Supporting Statement A

Water Request

OMB Control Number 1076-0141

Terms of Clearance: None.

General Instructions

A completed Supporting Statement must accompany each request for approval of a collection of information. The Supporting Statement must be prepared in the format described below, and must contain the information specified below. If an item is not applicable, provide a brief explanation. When the question "Does this ICR contain surveys, censuses, or employ statistical methods?" is checked "Yes," then a Supporting Statement B must be completed. OMB reserves the right to require the submission of additional information with respect to any request for approval.

Specific Instructions

Justification

1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection.

The Bureau of Indian Affairs (BIA) owns, operates, and maintains irrigation projects that provide a service to the end user, pursuant to 25 USC 381 and implementing regulations at 25 CFR 171. The Debt Collection Improvement Act of 1996 (DCIA), 31 USC 3701-3733, requires that certain sensitive information be collected from individuals and businesses doing business with the government and includes the Taxpayer Identification Number and/or Employer Identification Number for possible future use to recover delinquent debt.

Equally important to the sensitive customer data gathering required by law in order to establish an account, additional information collections comprise this submittal package to provide recurring and one-time services requested by the customers. These include requests for irrigation service, granting annual assessment waivers, approving incentive agreements to bring idle lands back into production, and designating lands as assessable or non-assessable if located within an irrigation project. Personally Identifiable Information (PII) is minimized when additional information collections are broken out into separate, targeted forms, thus reducing the public burden.

2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information

received from the current collection. Be specific. If this collection is a form or a questionnaire, every question needs to be justified.

There are several information collections associated with irrigation that are being presented as discrete forms.

Revision of a currently approved collection

A "carriage agreement" is legally binding contract to convey third-party water through our irrigation facilities; or water through third-party facilities, see 25 CFR 171.100. The proposed <u>Agreement for the Carriage of Water</u> form would allow BIA to determine whether BIA irrigation facility can support the third-party carriage or whether it is in the best interest of the BIA facility to convey our water through third-party facilities, see 25 CFR 171.605.

Extension of a currently approved collection

The <u>Request for Irrigation Services</u> form solicits requester name; date and time of request; service location; date and time of service to start and end; rate of flow, if available; number acres to irrigate; and additional information, per 25 CFR 171.200. The information gathered in this form allows BIA to identify areas for irrigation service and to arrange work schedules.

The information collection form entitled Request for Customer Information is designed for a customer's account setup and is primarily used one-time for the initial account establishment and when information changes. This form contains a request for sensitive PII with a statutory anchor. The request for customer information form requests the name, address, and social security number for individuals, and employee identification number for businesses, allowing BIA to bill the appropriate persons where BIA assesses fees and collects monies to administer, operate, maintain, and rehabilitate irrigation project facilities, per 25 CFR 171.105. Previously the irrigation projects utilized a W-9 form with a cover sheet or a non-approved home-written form, and both are being deprecated.

The <u>Annual Assessment Waiver Application</u> form solicits requester name, legal description of assessable acres, and detailed description of infrastructure deficiencies. The annual assessment waiver application allows BIA to waive operation and maintenance (O&M) fees for one year where BIA determines it cannot deliver adequate irrigation water due to irrigation infrastructure deficiencies *see* 25 CFR 171.700.

The <u>Incentive Agreement Application</u> form allows the BIA to waive the O&M assessment for one to three years when a landowner or lessee agrees to improve idle lands and BIA determines that it is in the best interest of BIA's irrigation facility, *see* 25 CFR 171.610-615.

The <u>Land Classification/Designation Application</u> form is for designation of lands within an irrigation project as presently assessable (PA), temporarily non-assessable (TNA), and permanently non-assessable (PNA), *see* 25 U.S.C. 381-390. BIA uses this information for billing and collecting O&M and construction related costs for PA designated lands.

Customers also provide the information required for the BIA irrigation staff to make an informed decision in certain instances. The following table lists these instances and information collected for each.

