Abstract: The authority for EPA’s facility response plan (FRP) requirements is derived from section 311(j)(5) of the Clean Water Act, as amended by the Oil Pollution Act of 1990. EPA’s regulation is codified at 40 CFR 112.20 and 112.21 and related appendices. The purpose of an FRP is to help an owner or operator identify the necessary resources to respond to an oil discharge in a timely manner. If implemented effectively, the FRP will reduce the impact and severity of oil discharges and may prevent discharges because of the identification of risks at the facility. Although the owner or operator is the primary data user, EPA also uses the data in certain situations to ensure that facilities comply with the regulation and to help allocate response resources. State and local governments may use the data, which are not generally available elsewhere, and can greatly assist local emergency preparedness planning efforts. The EPA reviews all submitted FRPs and must approve FRPs for those facilities whose discharges may cause significant and substantial harm to the environment to ensure that facilities believed to pose

the highest risk have planned for adequate resources and procedures to respond to oil discharges (See 40 CFR 112.20(f)(3) for further information about the criteria for significant and substantial harm.). No information collected under the FRP rule is expected to be confidential. One of the criteria necessary for information to be classified as “proprietary business information” (40 CFR 2.208) is that a business must show that it has previously taken reasonable measures to protect the confidentiality of the information and that it intends to continue to take such measures. EPA provides no assurances of confidentiality to facility owners or operators when they file their FRPs.

Form Numbers: None.

Respondents/affected entities:

Owners or operators of facilities required to have Spill Prevention, Control, and Countermeasure (SPCC) plans under the Oil Pollution Prevention regulation (40 CFR part 112) and that, because of their location, could reasonably be expected to cause substantial harm to the environment.

Respondent’s obligation to respond: Mandatory under section 311(j)(5) of the Clean Water Act, as amended by the Oil Pollution Act of 1990.

Estimated number of respondents: 16,027 (total).

Frequency of response: Annual.

Total estimated burden: 385,784 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$17,751,436 (per year), includes \$25,954 annualized capital or operation and maintenance costs.

Changes in Estimates: The burden estimate showed an annualized increase of 1,975 hours over the prior inventory due to the projected increase in the facility universe for the ICR renewal period. The capital cost increase reflects printing and travel costs based on the ICR consultations.

Abstract: The Microbial Rules ICR examines public water system and primacy agency burden and costs for recordkeeping and reporting requirements in support of the microbial drinking water regulations. The recordkeeping and reporting requirements are mandatory for compliance with the *Code of Federal Regulations* (CFR) at 40 CFR parts 141 and 142. The following microbial regulations are included: the Surface Water Treatment Rule (SWTR), the Revised Total Coliform Rule (RTCR), the Interim Enhanced Surface Water Treatment Rule (IESWTR), the Filter Backwash Recycling Rule (FBRR), the Long Term 1 Enhanced Surface Water Treatment Rule (LT1ESWTR), the Long Term 2 Enhanced Surface Water Treatment Rule (LT2ESWTR), the Ground Water Rule (GWR) and the Aircraft Drinking Water Rule (ADWR). Future microbial-related rulemakings will be added to this consolidated ICR after the regulations are promulgated and the initial, rule-specific, ICRs are due to expire.

Form Numbers: None.

Respondents/affected entities: Public water systems and primacy agencies.

Respondent's obligation to respond: Mandatory for compliance with 40 CFR parts 141 and 142.

Estimated number of respondents: 144,273 (total).

Frequency of response: Varies by requirement (*i.e.*, on occasion, monthly, quarterly, semi-annually, and annually).

Total estimated burden: 15,020,711 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$1,318,255,000 (per year), includes \$174,805,000 annualized capital or operation and maintenance costs.

Changes in the Estimates: There is a decrease of 3,106,871 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This is due to the replacement of the original Total Coliform Rule with the Revised Total Coliform Rule and updated system inventories.

Affected sources include new and existing drying and curing ovens. The pollutants regulated include organic HAP, using formaldehyde as a surrogate. New facilities include those that commenced construction or reconstruction after the date of the original proposal (May 26, 2000).
