

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. This wave refields questions on trust in CDC and HHS, having a pediatrician for your child(ren), and exploration of topical discussions with those pediatricians. New questions include a knowledge check regarding delay of EUA for children under 5 as well as perceptions about the delay and a battery on CDC's new masking guidance and tool and intentions to mask going forward.
