Includes planning and analysis models, planning data, briefing materials, studies and surveys, and lists of functions and staff at key locations. Destroy 3 years after issuing each new plan, but longer retention is authorized if required for business use.</p> <p>The contract's schedule for data retention is as follows "The disposition to be made of the Privacy Act records upon completion of task order performance is to post the data in Lexical where it will be maintained for five years. Procedures for onboarding and terminating staff.</p> <p>Technical Controls: Access to the information is controlled by role-based authentication. All servers have been configured to remove all unused applications and system files and all local account access except when necessary to manage the system and maintain integrity of data.</p> <p>Physical Controls: The servers reside in the contractor Westat's data center located in Rockville Maryland where policies, systems and procedures are in place to restrict access to and safeguard the data centers such as the use of magnetic key cards by all staff to access buildings and diesel-powered backup generators support the continuous operation of the data centers in case of long-term utility power failures.</p>	<p><input checked="" type="radio"/> Accept <input type="radio"/> Reject</p>
