

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. In this round, last week's additional questions are removed; non-substantive additions include questions that examine COVID-19 diagnosis experience and perceived threat of COVID-19 to various aspects of life (e.g., personal physical and economic health). This request does not impact the total burden hours proposed for the CET in the initial submission.
