SUPPLEMENTARY INFORMATION:

Title: FERC-729, Electric Transmission Facilities

OMB Control No.: 1902-0238

Type of Request: Three year extension of the existing information collection.

Abstract: This information collection consists of the filing requirements for entities seeking to construct electric transmission facilities pursuant to the Commission's authority under section 216 of the Federal Power Act (FPA). Specifically, section 216(b)

of the FPA authorizes the Commission, under certain circumstances, to issue permits for the construction of electric transmission facilities within national interest electric transmission corridors designated by the Secretary of Energy.

The purpose of the Commission’s part 50 regulations (18 C.F.R. pt. 50) is to provide for efficient and timely review of requests for permits for the siting of proposed electric transmission facilities under section 216 of the FPA. The regulations include filing requirements associated with the Commission’s pre-filing and application review processes. For the Commission’s pre-filing process, the regulations require applicants to file a pre-filing request (50.5(c)) and subsequent information after the commencement of the pre-filing process (50.5(e)), including a finalized Project Participation Plan, a summary of project alternatives, draft resource reports, and monthly status reports. After the conclusion of the pre-filing process, the regulations require applicants to file an application consisting of general project information (50.6) and ten exhibits (50.7), including project maps, an environmental report, engineering data, and system analysis data.

Type of Respondent: Entities proposing to construct electric transmission facilities pursuant to the Commission’s authority under section 216 of the FPA.

Estimate of Annual Burden: The Commission estimates the annual public reporting burden¹ for the information collection as:

¹ “Burden” is the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 C.F.R. § 1320.3.

FERC-729 (OMB Control No. 1902-0238): Electric Transmission Facilities					
	Number of Respondents (1)	Annual Number of Responses per Respondent (2)	Total Number of Responses (1)*(2)=(3)	Average Burden & Cost Per Response² (4)	Total Annual Burden Hours & Total Annual Cost (3)*(4)=(5)
Electric Transmission Facilities	1	1	1	9,600 \$835,200	9,600 \$835,200

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency’s estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Secretary.

² FERC staff estimates that industry costs for salary plus benefits are similar to Commission costs. The cost figure is the FY2021 FERC average annual salary plus benefits (\$180,702/year or \$87/hour).