25 CFR 171.	Information Co	BIA Use of Information Collected		
200/ 600	Request for irrigation service	The customer must supply several pieces of information when requesting water.	The Request for Irrigation Service form captures water transactions, whereas the Request for Customer Information captures one-time, account setup information that is categorized as Personally Identifiable Information (PII) per 25 CFR 171.200.	
105/505	Land Classification / Designation Application	Members of the public typically work with a Bureau Official or Water User Association Representative to complete the Land Classification / Designation Application form. When completed by a customer, there are several pieces of information required. Source documents such as soil surveys, rights-of-way documents, maps and field notes must be included. Consent of the landowner is required for proposed PNA re-designation, and the form may be utilized when the land parcel is non-fractionated. If a customer owns or leases land within an irrigation project where BIA assesses fees and collects funds to administer, operate, maintain, and rehabilitate project facilities; BIA calculates the operation and	The Land Classification/Designatio n Application form is utilized to change a land designation which affects eligibility for assessment of O&M fees and irrigation service. Lands may be designated Presently Assessable, Temporarily Non- Assessable, and Permanently Non- Assessable. This collection of information was not accounted for in the last renewal, and was therefore in existence without OMB approval. We are adding it to the collection now.	

225	Subdividing a farm unit	maintenance (O&M) fees by multiplying the total assessable acres of the customer's land within the service area of the irrigation facility by the annual O&M rate BIA establishes. Recorded plat or map of the subdivision showing where the water will be delivered to the irrigable acres. Meet with irrigation project staff to see how the water delivery can be accomplished.	The Request for Irrigation Service form identifies where the water is to be delivered and how to accomplish delivery.
305	Requesting leaching service	Submit a written plan that documents how soil salinity limits the crop production and how leaching service will correct the problem.	The Request for Irrigation Service form can identify whether leaching is appropriate.
310	Requesting water for domestic or stock purposes	Document that this service will not interfere with the normal operations or maintenance of the irrigation facility, will not adversely affect the water supply, and will not cause additional costs to the BIA that the BIA has not approved.	The Request for Irrigation Service from assists the BIA in determining whether approving the request will allow continued operation and maintenance of the facility and water supply without additional cost.
405	Building non- government structures in BIA rights-of- ways	Depending on the structure and how it affects the BIA right-of-way, the requester may need to provide plans of the structure. The requester would probably need to meet with irrigation staff. An agreement would be drafted relieving the BIA from any liability or responsibility for the structure, future costs and other issues.	Determine whether BIA is protected from cost and potential liability and whether the irrigation project will be disrupted.
410	Installing a fence on BIA property or rights-of-ways	Depending on the fence and how it affects the BIA right-of-way, the requester may need to provide plans of the alignment of the fence. An	Determine whether BIA is protected from cost and potential liability and whether the irrigation project will be disrupted.

		agreement would be drafted relieving the BIA from any liability or responsibility for the fence, future costs and other issues.	
530/ 540	Requesting Information for Billing Purposes	The customer must provide BIA certain information to properly bill, collect, deposit, and account for funds.	The Request for Customer Information form provides the customer name, address, tax identification number/ social security number as per the Debt Collection Improvement Act of 1996. This collection of information was not accounted for in the last renewal, and was therefore in existence without OMB approval. We are adding it to the collection now.
550	Requesting Payment Plans on bills	The water user would need to certify that they are unable to pay the bill on time and provide the necessary documentation proving that they cannot pay on time.	Determine whether a basis exists for entering into a payment plan.
605	Establishing a carriage agreement (carrying thirdparty water through our facilities)	The respondent may need to provide information about the third-party water source and expected use to allow us to determine whether our facilities have adequate capacity.	Determine whether BIA irrigation facility can support the third-party carriage or whether it is in the best interest of the BIA facility to convey our water through third-party facilities.
610/ 615	Negotiating an irrigation incentive agreement with the BIA	Written request with detailed plan to improve idle lands including a description of specific improvements, estimated cost of the improvements, time schedule, proposed schedule for delivery, if necessary, and justification for use of irrigation water during the improvement period. This	The Incentive Agreement application_enables the BIA to determine whether to enter into an irrigation incentive agreement and is in the best interest of the facility.

		also includes reviewing the terms and conditions of the Incentive Agreement.	
710/ 715	Requesting annual O&M assessment waiver	Written request for O&M assessment waiver.	The Annual Assessment Waiver application enables the BIA to determine whether appropriate circumstances exist to allow an assessment waiver.

3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also describe any consideration of using information technology to reduce burden and specifically how this collection meets GPEA requirements.

This collection of information involves the use of information technology, specifically electronic submission of <u>Request for Irrigation Service</u> form. Emailed and telephoned in <u>Request for Irrigation Services</u> are allowed as long as the information gathered and retained as required by law is met. This enables our water users to submit requests for irrigation service using readily available electronic mechanisms, which saves time, reduces errors, and improves documentation. All of the forms will be available online at https://www.bia.gov/policy-forms/online-forms, under the row labeled "1076-0141" within the PRA section.

