AGENCY DISCLOSURE NOTICE

The public reporting burden for this collection of information, 0703-0080, is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or burden reduction suggestions to the Department of Defense, Washington Headquarters Services, at whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

Privacy Act Statement

This statement serves to inform you of the purpose for collecting personal information required by this system and how it will be used.

AUTHORITY: 10 U.S.C. Chapter 55, Medical and Dental Care; 32 CFR 199.17, TRICARE program; and E.O. 9397 (SSN), as amended.

PURPOSE: To collect information from Navy service members in order to create a sexual assault prevention and alcohol reduction intervention specific to Sailors ages 18-24

ROUTINE USES: Use and disclosure of your records outside of DoD may also occur in accordance with the DoD Blanket Route Uses published at http://dpclo.defense.gov/privacy/SORNs/blanket_routine_uses.html and as permitted by the Privacy Act of 1974, as amended (5 U.S.C. 552a(b)). Any protected health information (PHI) in your records may be used and disclosed generally as permitted by the HIPAA Privacy Rule (45 CFR Parts 160 and 164), as implemented within DoD. Permitted uses and disclosures of PHI include, but are not limited to, treatment, payment, and healthcare operations.

DISCLOSURE: Voluntary; however, failure to provide information may result in the denial of enrollment.

CONSENT TO PARTICIPATE IN RESEARCH

Title: Personalized Web-based Sexual Assault Prevention for Service Members

Principal Investigator: Kristen Walter, PhD

You may be eligible to take part in this research study. This form gives you important information about the study.

Please take time to carefully review this information. You are welcome to contact the researchers about the research study and ask them any questions you may have. You may also wish to talk to others (for example, your friends, family, or your personal physician) about your potential participation in this research study. You do not have to take part in this study. Participation is voluntary. You may also leave the research study at any time without penalty.

1. KEY INFORMATION: The following focused information is being presented to assist you in understanding the key elements of this study, as well as the basic reasons why you may or may not wish to consider taking part. This section is only a summary; more detailed information, including how to contact the research team for additional information or questions, follows within the remainder of this document.

a. We invite you to take part in a research study titled “Personalized Web-based Sexual Assault Prevention for Service Members” examining the general health behaviors within the US Navy among 18- to 24-year-old Sailors. The purpose of this study is to learn about how best to adapt a program designed to prevent sexual assault to meet the needs of service members. Signing a consent form and participating in this research is voluntary.

b. This study is the first phase of a research project designed to develop a new, innovative sexual assault prevention program for Sailors. You are being asked if you would like to participate in this study because you are a U.S. Navy service member between the ages of 18 and 24. This study is being conducted by researchers at the Naval Health Research Center (NHRC), Rhode Island Hospital (RIH), Georgia State University (GSU), and Arizona State University with funding from the Congressionally Directed Medical Research Programs (CDMRP).

c. In general, your participation in this research will involve taking part in a 30-minute anonymous online survey.

d. This survey can be completed at a time convenient for you and on a personal electronic device. If you complete this survey during off-duty hours, you will be eligible for compensation

for your participation. The survey is entirely confidential. Your responses to survey items will not be linked to any information that could identify you. Your responses will also not be shared with your command.

e. If you take part in this study, you will help researchers better tailor a sexual assault prevention program to the Navy population. Additionally, you will receive a \$30 Amazon gift card code for your full participation in this study.

f. If you take part in this study, there is a small potential risk of loss of privacy and/or confidential information about you. This is explained in more detail in the full consent form. Additionally, it is possible that you may feel some discomfort about answering questions during the online survey. At any time, if you feel uncomfortable, you may skip any specific survey questions or discontinue your participation without negative consequences.

Your decision will not affect your military career or any care you receive while in the military. If you decide to take part in this research study, you will be asked to sign this document. Before you sign this document, be sure you understand what the research study is about in all sections of the consent form, including the risks and possible benefits to you.

Please tell the researchers if you are taking part in another research study.

NOTE: If you are providing consent as a legally authorized representative (LAR), “you” or “your” refers to the research participant.

2. WHAT IS THE PURPOSE AND DURATION OF THIS RESEARCH AND WHO WILL TAKE PART?

The purpose of this research study is to learn about the health behaviors within the US Navy among 18- to 24-year-old Sailors to adapt a program designed to prevent sexual assault to meet the needs of service members. The total duration of participation in this anonymous online survey is 30 minutes. There will be about 500 Sailors taking part in this study over a period of approximately one year. At the end of this research study, the results, including research results about you, will not be shared with you.

3. SCREENING PROCESS TO QUALIFY FOR PARTICIPATION IN THIS STUDY

Because you are a Sailor aged 18 to 24 you are eligible to participate in this research study.

