1	Provider HSD Table	Addition of the column "Letter of Intent Y/N" to the Provider HSD Table Template, Column O

Current Location

New- Column O Provider HSD Table Template

Reason

CMS-4192-F includes procedural changes to network reviews based on an MAO's status (applicant versus triennial), initial applicant and service area expansion applicants may use a letter of intent for purposes of network adequacy during the application process. A new column is included on the provider HSD table for both applicant and triennial network submissions, however the completion of this column is optional and will not prohibit the organization from uploading in the Network Management Module if left blank.