4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item 2 above.

The information gathered is tied specifically to providing the irrigation services that the public seeks from BIA-owned and operated irrigation projects. No other sources can provide this information, which is needed to provide irrigation services.

5. If the collection of information impacts small businesses or other small entities, describe any methods used to minimize burden.

BIA has ensured that it requires only that information that is essential to providing the requested irrigation serviced. Customers may include farms, homes, or small businesses. The burden on such entities is minimal and is equivalent to what customers provide other irrigation service providers.

6. Describe the consequence to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.

If the collection of information is not conducted the BIA will lack the information required by the DCIA for billing and debt collection. Further, when water delivery is requested, the individual or organization would not be eligible for service due to the lack of required minimum information to service the account in accordance with 25 CFR 171.540. This may ultimately result in damage to crops and income or may render potentially productive land idle, which undermines the very purpose of the program.

- 7. Explain any special circumstances that would cause an information collection to be conducted in a manner:
 - requiring respondents to report information to the agency more often than quarterly;
 - * requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;
 - requiring respondents to submit more than an original and two copies of any document;
 - * requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records, for more than three years;
 - * in connection with a statistical survey that is not designed to produce valid and reliable results that can be generalized to the universe of study;
 - * requiring the use of a statistical data classification that has not been reviewed and approved by OMB;
 - * that includes a pledge of confidentiality that is not supported by authority established in statute or regulation, that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or
 - * requiring respondents to submit proprietary trade secrets, or other confidential information, unless the agency can demonstrate that it has instituted procedures to protect the information's confidentiality to the extent permitted by law.

There are no special circumstances that will apply to this collection. The only confidential information respondents must submit is a Taxpayer ID number, as required by the Debt Collection Improvement Act. BIA maintains the records containing this information in accordance with its Privacy Act system of record notice BIA-34, *National Irrigation Information Management System*, published July 15, 2008 (73 FR 40601); modification published February 4, 2013 (78 FR 7804); modification published September 7, 2021 (86 FR 50156).

8. If applicable, provide a copy and identify the date and page number of publication in the Federal Register of the agency's notice, required by 5 CFR 1320.8(d), soliciting comments on the information collection prior to submission to OMB. Summarize public comments received in response to that notice and in response to the PRA statement associated with the collection over the past three years, and describe actions taken by the agency in response to these comments. Specifically address comments received on cost and hour burden.

A notice providing a 60-day comment period on this information collection was published in the

Federal Register on September 10, 2021 (86 FR 50737). No public comments were received in response to this notice.

Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and recordkeeping, disclosure, or reporting format (if any), and on the data elements to be recorded, disclosed, or reported.

Consultation with representatives of those from whom information is to be obtained or those who must compile records should occur at least once every three years — even if the collection of information activity is the same as in prior periods. There may be circumstances that may preclude consultation in a specific situation. These circumstances should be explained.

BIA queried the following individuals, as they work closely with numerous water users, to obtain their views on the availability of forms, frequency of collection, clarity of instructions, and relevance of data elements to be recorded as follows:

- Accounting Technician, Fort Washakie, WY
- Accounting Technician, Wapato, WA
- Irrigation Project Manager, Parker, AZ

All three respondents work closely with water users, and they reached out to their respective water users to obtain their views on this information collection. Overall, the water users felt that the forms are readily available, straightforward, and instructions are clearly spelled out. Even though customers in Parker, AZ primarily have English as a second language, the forms are straightforward and easy to understand. The time estimates seem to be appropriate in estimating burden.

9. Explain any decision to provide any payment or gift to respondents, other than remuneration of contractors or grantees.

Respondents will not receive any payment, gift, or other remuneration for providing the information collection requirements.

10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.

BIA maintains files containing customer's personally identifiable information (PII) in accordance with the Privacy Act System of Record Notice BIA-34, *National Irrigation Information Management System*, modification published February 4, 2013 (78 FR 7804); modification published September 7, 2021 (86 FR 50156). Each form contains a tailored Privacy Act Statement (PAS) which describe the authorities for requesting the specified information from the public. Each tailored PAS provides notification to individuals of how the PII is used to determine eligibility for services. Only the Request for Customer Information form requests the taxpayer identification number (TIN). This intentional business process mitigates risk for breach,

misuse, fraud, and abuse of customer PII. None of the remaining forms require or request the customer's TIN.

