional facility)

Help

**Why We Ask?**

We ask questions about where people work, how they get there, when they leave, and how long it takes, to create statistics about commuting, or a person's journey to work. This information is crucial for planning improvements to the Nation's transportation systems, such as roads, bridges, and transit networks.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used in transportation planning to ensure compliance with various Federal regulations.
- Used to forecast an area's workforce size and density, predict peak travel demand on roads, bridges, and transit systems, and plan emergency response routes.
- Used to protect against employment discrimination through the Equal Employment Opportunity Act (EEO).
- The Office of Management and Budget's (OMB's) uses information about where people work to delineate the nation's metropolitan and micropolitan areas. These areas are used by Federal statistical agencies in collecting, tabulating, and publishing Federal statistics.

Examples of Other Uses

- State Departments of Transportation and regional planning agencies use commuting information for long range transportation planning and travel demand forecasting.
- Planning bodies use this information to address unmet transportation needs such as services for the physically disabled population and programs to promote a diverse set of travel options such as bicycling, walking, and transit.

Help**Include:**

- Building or structure number;
- Street name;
- Street type (for example, St., Road, Ave.);
- Street direction (if direction such as "North" is part of the address);
 - For example, type 1239 N. Main St. or 1239 Main St., N.W., not just 1239 Main

if:	Then:
Only known address is post office box	<ul style="list-style-type: none"> • Do NOT give a post office box number • Enter description of work location, such as name of building or shopping center, nearest intersection, or nearest street
Worked at military installation or military base that has no street address	Enter name of military installation or base, AND enter description of work location, such as building number, building name, nearest street or intersection
Worked at several locations, but reported to same location each day to begin work	Enter street address of location reported
Worked at several locations, but did NOT report to same location each day to begin work	Enter address of location worked most of the time last week
Employer operates in more than one location, such as: <ul style="list-style-type: none"> • Grocery store chain • Public school system 	<ul style="list-style-type: none"> • Enter street address of location or branch where worked • If street address of a school is not known, enter name of school, AND description of location, such as nearest street or intersection
Person worked on a college or university campus AND street address of the workplace is not known	Enter name of building where worked, AND description of location, such as nearest street or intersection

fiftymoreweeks help

Help

Why We Ask?

We ask about how many weeks a person worked in the last year, and how many hours he or she worked each week to produce statistics about full-time and part-time workers, as well as full-year and part-year workers. These statistics help federal agencies understand trends and differences in wages, benefits, work hours, and seasonal work.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to examine the labor force participation and income status of all service-connected (SC) veterans compared to non service-connected (NSC) veterans and non-veterans. This comparison is important to compensate and care for disabled veterans.
- Used to enforce against discrimination in employment by private employers, employment agencies, and labor organizations. Used in federal affirmative employment programs, to identify under-representation in job categories, including veterans and people with disabilities.

Examples of Other Uses

- State and local agencies use these statistics to identify the percentage of people employed full-time, and the percentage of residents who work in each community year-round.

Help

- Count every week in which the person did any work at all, even for an hour
- Count weeks this person was on paid vacation, paid sick leave, or military service
- Count weeks if this person performed:
 - Work for someone else for wages, salary, piece rate, commission, tips, or payments "in kind" (for example, food or lodging received as payment for work performed)
 - Work in own business, professional practice, or farm
 - Any work in a family business or farm, paid (for any amount of time) or without pay (for 15 or more hours per week).
 - Any part-time work including babysitting, paper routes, etc.
 - Active duty in the Armed Forces
- Do NOT count weeks in which this person's activities were limited to the following:
 - Housework or yard work at home
 - Unpaid volunteer work
 - School work done as a student
 - Work done as a resident or inmate of an institution

Why We Ask?

We ask about whether a person worked last week, and if the answer is no, why they were not working, and whether they are looking for work to produce statistics about the labor force. These statistics about the employed, unemployed, and those out of the labor force help the federal government understand more about unemployment and the availability of workers, plan unemployment programs and services, and plan programs to grow employment over time.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to enforce nondiscrimination provisions in employment by private employers, employment agencies, and labor organizations. Used in federal affirmative employment programs, to identify under-representation in job categories, including veterans and people with disabilities.
- Used to help make other federal surveys more accurate, including those that produce the nation's official labor market estimates.

