## Description & Funding

### Description

**Priority:** Urgent

**Date Needed:** 04/18/2022

**Priority Justification:** The determination is needed by 4/18/2022 so that it can be attached to the NNDSS PRA Revision that will be submitted to ICRO and OMB.

**Determination Start Date:** 04/14/22

**Description:**

The Public Health Services Act (42 U.S.C. 241) authorizes CDC to disseminate nationally notifiable condition information. The National Notifiable Diseases Surveillance System (NNDSS) is based on data collected at the state, territorial and local levels because of legislation and regulations in those jurisdictions that require health care providers, medical laboratories, and other entities to submit health-related data on reportable conditions to public health departments. These reportable conditions, which include infectious and non-infectious diseases, vary by jurisdiction depending upon each jurisdiction's health priorities and needs. Each year, the Council of State and Territorial Epidemiologists (CSTE), supported by CDC, determines which reportable conditions should be designated nationally notifiable or under standardized surveillance. The NNDSS currently facilitates the submission and aggregation of case notification data voluntarily submitted to CDC from 60 jurisdictions: public health departments in every U.S. state, New York City, Washington DC, 5 U.S. territories (American Samoa, the Commonwealth of Northern Mariana Islands, Guam, Puerto Rico, and the U.S. Virgin Islands), and 3 freely associated states (Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau). This information is shared across jurisdictional boundaries and both surveillance and prevention and control activities are coordinated at regional and national levels.

**IMS/CIO/Epi-Aid/Lab-Aid/Chemical Exposure Submission:** No

**IMS Activation Name:** Not selected

**Primary Priority of the Project:** Not selected

**Secondary Priority(s) of the Project:** Not selected

**Task Force Associated with the Response:** Not selected

**CIO Emergency Response Name:** Not selected

**Epi-Aid Name:** Not selected

**Lab-Aid Name:** Not selected

**Assessment of Chemical Exposure Name:** Not selected

To provide the official source of statistics in the United States for nationally notifiable conditions. Data will be used to monitor the

<b>Goals/Purpose</b>	occurrence and spread of nationally notifiable conditions.
<b>Objective:</b>	To collect case notifications (electronically, by email, and by fax) for nationally notifiable conditions from public health departments in every U.S. state, New York City, Washington DC, 5 U.S. territories, and 3 freely associated states for public health surveillance. PRA applies. This data collection is covered by OMB# 0920-0728, National Notifiable Diseases Surveillance System. The NNDSS data collection and use is non-research; it is for public health surveillance / public health practice. The purpose of NNDSS is to prevent or control disease and improve health, or to improve a public health program or service. NNDSS is focused on controlling health problems in the population from which the information is gathered.
<b>Does this project include interventions, services, or policy change work aimed at improving the health of groups who have been excluded or marginalized and /or decreasing disparities?:</b>	No
<b>Project does not incorporate elements of health equity science:</b>	Not Selected
<b>Measuring Disparities:</b>	Yes
<b>Studying Social Determinants of Health (SDOH):</b>	Yes
<b>SDOH Economic Stability:</b>	Yes
<b>SDOH Education:</b>	Not Selected
<b>SDOH Health Care Access:</b>	Not Selected
<b>SDOH Neighborhood and Environment:</b>	Not Selected
<b>SDOH Social and Community Context:</b>	Not Selected
<b>SDOH Indices:</b>	Not Selected
<b>Other SDOH Topics:</b>	Not Selected
<b>Assessing Impact:</b>	Not Selected
<b>Methods to Improve Health Equity Research and Practice:</b>	Not Selected
<b>Other:</b>	Not Selected
<b>Activities or Tasks:</b>	New Collection of Information, Data, or Biospecimens
<b>Target Populations to be Included/Represented:</b>	Other - Case notifications are submitted from 60 jurisdictions. See details in description.
<b>Tags/Keywords:</b>	Public Health Surveillance ; Disease Notification ; Nationally Notifiable Conditions
<b>CDC's Role:</b>	Activity originated and designed by CDC staff, or conducted at the specific request of CDC, or CDC staff will approve study design and data collection as a condition of any funding provided ; CDC employees or agents will obtain or use identifiable (including coded) private data or biological specimens ; CDC employees will participate as co-authors in presentation(s) or publication(s) ; CDC employees will provide substantial technical assistance or oversight
<b>Method Categories:</b>	Surveillance Support; Technical Assistance

**Methods:**

No statistical sampling methods are used. Public health departments review, process and analyze reportable conditions data and voluntarily submit case notification data on nationally notifiable conditions to CDC. The Council of State and Territorial Epidemiologists (CSTE), local, state, and territorial health departments and CDC work jointly to decide which conditions are nationally notifiable and added to NNDSS.

