

## INFORMED CONSENT FOR BD-STEPS OCCUPATIONAL QUESTIONNAIRE

The Birth Defects Study to Evaluate Pregnancy exposureS (BD-STEPS) is a study to discover clues about what causes birth defects. You previously completed a telephone interview about experiences during your pregnancy. This questionnaire asks you additional questions about your experiences during the same pregnancy.

The questionnaire will take about 20 minutes. It includes questions about working in restaurant industry. Some women may find it emotionally difficult to discuss their pregnancies. There is no other likely risk. Completing this questionnaire will not benefit you or your family directly; however, the findings may help to prevent birth defects in the future.

You can choose not to participate. The decision not to participate will not affect the care or services you or your family receives.

You are free to stop the questionnaire at any time.

We plan to share your questionnaire information with other researchers involved in this study. Information will only be used for research and it will be kept confidential. It will only be shared after appropriate approvals are obtained by the study's Data Sharing Committee and human research protection committees.
