

# ASPA COVID-19 PUBLIC EDUCATION CAMPAIGN

A campaign to increase vaccine acceptance and reinforce basic prevention measures

## CET – Annotated Questionnaire (Wave 61)

Note: The questions below are the proposed questions for the 61st wave of the Weekly Current Events Tracker (CET). Questions highlighted in yellow will be asked every week; questions highlighted in blue will be rotated into the survey on a monthly basis; and questions highlighted in green are meant to be asked in this wave only or are being asked again to update data on a variable of interest. We will be fielding questions about trust in HHS and CDC, likelihood to get a second booster, COVID infections and reinfections, perceptions of vaccines for children under 5, and awareness and perceptions of the end of COVID care for uninsured people.

For the next section we would like to talk about current events.

Item #: Q20

Question Type: Single punch grid

// Soft Prompt: "We would like your response to this question." //

**uninsured\_perc:** This is true. Federal funding for free testing, treatment, and vaccines for people without health insurance has run out. This means that uninsured Americans may be charged for COVID tests and vaccines and may receive bills for COVID-19 treatments.

Thinking about this, how much do you agree or disagree with the following statements?

//PROGRAMMING NOTE: randomize variables in grid//

Variable Name	Variable Text	Variable Label
uninsured_perc1	I am concerned about being able to afford medical care if I get COVID.	uninsured_perc1: Afford medical care
uninsured_perc2	I am less likely to get tested for COVID if testing is not available for free.	uninsured_perc2: Less likely to get tested
uninsured_perc3	The end of free care for uninsured people is a sign that COVID is becoming a less important public health issue.	uninsured_perc3: Less important public health issue
uninsured_perc4	I am more likely to get a COVID vaccine or booster because COVID care for uninsured people has ended. [ONLY SHOW IF beh1_cet_r=0 or -99 OR booster_uptake4=0 or -99]	uninsured_perc4: More likely to get a COVID vaccine