Examples of Other Uses

- State and local agencies use these statistics to identify labor surplus areas (areas with people available for hiring and training), plan workforce development programs including job fairs and training programs, and to promote business opportunities.

Help

Select "Yes" if the person:

- Is waiting to be recalled to a job from which the person was temporarily separated for business-related reasons
- Did not work at all during the LAST WEEK and was furloughed or placed on a temporary, unpaid leave of absence from work
- Did not work at all during the LAST WEEK and is uncertain of when they will be able to return to work due to the coronavirus (COVID-19) outbreak

Select "No" if the person:

- Did not work at all during the LAST WEEK and was under quarantine or self-isolating due to health concerns

These statistics about the employed, unemployed, and those out of the labor force help the federal government understand more about unemployment and the availability of workers, plan unemployment programs and services, and plan programs to grow employment over time.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to enforce nondiscrimination provisions in employment by private employers, employment agencies, and labor organizations. Used in federal affirmative employment programs, to identify under-representation in job categories, including veterans and people with disabilities.
- Used to help make other federal surveys more accurate, including those that produce the nation's official labor market estimates.

Examples of Other Uses

- State and local agencies use these statistics to identify labor surplus areas (areas with people available for hiring and training), plan workforce development programs including job fairs and training programs, and to promote business opportunities.

Help

- Count as work if this person performed:
 - Work for someone else for wages, salary, piece rate, commission, tips, or payments "in kind" (for example, food or lodging received as payment for work performed)
 - Work in own business, professional practice, or farm
 - Any work in a family business or farm, paid (for any amount of time) or without pay (for 15 or more hours per week).
 - Any part-time work including babysitting, paper routes, etc.
 - Active duty in the Armed Forces
- Do NOT count as work if this person's activities were limited to the following:
 - Housework or yard work at home
 - Unpaid volunteer work
 - School work done as a student
 - Work done as a resident or inmate of an institution
- Select "Over 5 years ago or never worked" if the person:
 - Never worked at any kind of job or business, either full or part time, AND
 - Never worked, with or without pay, in a family business or farm, AND
 - Never served on active duty in Armed Forces

42 DESCRIPTION OF EMPLOYMENT

The next series of questions is about the type of employment Sample Person had last week.

If Sample Person had more than one job, describe the one at which the most hours were worked.

If Sample Person did not work last week, describe the most recent employment in the past five years.

a. Which one of the following best describes Sample Person's employment last week or the most recent employment in the past 5 years?

[\(Help\)](#)

PRIVATE SECTOR EMPLOYEE

- For-profit company or organization
- Non-profit organization (including tax-exempt and charitable organizations)

GOVERNMENT EMPLOYEE

- Local government (for example: city or county school district)
- State government (including state colleges/universities)
- Active duty U.S. Armed Forces or Commissioned Corps
- Federal Government civilian employee

SELF-EMPLOYED OR OTHER

- Owner of non-incorporated business, professional practice, or farm
- Owner of incorporated business, professional practice, or farm
- Worked without pay in a for-profit family business or farm for 15 hours or more per week

Help

✕

Why We Ask?

We ask about whether a person was a private employee, government employee, self-employed, or working without pay in a family business, to produce statistics about class of worker. These statistics are used to understand more about the type of ownership of employing organizations, to plan and measure education, employment, career development and job training programs, and to measure compliance with antidiscrimination policies.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to support cooperative agricultural extension work.
- Used to enforce against discrimination in employment by private employers, government agencies, and labor organizations. Used in federal affirmative employment programs, to identify underrepresentation in job categories, including veterans and people with disabilities.

Examples of Other Uses

- State and local agencies use these statistics to identify the percentage of people employed full-time, and the percentage of residents who work in each community year-round.