11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private. This justification should include the reasons why the agency considers the questions necessary, the specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.

We do not request any information of a private, sensitive nature per the question.

- 12. Provide estimates of the hour burden of the collection of information. The statement should:
 - * Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. Unless directed to do so, agencies should not conduct special surveys to obtain information on which to base hour burden estimates. Consultation with a sample (fewer than 10) of potential respondents is desirable. If the hour burden on respondents is expected to vary widely because of differences in activity, size, or complexity, show the range of estimated hour burden, and explain the reasons for the variance. Generally, estimates should not include burden hours for customary and usual business practices.
 - * If this request for approval covers more than one form, provide separate hour burden estimates for each form and aggregate the hour burdens.
 - * Provide estimates of annualized cost to respondents for the hour burdens for collections of information, identifying and using appropriate wage rate categories. The cost of contracting out or paying outside parties for information collection activities should not be included here. Instead, this cost should be included under "Annual Cost to Federal Government."

We estimate that the total annual hourly burden is 17,981 or cost equivalent to \$773,085.

The users mainly request water to be turned on or turned off. Users are not required to maintain records but may do so for business purposes. The information they submit is for the purpose of obtaining or retaining a benefit, namely irrigation water.

Burdens for Individuals

To obtain the hourly rate for Tribal government employees, we the total compensation for civilian workers, from Bureau of Labor Statistics Release, USDL-22-1176, *March 2022*, *Table 2*, *civilian workers*, \$40.90, *see* http://www.bls.gov/news.release/pdf/ecec.pdf.

Burdens for Business

To obtain the hourly rate for Tribal government employees, we the total compensation for

civilian workers, from Bureau of Labor Statistics Release, USDL-22-1176, *March 2022, Table 2, Management, professional, and related,* \$65.15, see http://www.bls.gov/news.release/pdf/ecec.pdf.

Public Burden						
Service	Number of Respondents	Annual No. of Responses	Hour Burden per Respons e	Total Annual Hour Burden	Annual Cost Burden	
Individual rate \$40.90						
Requesting irrigation service (Individual)	6,953	27,812	0.5	13,906	\$568,755	
Land Classification / Designation (Individual)	74	74	1	74	\$3,027	
Subdividing a farm unit (Individual)	25	25	4	100	\$4,090	
Requesting leaching service (Individual)	510	510	1	510	\$20,859	
Requesting water for domestic or stock purposes (Individual)	3,221	3,221	0.3	966	\$39,509	
Building non-government structures in BIA rights-of- ways (Individual)	57	57	3	171	\$6,994	
Installing a fence on BIA property or rights-of-ways (Individual)	44	44	1.5	66	\$2,699	
Requesting Customer Information (Individual)	927	927	0.2	185	\$7,567	
Requesting Payment Plans on bills (Individual)	107	107	2	214	\$8,753	
Establishing a carriage agreement (carrying thirdparty water through our facilities) (Individual)	5	5	1	5	\$205	
Negotiating an irrigation incentive lease with the BIA (Individual)	18	18	6	108	\$4,417	
Requesting annual assessment waiver	123	123	1	123	\$5,031	

(Individual)					
Individual Subtotal	12,064	32,923		16,428	\$671,906
Business rate \$65.15					
Requesting irrigation service (Business)	548	2,192	0.5	1,096	\$71,404
Land Classification / Designation	18	18	1	18	\$1,173
Subdividing a farm unit (Business)	10	10	4	40	\$2,606
Requesting leaching service (Business)	90	90	1	90	\$5,864
Requesting water for domestic or stock purposes (Business)	570	570	0.3	171	\$11,141
Building non-government structures in BIA rights-of- ways (Business)	10	10	3	30	\$1,955
Installing a fence on BIA property or rights-of-ways (Business)	8	8	1.5	12	\$782
Requesting Customer Information (Business)	73	73	0.2	15	\$977
Requesting Payment Plans on bills (Business)	19	19	2	38	\$2,476
Establishing a carriage agreement (carrying third-party water through our facilities) (Business)	3	3	1	3	\$195
Negotiating an irrigation incentive lease with the BIA (Business)	3	3	6	18	\$1,173
Requesting annual assessment waiver (Business)	22	22	1	22	\$1,433
Business Subtotal	1,374	3,018		1,553	\$101,179
Totals	13,438	35,941		17,981	\$773,085

13. Provide an estimate of the total annual non-hour cost burden to respondents or recordkeepers resulting from the collection of information. (Do not include the cost of any hour burden already reflected in item 12.)