4. WHAT WILL HAPPEN IF YOU DECIDE TO BE IN THIS RESEARCH?

You will participate in a 30 minute anonymous online survey. This survey can be completed at a time convenient for you and on a personal electronic device. During this survey you will be

asked about health behaviors, such as alcohol use, sexual health, and your attitudes/beliefs. The survey is entirely confidential. Your responses to survey items will not be linked to any information that could identify you. If you complete this survey during off-duty hours, you will be eligible for compensation for your participation.

5. WHAT ARE THE RISKS OR DISCOMFORTS FROM BEING IN THIS RESEARCH?

If you choose to take part in this study, there is a risk of:

- Discomfort of answering sensitive questions: Some of the questions we ask could make you feel uncomfortable. You can choose not to answer any question without any negative consequences.
- Loss of anonymity or confidentiality: Confidentiality will be maintained to the degree permitted by the technology used. Although data are encrypted using a secure server, your participation in this online screening survey involves risks like a person's everyday use of the Internet. For example, if you complete this survey in a public location, it is possible that others may see your responses. In addition, there is always the possibility of tampering from an outside source when using the internet for collecting information. While the confidentiality of your responses will be protected once the data are downloaded from the internet, there is always a possibility of hacking or other security breaches that could threaten the confidentiality of your responses. Please know that you are free to decide not to answer any question.

All your survey data will be anonymous. Also, the secure program will NOT document your IP address when recording responses to the internet survey. You will be redirected to a new website (that can only be accessed from the end of the survey) where you will enter your name and contact information, which will only be used to provide compensation for your study participation.

6. WHAT ARE THE POSSIBLE BENEFITS FROM THIS RESEARCH?

There may or may not be any direct benefits to you for taking part in the study. However, others may benefit in the future from the information learned during this study because it will help us understand more about how to prevent sexual assault in the Navy.

7. WHAT ARE THE ALTERNATIVES TO TAKING PART IN THIS RESEARCH?

This study does not involve medical treatment. There is no other treatment available. Choosing not to take part in this research study is also an option.

8. IS THERE COMPENSATION FOR YOUR PARTICIPATION IN THIS RESEARCH?

Yes, for your participation, you will receive a \$30 Amazon gift card code via e-mail.

9. ARE THERE COSTS FOR PARTICIPATING IN THIS RESEARCH?

No, there are no costs to you for taking part in this research study.

10. PRINCIPAL INVESTIGATOR (the person(s) responsible for the scientific and technical direction of the study)

NHRC Site Principal Investigator:

Dr. Kristen H. Walter
(619) 540-4108
kristen.h.walter.civ@mail.mil

11. STUDY SPONSOR (the organizations or persons who oversee the study and are responsible for analyzing the study data)

Congressionally Directed Medical Research Programs (CDMRP)
820 Chandler Street
Fort Detrick, MD 21702

As the sponsor of this research, the Department of Defense may have access to your research data in accordance with DoDI 3216.02p.

12. SOURCE OF FUNDING

This study is being conducted with funding from the Congressionally Directed Medical Research Programs (CDMRP).

13. LOCATION OF THE RESEARCH

This study is being conducted by researchers at the Naval Health Research Center (NHRC) in San Diego, California.

14. DISCLOSURE OF FINANCIAL INTERESTS AND OTHER PERSONAL ARRANGEMENTS

There are no financial interests or other personal arrangements to be disclosed.

15. WHO WILL SEE MY INFORMATION (PRIVACY) AND HOW WILL IT BE PROTECTED (CONFIDENTIALITY)?

Records of your participation in this research study may only be disclosed in accordance with state and federal law, including the Federal Privacy Act, 5 U.S.C.552a, and its implementing regulations. DD Form 2005, Privacy Act Statement - Military Health Records, contains the Privacy Act Statement for the records. A copy of DD Form 2005 can be given to you upon request, or you can read on-line at: <https://www.esd.whs.mil/Portals/54/Documents/DD/forms/dd/dd2005.pdf>

The research team will keep your research records. These records may be looked at by members of the study team listed in the currently approved protocol, the Institutional Review Board (IRB), and the DoD Higher Level Review as part of their duties. These duties include making sure that the research participants are protected. Confidentiality of your records will be protected to the extent possible under existing regulations and laws but cannot be guaranteed.

Procedures to protect the confidentiality of the data in this study include but are not limited to:

We will not share your name with others (except for the reasons we discuss below), and we will follow legal requirements carefully as we maintain your records.

Electronic data will be stored on secure password-protected servers. These records may be viewed by representatives of the DoD (e.g., Human Research Protection Program staff, the NHRC Institutional Review Board, the Department of the Navy Human Research Protection Program (DoN HRPP) as part of their normal duties. These duties include making sure that the research participants are protected.

Confidentiality of your records will be protected to the extent possible under existing regulations and laws but cannot be guaranteed. Complete confidentiality cannot be promised for military personnel because information regarding your health or disclosures of sexual harassment and/or sexual assault are required to be reported to appropriate medical or command authorities to ensure the proper execution of the military mission, including evaluation of fitness for duty. Your name will not appear in any published paper or presentation related to this study.

