

2021 and 2023 National Youth Risk Behavior Survey

Attachment P2

Letter of Invitation to School Districts

{DATE}

{Superintendent FIRST.NAME LAST.NAME}
{DISTRICT NAME}
{ADDRESS}
{CITY, ST ZIP}

Dear Superintendent {LAST.NAME}:

I am writing to inform you that one school in your district is among the 200 schools randomly selected across the United States to participate in the 2019 national Youth Risk Behavior Survey (YRBS), sponsored by the U.S. Centers for Disease Control and Prevention (CDC). The YRBS is a survey of students in grades 9 through 12 that assesses priority health-risk behaviors, including: (1) behaviors that result in unintentional injuries and violence, (2) tobacco use, (3) alcohol and other drug use, (4) sexual behaviors that contribute to HIV infection, other sexually transmitted diseases, and unintended pregnancies, (5) unhealthy dietary behaviors, and (6) physical inactivity. The YRBS was designed in cooperation with federal agencies and numerous state and local departments of education and health. It is conducted biennially in odd-numbered years.

The selected school in your district is shown below, along with the number of anticipated classes at each grade level:

School

Grade (Number of Classes)

The CDC respects the educational mission of schools. For that reason, only a small number of classes in each school, one or two at each selected grade level, are chosen randomly to participate. Data collection will occur during {MONTH} through {MONTH} {YEAR}. Questionnaires will be administered by specially trained field staff during one normal class period. Survey administration procedures are designed to protect student privacy and allow for anonymous participation. States, counties, cities, school districts, schools, and students will not be identified in any published reports.

As a symbol of appreciation for contributing their time and support, the CDC will provide each participating school with a monetary award. One option is to use these funds for prevention curriculum and educational materials. However, no restrictions will be placed on how schools can use these funds.

Your support for this survey will help ensure the voluntary participation of the school selected in your district. The YRBS has become the primary source of information on the most important health-risk behaviors of high school students in this country and is increasingly used by leading educators, public health officials, the media, and others to advocate for and improve school health policies and programs. In parallel to the national survey, the YRBS questionnaire is used independently by many state and local departments of education and health to conduct their own surveys. Results from the national survey serve as an index against which state- and local-level data can be compared and are used by states to support the design, implementation, and evaluation of effective prevention and control programs.

Enclosed are copies of the YRBS questionnaire, sample parental permission forms, a fact sheet, and letters of support from national health and education organizations. Within one week, a representative from ICF, a nationally recognized survey research firm contracted by CDC to conduct the national YRBS, will contact you to confirm your receipt of this information and answer any questions you may have. If you have any immediate questions, please call Ms. Alice Roberts of ICF at (800) 675-9727. Your support for this survey, which will help assess and improve efforts to reduce priority health-risk behaviors among adolescents throughout our nation, is appreciated.

Sincerely yours,

Kathleen A. Ethier, Ph.D. Director, Division of Adolescent and School Health
National Center for HIV, Viral Hepatitis, STD, and TB Prevention