Help

If worked for:	Then select:
<ul style="list-style-type: none"> • Department store • Restaurant • Automobile dealer • National investment firm 	For-profit company or organization
<ul style="list-style-type: none"> • Cooperative • Credit union • Mutual insurance company 	Non-profit organization (including tax exempt and charitable organizations)
<ul style="list-style-type: none"> • County-run community college • City-run public school • City-owned bus lines 	Local government (for example: city or county school district)
<ul style="list-style-type: none"> • State university • State police 	State government (including state colleges/universities)
<ul style="list-style-type: none"> • Armed Forces, regular service • U.S. Public Health Service or NOAA Commissioned Corps • Military Reserves AND called to service by military order (not weekend training) 	Active duty U.S. Armed Forces or Commissioned Corps
<ul style="list-style-type: none"> • Foreign government • United Nations 	Federal government civilian employee
<ul style="list-style-type: none"> • Profit or fees in his or her own business, farm, office, etc. • Sole proprietorships and partnerships, but the company is not incorporated 	Owner of non-incorporated business, professional practice, or farm
<ul style="list-style-type: none"> • Own business or organization which was a legal entity created by filing documents with the local secretary of state, commissioner of corporations, or similar official 	Owner of incorporated business, professional practice, or farm
<ul style="list-style-type: none"> • Worked on a farm or in a business operated by a relative. • This category only applies to workers in the family business or farm, not the owners. • The work does not include housework or yard work at home, caring for a family member, unpaid volunteer work or unpaid internships. • If the worker receives money, which is considered wages for work, do not assign this category. 	Worked without pay in a for-profit family business or farm for 15 hours or more per week

wages help

Help

Why We Ask?

We ask questions about the funds a person receives from various sources to create statistics about income, earnings, and poverty. These estimates measure the economic well-being of the nation. Income and poverty estimates are often part of allocation formulas that determine how food, health care, job training, housing and other assistance are distributed.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used in formulas that provide funding to populations with the greatest need (such as children and seniors).
- Used to understand the characteristics of people living at or below the poverty line. These estimates are then used to set eligibility requirements for individuals, governments, and organizations seeking funding for education, housing assistance, health care, food assistance, legal services, and many other programs.

Examples of Other Uses

- States and counties use these statistics to identify local areas eligible for grants to stimulate economic recovery, run job-training programs, and define areas as empowerment or enterprise zones.
- States and counties also use this information to assist children in poverty, and to provide funds to counties and school districts for resources and services that improve the education of economically disadvantaged children.

Help

If person received:	Then select:
<ul style="list-style-type: none"> • Wages and salaries before deductions from ALL jobs • Tips • Commissions • Bonuses • Salary from incorporated businesses • Sick leave pay • Vacation pay • Director fees • Severance pay • Assistantships and teaching fellowships • Piece-rate • Military personnel: <ul style="list-style-type: none"> • Base pay • Cash housing and/or subsistence allowance • Flight pay • Uniform allotments • Reenlistment bonuses • Armed forces or national guard pay 	Yes
<ul style="list-style-type: none"> • Economic Impact Payments (EIP) or federal stimulus payments such as payments that are part of the American Rescue Plan Act or Coronavirus Response and Relief Supplemental Appropriations Act • Child Tax Credit advance payments that are part of the American Rescue Plan Act 	No

**Why We Ask?**

We ask questions about the funds a person receives from various sources to create statistics about income, earnings, and poverty. These estimates measure the economic well-being of the nation. Income and poverty estimates are often part of allocation formulas that determine how food, health care, job training, housing and other assistance are distributed.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used in formulas that provide funding to populations with the greatest need (such as children and seniors).
- Used to understand the characteristics of people living at or below the poverty line. These estimates are then used to set eligibility requirements for individuals, governments, and organizations seeking funding for education, housing assistance, health care, food assistance, legal services, and many other programs.

Examples of Other Uses

- States and counties use these statistics to identify local areas eligible for grants to stimulate economic recovery, run job-training programs, and define areas as empowerment or enterprise zones.
- States and counties also use this information to assist children in poverty, and to provide funds to counties and school districts for resources and services that improve the education of economically disadvantaged children.

