Abstract: State and Tribal reclamation and regulatory authorities are requested to provide specific budget and program information as part of the grant application and reporting processes authorized by the Surface Mining Control and Reclamation Act. States and Tribes use the OSM–51 form to report program narrative information as part of their grant applications and to meet their annual post-award reporting requirement. To ensure that the Bipartisan Infrastructure Law funding is used in accordance with section 40701(f) of the law and to maximize benefits received by the communities impacted by legacy coal mining, OSMRE must collect information from State and Tribal Abandoned Mine Land Programs. OSMRE anticipates using the revised OSM–51 form to collect information that includes, but not limited to: an annual list of projects, a description of how the projects were prioritized and selected, how the State/Tribe obtained and used public input, the estimated benefits of each project, and how the State/Tribe will prioritize projects that employ current and former coal industry employees.
