Circumstances of Change Request for OMB 0920-1318

The Centers for Disease Control and Prevention (CDC), Division of Global Migration and Quarantine (DGMQ) requests nonmaterial/non-substantive changes to the currently approved Information Collection Request: *Requirement for Negative Pre-Departure Covid-19 Test Result Or Documentation Of Recovery From Covid-19 For All Airline Or Other Aircraft Passengers Arriving Into The United States From Any Foreign Country* and *Requirement For Proof Of Covid-19 Vaccination For Noncitizen, Nonimmigrant Air Passengers Arriving Into The United States From A Foreign Country* (OMB Control 0920-1318).

CDC is rescinding the Amended Order: *Requirement for Negative Pre-Departure Covid-19 Test Result Or Documentation Of Recovery From Covid-19 For All Airline Or Other Aircraft Passengers Arriving Into The United States From Any Foreign Country* (“Amended Testing Order”). To align with this rescission CDC is requesting a non-substantive change to remove any references and information collections related to the Amended Testing Order in the Combined Passenger Disclosure and Attestation to the United States of America. These changes include:

- a) Changing the title of the attestation to “*Proof of COVID-19 Vaccination For Noncitizen Nonimmigrants Passenger Disclosure and Attestation to the United States Of America*”
- b) Remove Section 1 and any references related to the testing or documentation of recovery requirement from the attestation

CDC does not consider these changes substantive since it is removing the need to collect certain information to comply with a revised Order. These changes will significantly reduce the burden for the public and airlines.

The title of this collection will also be modified to REQUIREMENT FOR PROOF OF COVID-19 VACCINATION FOR NONCITIZEN, NONIMMIGRANT AIR PASSENGERS ARRIVING INTO THE UNITED STATES FROM A FOREIGN COUNTRY so that it more accurately reflects the information that is being collected.

Annualized Total Burden Hours:

The previous annual burden hours for respondents in this information collection was calculated to be 352,538,030 hours. Based on previous estimates, CDC anticipates removing the testing Order will subtract approximately 250,000,000 annual burden hours from this total, resulting in a new estimate of 102,137,231 annual burden hours to respondents for this collection.
