

The Crisis Counseling Assistance and Training Program (CCP) should have protocols or procedures in place for how a crisis counselor should respond if serious reactions are indicated while using this tool. Many CCPs have team leaders or other staff with a mental health background to administer this tool to ensure proper assessment and referral. All crisis counseling staff using this tool should have detailed training and guidance on use of the tool and when to make a referral for more intensive services. Prior to use of this tool, the CCP should have identified at least one organization or agency that is willing to accept referrals from the CCP for more intensive mental health or substance use intervention services.

Please use this tool as an interview guide

- 1) with adults who have received individual crisis counseling on two or more occasions before this visit (it is recommended on the *third* and *fifth* encounter) OR
- 2) with any adult at any time if you suspect the adult may be experiencing serious reactions to the disaster.

Do not use this form with children; use the Child/Youth Assessment and Referral Tool.