Help

If person received:	Then:
<ul style="list-style-type: none"> • Wages and salaries before deductions from ALL jobs • Tips • Commissions • Bonuses • Salary from incorporated businesses • Sick leave pay • Vacation pay • Director fees • Severance pay • Assistantships and teaching fellowships • Piece-rate • Military personnel: <ul style="list-style-type: none"> • Base pay • Cash housing and/or subsistence allowance • Flight pay • Uniform allotments • Reenlistment bonuses • Armed forces or national guard pay 	Include in amount
<ul style="list-style-type: none"> • Economic Impact Payments (EIP) or federal stimulus payments such as payments that are part of the American Rescue Plan Act or Coronavirus Response and Relief Supplemental Appropriations Act • Child Tax Credit advance payments that are part of the American Rescue Plan Act • Refunds or rebates of any kind • Withdrawals from savings of any kind • Capital gains or losses from the sale of homes, shares of stock, etc. • Inheritances or insurance settlements • Any type of loan • Pay in-kind such as food, free rent • Lottery winnings taken in lump sum 	Do NOT include in amount

43 The next few questions are about Apple Ale's income during the PAST 12 MONTHS.

For each type of income Apple Ale received, give your best estimate of the TOTAL AMOUNT during the PAST 12 MONTHS. (NOTE: The "past 12 months" is the period from today's date one year ago up through today.)

For income received jointly, report the appropriate share for each person - or, if that's not possible, report the whole amount for only one person and select "No" for the other person.

Help

**Why We Ask?**

We ask questions about the funds a person receives from various sources to create statistics about income, earnings, and poverty. These estimates measure the economic well-being of the nation. Income and poverty estimates are often part of allocation formulas that determine how food, health care, job training, housing and other assistance are distributed.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used in formulas that provide funding to populations with the greatest need (such as children and seniors).
- Used to understand the characteristics of people living at or below the poverty line. These estimates are then used to set eligibility requirements for individuals, governments, and organizations seeking funding for education, housing assistance, health care, food assistance, legal services, and many other programs.

Examples of Other Uses

- States and counties use these statistics to identify local areas eligible for grants to stimulate economic recovery, run job-training programs, and define areas as empowerment or enterprise zones.
- States and counties also use this information to assist children in poverty, and to provide funds to counties and school districts for resources and services that improve the education of economically disadvantaged children.

Help

If income received jointly by household members:

- If possible, report appropriate share for each person
- If not possible, report whole amount for one person AND select "No" for other person

If person received:	Then select:
<ul style="list-style-type: none"> • Pension or retirement income from: <ul style="list-style-type: none"> • Companies or unions • Federal, state or local governments • U.S. military • Regular income from: <ul style="list-style-type: none"> • Annuities • 401(k), 403(b), IRA, Roth IRA or KEOGH retirement plans 	Yes

American Community Survey

U.S. Department of Commerce | Economic and Statistics Administration

Data are Encrypted at all Times

Our secure servers use "HTTPS", Hypertext Transfer Protocol over Secure Socket Layer, to ensure the encrypted transmission of data between your browser and the U.S. Census Bureau. This means that instead of sending readable text over the Internet, both your browser and our server encode (scramble) all text using a security key. That way, personal data sent to your browser or data you send back are extremely difficult to decode in the unlikely event it was intercepted by an unauthorized party.

All browsers connecting to our secure server must use a minimum encryption key size of 128 bits. If you cannot connect to our secure server and you are using an older browser, please upgrade to a newer browser capable of using the required encryption key size. In addition to data being encrypted while transmitted, all data are strongly encrypted when stored on our servers (even if stored temporarily).

Third Party Identity Proofing

Our secure server uses a digital certificate (digital ID) issued by a trusted, third party Certificate Authority (CA) as proof of identity. The only way to be sure of a web site's authenticity is to view their digital ID. In this way, you can be assured that you are not being "spoofed" or tricked by an imposter. The digital ID will contain information such as:

The name of the organization that owns the web site (e.g., "U.S. Census Bureau")

The site's registered Internet name/address (e.g., "respond.census.gov")

The name of the Certification Authority under which the digital ID was issued (e.g., "VeriSign Trust Network")

The method for viewing a web site's Digital Certificate/ID varies depending on the web browser. (For example, Mozilla's Firefox will display a clickable locked padlock icon in the lower right corner of your screen when in secure mode, Microsoft Internet Explorer shows a clickable locked padlock icon in the menu bar.) Please see your browser's "help" information for instructions on how to verify a web site's identity.

instructions

Instructions for Completing this Survey

Navigation: Do NOT use the Forward or Back buttons on your browser to navigate from screen to screen. Use only the navigation buttons on the bottom of each screen.

Survey Time out: For your security, this survey will automatically time out after 15 minutes of inactivity. If you need to leave the survey for more than 15 minutes, please click "Save & Logout" on the survey menu bar so you may return to the survey at a later time.

