Geographic Location

Is this a multistate outbreak?	Select one
	□ Yes
	🗆 No
	Unknown
Specify the geographic area(s)	County name(s):
in your jurisdiction affected by	
the outbreak	City name(s):
(i.e., areas where outbreak-associated	
cases are residents)	

Outbreak Case Characteristics

Number of outbreak-associated cases ²	
Earliest symptom onset date ³ (MM/DD/YYYY)	
Most recent symptom onset date ³ (MM/DD/YYYY)	

² Outbreak case definitions are developed by the outbreak investigation team for each outbreak and specify case definition criteria in person, place, and time for cases that are included in the outbreak. Cases meeting the outbreak case definition often also meet the surveillance case definition; however, there are many exceptions.

³ If the symptom onset date is unknown, then the date that the patient first tested positive (i.e., specimen collection date) for the hepatitis virus being reported on this form can be used as a proxy for symptom onset date.

	information is available
Patients hospitalized ^₄	
Patients deceased ⁵	

⁴ Patients should be considered hospitalized if their hospitalization was due to the viral hepatitis infection that resulted from this outbreak. For reporting purposes, 'hospitalized' includes patients having evidence of an inpatient hospital admission, evidence of an admission order from an emergency department physician for those patients who left against medical advice, or evidence of >24 hours observation at a medical facility. Patients who were evaluated in an outpatient clinic, those discharged to home from the emergency department with a duration of stay <24 hours, or whose hospitalization status was unknown should not be considered hospitalized for the purposes of reporting on this form.

⁵ For reporting purposes, patients should be reported as deceased if their case was reported as outbreak-associated and their death was due to the viral hepatitis infection that resulted from the outbreak or to complications from their outbreak-associated viral hepatitis illness.

Outbreak Characteristics

Specify outbreak RISK	Drug use, injection
FACTORS identified	Drug use, non-injection
by time of report	Homelessness or unstable housing
(select all that apply)	Incarceration
	Sexual activity (MSM, multiple sex partners, STDs)
	Contact with viral hepatitis (household)
	Contact with viral hepatitis (healthcare worker)
	Contact with viral hepatitis (other), specify ⁶ :
	Contaminated pharmaceutical product, specify:
	Healthcare exposure (healthcare worker, employee)
	Healthcare exposure (patient)
	Hemodialysis
	Tissue or organ transplantation
	Tattoo receipt
	International travel, specify:
	 Other, specify: Unknown
⁶ e.g., drug use partner, sexual	partner

e.g., drug use partner, sexual partner
