Evaluating the Association between Serum Concentrations of Per- and Polyfluoroalkyl Substances (PFAS) and Symptoms and Diagnoses of Selected Acute Viral Illnesses Adult (≥ 18 years of age) Follow-up

Please complete the survey below.	
Thank you!	
Form Approved	
OMB No. 0923-xxxx	
Exp. Date xx/xx/202x	

ATSDR estimates the average public reporting burden for this collection of information as 25 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB Control Number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0923-xxxx).

Introduction

This is the 1st follow-up survey for the PFAS and Viral Infections Study. The purpose of this study is to improve our understanding of the relationship between the amount of PFAS in a person's blood and susceptibility to acute (short-term) viral illnesses. This includes the COVID-19 virus as well as other viral illnesses. You enrolled in this study and you completed the initial survey around [enter date]. We would now like to invite you to complete this follow-up survey that is asking about the time period from (date) to (date).

Remember to look back at your symptom diary to remind yourself of any symptoms you may have experienced in the time period from (date) to (date). The symptom diary will help you complete this survey more easily!

Please enter your participant identification number located on the Invitation Letter you received at the start of this study.

Section 1. Instructions for completion and submission

This survey is divided into sections and should take about 25 minutes to complete. As you go through each section, read each question carefully and answer as best as you can. If you have questions and would like to speak with a member of the study team, please call xxx-xxx-xxxx or send an email with your question to xxx@xxx.xxx. Thank you for being in this study.

Please remember, this survey is asking about the time period from (date) to (date).

07/18/2022 4:53pm projectredcap.org

Section 2. Demographic and Health Information
Have you moved to a different address since completing the last survey?
YesNoPrefer not to answer
In the time period from (date) to (date), did you get an Influenza vaccine (Flu shot)?
YesNoPrefer not to answer
When did you get that Influenza Vaccine (Flu shot)? Please enter month/day/year.
In the time period from (date) to (date), did you get a dose of a COVID-19 vaccine?
YesNoPrefer not to answer
When did you get that dose of a COVID-19 vaccine? Please enter month/day/year.
Which brand did you get for that dose of COVID-19 vaccine?
○ Pfizer○ Moderna○ Johnson & Johnson○ Other
In the time period from (date) to (date), did you get another COVID-19 vaccine?
YesNoPrefer not to answer
When did you get that additional dose of a COVID-19 vaccine? Please enter month/day/year.
Which brand did you get for that additional dose of COVID-19 vaccine?
○ Pfizer○ Moderna○ Johnson & Johnson○ Other

In the time period from (date) to (date), have you received a brand new diagnosis by a doctor or other health care professional of any of the chronic medical conditions listed in the chart below?

	New diagnosis	No new diagnosis	Prefer not to answer
Asthma	\bigcirc	\circ	\bigcirc
Chronic Obstructive Pulmonary Disease (COPD)	0	0	0
Cystic Fibrosis	\bigcirc	\circ	\circ
Other Chronic Lung Disease (please specify below)	0	0	0

If you selected "Other Developmental	Disability" above, pleas	se specify:	

Section 3. Similar to the survey you already completed, the questions in this section relate to how often you are in situations that may increase your risk of exposure to viruses through close contact with other people.

Including yourself, how many people live in your household? Please include individuals who sleep in the home at least 2 nights per week; please do not include those who are living away from home for school.				
How many children less than 5 years old live in your household?				
How many children aged 5-11 years live in your household?				
How many children aged 12-17 years live in your household?				
How many adults aged 18-64 years live in your household?				
How many adults aged 65 years and older live in your household?				
How many bedrooms are in your house?				

Please answer the next six questions based on your average experience in the time period from (date) to (date). If the question does not apply to you, please enter "0". (Note: the first three questions ask for number of hours per week and the last 3 questions ask for number of times per week)

On average, how many hours per week do you work in an indoor location that is not your home?
On average, how many hours per week do you attend school in person in an indoor classroom setting?
On average, how many hours per week are you in a situation that requires regular close contact (within 6 feet for a total of 15 minutes or more) with people who do not live with you? Please do not include transportation here; it will be asked in the next set of questions.
On average, how many times per week do you travel by bus or train in which the trip takes 15 minutes or longer?
On average, how many times per week do you carpool with people who do not live with you?
On average, how many times per week do you play sports or participate in other extracurricular activities (e.g., volunteer, social, or religious activities) indoors with other people that do not live with you?
Do you have children or adults living with you who are attending in-person daycare, school, college, or technical/trade school? Please do not include those who are living away from home for school.
YesNoDon't know / Prefer not to answer
Are there other people living with you that work in person at an indoor location that is not your home? Yes No Don't know / prefer not to answer

Section 4. Viral Illness History

This section relates to symptoms of illness that might have been caused by viruses, as well as medical care or medical testing you may have received for those illnesses. We are interested in illnesses you experienced in the time period from (date) to (date) that included fever, chills, respiratory symptoms (such as nasal congestion, runny nose, cough, shortness of breath or sore throat), or gastrointestinal symptoms (such as nausea, vomiting, diarrhea or abdominal pain).

For this section, an Episode of illness is one distinct period of time when you were sick or experienced a set of symptoms. For example, Episode #1 (first episode) may represent an illness in January and Episode #2 (second episode) may represent a different illness in March. In addition, an Episode of illness would start when you first started to feel sick and would end when you felt back to normal, even if the specific symptoms changed during that time (for example, an illness might start with a sore throat and end with a cough).

example, an illness might start with a sore throat and end with a cough).
In the time period from (date) to (date), have you had any episodes of illness?
YesNoDon't know
For the first episode of illness you had in the time period from (date) to (date), what was the approximate date when the first symptom began:

For the first episode of illness you had in the time period from (date) to (date), did you have				
any of the following symptoms?				
	Yes	No		
Fever (100 degrees or higher measured with a thermometer)	0	0		
Felt feverish (even if you did not take your temperature with a thermometer)	0	0

Section 5. Questions specific to COVID-19

This section relates to COVID-19 or a COVID-19-like illness. The items listed below could have happened more than once. For each question you answer "Yes", please indicate, to the best of your recollection, the number of times and the approximate dates, starting with the earliest, that the item occurred in the time period from (date) to (date). Enter the dates using 2 digits for the month and 4 digits for the year. If you are entering multiple dates for an item, please separate each by a comma. (Example: 01/2020, 02/2020)

For questions below that ask about COVID-19 testing, please note:

There are different types of COVID-19 tests available. Some test for current infection and some test for past infection.

A viral test tells you if you have a current infection. Two types of viral tests can be used: nucleic acid amplification tests (often called PCR tests) and antigen tests. The viral test involves collecting a specimen with a swab from the nose, nasopharynx, mouth, or throat; or collecting saliva.

An antibody test (also known as a serology test) is a blood test that might tell you if you had a past infection. Antibody tests are not used to diagnose a current infection.

Were you in close contact (defined as within 6 feet for a total of 15 minutes or more) with a person who you know

had active COVID-19 that was confirmed with a positive COVID-19 viral test?
○ Yes ○ No
If you answered yes, how many times?
Please list the approximate dates in month and year (mm/yyyy).
Were you in close contact (defined as within 6 feet for a total of 15 minutes or more) with a person who you suspect had active COVID-19, but who (to your knowledge) did not have COVID-19 confirmed with a positive COVID-19 viral test?
○ Yes ○ No
If you answered yes, how many times?
Please list the approximate dates in month and year (mm/yyyy).