Exiting/Returning to the Survey: If you need to leave the survey before you have fully completed it, you may click "Save & Logout" on the survey menu bar. When you return to the survey, you will begin at the same point where you left.

Saving your Answers: Your answers will be saved as you click "Next" and proceed through the survey.

Help with Survey Questions: If you need assistance on a specific survey question, use the "(Help)" link that appears with that question.

Submitting your Survey: You will be asked to submit your answers when you have completed the survey. If you also received an American Community Survey questionnaire in the mail, there is no need to mail it back once you have submitted your answers online.

document_accessibility

VI. Document Accessibility

The Census Bureau is committed to making online forms and other public documents on its internet server accessible to all. Currently, we are reviewing our web sites and making modifications to those pages, which are not in compliance with the Americans with Disabilities Act. We use Hypertext Markup Language (HTML) to create pages that are generally accessible to persons using screen-reading devices, and we are careful in our construction of HTML documents to ensure maximum accessibility. We include alternate text describing graphics.

Many Census Bureau internet documents are in ASCII or HTML formats. These documents are accessible to persons using screen-reading software. We also have a large number of documents in Adobe Acrobat PDF (Portable Document Format) files. Currently, many people using screen-reading devices cannot read documents in PDF format, specifically those that were created from a scanned hard copy.

Adobe Systems, Inc. is producing various products designed to make Adobe Acrobat documents accessible to persons using screen-reading software. Adobe's accessibility web pages describe their efforts.

To allow us to better serve those with visual disabilities who are having difficulty accessing PDF documents; you may contact us directly for further assistance at 301-763-INFO (4636), 800-923-8282, or by submitting a request at ask.census.gov.

VII. Third Party Web Sites and Applications

The Census Bureau has a presence on several social media/Web 2.0 platforms (Facebook, YouTube, Twitter and Flickr, and other third-party services) and clearly contain the Census Bureau's official logo. Each of these web sites provides the Census Bureau unique ways of sharing information. It also allows visitors with a way to communicate with the agency. Some may allow visitors to log in, create profiles and save information in those profiles. We do not collect any personally identifiable information about you through your use of these social media/Web 2.0 platforms. We may collect public information, such as user/screen name, city, state, and zip code of visitors to these web sites, and comments posted about the Census Bureau for statistical, research, and promotional purposes only. Further, the Census Bureau has no control over the third-party's use of this information and is not liable regarding the third-party's safeguarding your information. These web sites have their own privacy, security and accessibility policies.

The Census Bureau will also use a third-party web site or application (hosted service) to conduct customer satisfaction surveys and/or feedback forms. These surveys and/or feedback forms may collect your name and email address for processing purposes. The results from these surveys or forms are used to conduct primary research into the quality of the Census Bureau programs and products. The results collected will be used strictly for internal program management purposes to assess staff work, material design and development and to enhance planning efforts for current and future surveys and censuses. In addition, other third-party web sites or applications may be used to host Census Bureau data products to be used by the public. These web sites do not require the use of personally identifiable information or business identifiable information.

VIII. Security & Third Party Links

A. Security, Intrusion, and Detection

To ensure that computer service remains available to all users, this government IT system employs software programs to monitor network traffic to identify unauthorized attempts to upload or change information, or otherwise cause damage to our computer system. Web sites identified as representing an actual or potential security threat to Census Bureau information and/or information resources are blocked. Further, web sites that are known to violate Census Bureau, Department of Commerce, and/or Federal guidelines regarding access to certain types of web sites and/or content are blocked, for example:

- Web sites hosting malware/spam
- Web sites involved in the compromise of other government agencies
- Adult content web sites
- On-line storage and file sharing web sites
- Freeware/shareware web sites
- Web sites attacking Census Bureau systems (attempting to identify and exploit vulnerabilities in internet facing systems)
- Web sites scanning Census Bureau systems (attempting to identify internet facing systems)

B. Links to Other Web Sites

Our web site contains links to other federal agencies, international agencies, and private organizations. Once you link to another web site, you are subject to the policies of the new web site.

Links to non-government websites are denoted by *ti*. Our linking to non-government web sites does not constitute an endorsement of any products, services or the information found on them.