**Collection of Info, Data or Biospecimen:**

Over 90% of case notifications are sent to CDC by automated electronic Health Level 7 (HL7) or National Electronic Telecommunications System for Surveillance (NETSS) messaging. Some case notification messages are sent to CDC by nonautomated mechanisms including fax, email, secure file upload, and data entry to a secure website. These different mechanisms used to send case notifications to CDC vary by the jurisdiction and disease or condition. All 50 states, all cities (New York City and Washington, D.C.) and one territory (Puerto Rico) submit STD case notifications (STD case notifications account for approximately 87% of all case notifications received by CDC) by automated electronic messaging. Most territories and all freely associated states send STD case notifications by non-automated methods including fax (only quarterly aggregate data are sent by fax), email, secure file upload, and data entry to a secure website.

**Expected Use of Findings/Results and their impact:**

Data are used by CDC subject matter experts to monitor the occurrence of the conditions, identify populations or geographic areas at high risk, plan prevention and control programs and policies, allocate resources appropriately, and evaluate the effectiveness of programs and policies. The data are also used by CDC to trace cases and their contacts, obtain travel histories and other information to describe and manage outbreaks, and conduct public health follow-up to minimize the spread of disease.

**Could Individuals potentially be identified based on Information Collected?** Yes

**Will PII be captured (including coded data)?** Yes

**Does CDC have access to the identifiers (including coded data)?:** Yes

**Is this project covered by an Assurance of Confidentiality?** No

**Does this activity meet the criteria for a Certificate of Confidentiality (CoC)?** No

**Is there a formal written agreement prohibiting the release of identifiers?** No

Do you anticipate this project will be exempt research or non-exempt research

### Requested consent process wavers

Informed consent for adults      No Selection

Children capable of providing assent      No Selection

Parental permission      No Selection

Alteration of authorization under HIPPA Privacy Rule      No Selection

### Requested Waivers of Documentation of Informed Consent

Informed consent for adults      No Selection

Children capable of providing assent      No Selection

Parental permission      No Selection

### Consent process shown in an understandable language

Reading level has been estimated      No Selection

Comprehension tool is provided No Selection

Short form is provided No Selection

Translation planned or performed No Selection

Certified translation / translator No Selection

Translation and back-translation to/from target language(s) No Selection

Other method No Selection

### Clinical Trial

Involves human participants No Selection

Assigned to an intervention No Selection

Evaluate the effect of the intervention No Selection

Evaluation of a health related biomedical or behavioral outcome No Selection

Registerable clinical trial No Selection

### Other Considerations

Exception is requested to PHS informing those bested about HIV serostatus No Selection

Human genetic testing is planned now or in the future No Selection

Involves long-term storage of identifiable biological specimens No Selection

Involves a drug, biologic, or device No Selection

Conducted under an Investigational New Drug exemption or Investigational Device Exemption No Selection

## Data

### DMP

**Proposed Data Collection Start Date:** 4/18/22

**Proposed Data Collection End Date:** 5/31/25

**Proposed Public Access Level:** Public

**Public Access Justification:** For certain nationally notifiable conditions, CDC releases national data to the public through CDC's web-based query system known as CDC WONDER (<http://wonder.cdc.gov/>). NNDSS data are also published on Data.CDC.gov (<https://data.cdc.gov/>) and DATA.GOV (<http://www.data.gov/>).

**How Access Will Be Provided for Data:** Privacy is protected in a number of ways. CDC WONDER, Data.CDC.gov, and DATA.GOV only provide summary statistics of aggregate data to their users. Data for CDC WONDER are produced by CDC programs, which have already stripped the data of all PII before providing these public-use data sets to CDC WONDER. Furthermore, CDC WONDER dynamically imposes privacy and suppression constraints on all query results sets produced by the CDC WONDER web application, in compliance with each data set's specific data use policy. CDC WONDER and Data.CDC.gov are also subject to and have met CDC's Security Assessment and Authorization (SA&A) process, in which the CDC WONDER constraints are examined and validated by the CDC's Office of the Chief Information Security Officer (OCISO). Only public use, non-PII data in the form of summary statistics are uploaded to Data.CDC.gov per OCISO policy. In addition, NNDSS data published on Data.CDC.gov are also published on DATA.GOV.

**Plans for Archival and Long Term Preservation:** NNDSS data are kept by the CDC as a historical public health record, per CDC's "Scientific and Research Project Records Control Schedule", section 1a ("Authorized Disposition: PERMANENT"). Records Schedule N1-442-09-1.
