Appendix A2:

Data collected for the 21st Century Cures Act, interoperability.

Data collected for 21st Century Cures Act, interoperability.

- Increase Innovation and Competition by giving patients and their health care providers safe and secure access to health information and to new tools, allowing for more choice in care and treatment.
- Reduce Burden and Advance Interoperability through the use of United States Core Data for Interoperability (USCDI) standard, new API requirements, and EHI export capabilities for the purposes of switching health IT or to provide patients their electronic health information.
- Promote Patient Access through a provision requiring that patients can electronically access all of their electronic health information (structured and/or unstructured) at no cost

Endpoint (optional)

* Indicates Required fields.

Endpoints provide a simple, secure, scalable, and standards-based way for participants to send authenticated, encrypted health information directly to known, trusted recipients over the Internet. Endpoint Information will be made available on the [NPI Registry](#), [API](#), and [Data Dissemination Files](#) for users to receive and consume.
