As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. In this round, we removed last week's new questions except for those related to boosters. We are asking questions for the first time regarding flu vaccination behavior, experience, and concerns about coadministration with a COVID-19 vaccine, knowledge and perceptions of variants, support for mandates and restrictions amidst the worsening Delta impact, and impact of FDA approval of one vaccine on trust in COVID-19 vaccines.