Access to all data will be limited to the staff involved in this study, and results may be published in DoD technical reports, scientific journals, or presented at scientific meetings. No publication or presentation about the research study described above will reveal your identity without another authorization from you. Lastly, individuals from official government agencies, such as the Department of Defense and the U.S. Navy may inspect your research records to ensure that the rights and safety of all research participants are protected.

By signing this consent form, you are giving permission to use the information listed above for the purposes described in this form. If you refuse to give permission, you will not be able to participate in this study.

Researchers will make every effort to protect your privacy and confidentiality; however, there are risks of breach of information security and information loss.

Study researchers and research staff will have access to your research records and agree to safeguard your protected health information by using and disclosing it only as permitted by you in this consent or as directed by state and federal law.

Information gained from your participation in this research study may be published in literature, discussed for educational purposes, and used generally to further science. You will not be personally identified when your information is shared in these ways; all information will be de-identified.

16. LONG-TERM USE OF DATA

The investigator has requested to save selected data collected from your participation in this research study for possible use in future research. All data you provide will be de-identified, meaning that the information will not be associated with your name, or any other method of identifying you. You have a number of options with regard to this request. If the stored data has an identifying link you can request to be contacted and sign a separate consent form to allow the use of these data in another study. You may also choose either to not allow any further use of your data, allow use of only de-identified data, or give consent now for the use of your identifiable data to be used in future studies. This future research may be in the same area as the original study or it may be for a different kind of study. You will be provided choices at the end of this consent form to allow or deny use in future research studies.

Any future research using your retained data will require a research protocol for the proposed study approved by an Institutional Review Board (IRB) (a committee responsible for protecting research participants) or other authorized official responsible for protecting human subjects of research. The data protections for privacy and confidentiality described in this consent form will apply to any future use of your stored data.

17. USE OF INFORMATION AND SPECIMENS

During this research study, you will not be asked to provide any samples (biological specimens).

18. INCIDENTAL FINDINGS

No incidental findings are expected to result from this research.

19. VOLUNTARY PARTICIPATION

The decision to take part in this research study is completely voluntary on your part, which means you do not have to take part if you do not want to. You may also leave the research study at any time. If you choose not to take part in this research study or if you leave the study before it is finished, there will be no penalty or loss of benefits to which you are otherwise entitled.

You will be informed if significant new findings develop during this research study that may relate to your decision to continue participation.

20. WHAT HAPPENS IF I WITHDRAW FROM THIS RESEARCH?

Because we have no way to link your name to the survey data, there is not a way to withdraw your survey data once it is submitted. You can choose to stop the survey at any time prior to completion. If you stop the survey prior to completion, you will no longer be allowed to continue your participation in the study, and you will not receive the \$30 Amazon gift card code. You cannot restart the survey from where you left off if you choose stop the survey prior to completion. If you would like to restart the survey at a later date, you must start a new survey submission. Information that has already been gathered may still be used and there is no guarantee that it will be removed from the electronic database for this study.

The principal investigator of this research study may terminate your participation in this research study at any time if she determines this to be in your best interest, if you are unable to comply with the procedures required, or if you no longer meet eligibility criteria.

21. CONTACT INFORMATION

The Principal Investigator or a member of the research staff will be available to answer any questions you may have throughout this study.

rape. (RMA_13)

If a girl doesn't physically fight back, you can't really say it was rape. (RMA_14)

A rape probably didn't happen if the girl has no bruises or marks. (RMA_15)

If the accused "rapist" doesn't have a weapon, you really can't call it rape. (RMA_16)

If a girl doesn't say "no" she can't claim rape. (RMA_17)

A lot of times, girls who say they were raped agreed to have sex and then regret it. (RMA_18)

Rape accusations are often used as a way of getting back at guys. (RMA_19)

A lot of times, girls who say they were raped often led the guy on and then had regrets. (RMA_20)

A lot of times, girls who claim they were raped just have emotional problems. (RMA_21)

Girls who are caught cheating on their boyfriends sometimes claim that it was a rape. (RMA_22)

In this section, you will be asked about several things that someone from work might have done to you that were upsetting or offensive, and that happened in the **PAST YEAR**.

When the question says “someone from work,” please include any person you have contact with as part of your military duties. “Someone from work” could be a supervisor, someone above or below you in rank, or a civilian employee/contractor. They could be in your unit or in other units. These things may have occurred on-duty or off-duty, on-base or off-base. Please include them as long as the person who did them to you was someone from your military work. This could be involving someone of any gender, who is Military Personnel (Active Duty or National Guard/Reserve) who are On- or Off- duty, and On- or Off-installation or ship; or involving DoD/Service Civilian Employees and/or Contractors in your workplace or on your installation/ship. This could be involving someone of any gender, who is Military Personnel (Active Duty or National Guard/Reserve) who are on-duty or off-duty, on- or off-installation or ship.