- * The cost estimate should be split into two components: (a) a total capital and start-up cost component (annualized over its expected useful life) and (b) a total operation and maintenance and purchase of services component. The estimates should take into account costs associated with generating, maintaining, and disclosing or providing the information (including filing fees paid for form processing). Include descriptions of methods used to estimate major cost factors including system and technology acquisition, expected useful life of capital equipment, the discount rate(s), and the time period over which costs will be incurred. Capital and start-up costs include, among other items, preparations for collecting information such as purchasing computers and software; monitoring, sampling, drilling and testing equipment; and record storage facilities.
- * If cost estimates are expected to vary widely, agencies should present ranges of cost burdens and explain the reasons for the variance. The cost of purchasing or contracting out information collection services should be a part of this cost burden estimate. In developing cost burden estimates, agencies may consult with a sample of respondents (fewer than 10), utilize the 60-day pre-OMB submission public comment process and use existing economic or regulatory impact analysis associated with the rulemaking containing the information collection, as appropriate.
- * Generally, estimates should not include purchases of equipment or services, or portions thereof, made: (1) prior to October 1, 1995, (2) to achieve regulatory compliance with requirements not associated with the information collection, (3) for reasons other than to provide information or keep records for the government, or (4) as part of customary and usual business or private practices.

There is no non-hour cost burden associated with this information collection.

14. Provide estimates of annualized cost to the Federal government. Also, provide a description of the method used to estimate cost, which should include quantification of hours, operational expenses (such as equipment, overhead, printing, and support staff), and any other expense that would not have been incurred without this collection of information.

The annual cost to the federal government is \$315,208. The cost to the Federal government assumes the collecting, recording, and filing of information is performed by a GS-4 assistant. It is estimated that the assistant will be a GS 4, Step 5, with a salary of \$17.53 per hour, see https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/salary-tables/pdf/2022/RUS h.pdf for 2022 salary table.

By law, the cost of providing this service by the federal government is recovered in the rates charged the consumers. All costs are already included in the seasonal assessments for irrigation water service – the time to turn water deliveries on and off is part of the daily operation and maintenance activities of the projects.

		Respons e		
Government rate \$17.53				
Requesting irrigation service (Individual)	27,812	.25	13,906	\$243,772
Land Classification / Designation (Individual)	74	.25	74	\$1,297
Subdividing a farm unit (Individual)	25	.25	100	\$1,753
Requesting leaching service (Individual)	510	.25	510	\$8,940
Requesting water for domestic or stock purposes (Individual)	3,221	.25	966	\$16,934
Building non-government structures in BIA rights-of- ways (Individual)	57	.25	171	\$2,998
Installing a fence on BIA property or rights-of-ways (Individual)	44	.25	66	\$1,157
Requesting Customer Information(Individual)	927	.25	185	\$3,243
Requesting Payment Plans on bills (Individual)	107	.25	214	\$3,751
Establishing a carriage agreement (carrying thirdparty water through our facilities) (Individual)	5	.25	5	\$88
Negotiating an irrigation incentive lease with the BIA (Individual)	18	.25	108	\$1,893
Requesting annual assessment waiver (Individual)	123	.25	123	\$2,156
Requesting irrigation service (Business)	2,192	.25	1,096	\$19,213
Land Classification / Designation	18	.25	18	\$316
Subdividing a farm unit (Business)	10	.25	40	\$701

Requesting annual assessment waiver (Business)	22	.25	22	\$243,772
Negotiating an irrigation incentive lease with the BIA (Business)	3	.25	18	\$316
Establishing a carriage agreement (carrying thirdparty water through our facilities) (Business)	3	.25	3	\$53
Requesting Payment Plans on bills (Business)	19	.25	38	\$666
Requesting Customer Information (Business)	73	.25	15	\$263
Installing a fence on BIA property or rights-of-ways (Business)	8	.25	12	\$210
Building non-government structures in BIA rights-of- ways (Business)	10	.25	30	\$526
Requesting water for domestic or stock purposes (Business)	570	.25	171	\$2,998
Requesting leaching service (Business)	90	.25	90	\$1,578

15. Explain the reasons for any program changes or adjustments in hour or cost burden.

Changes in burden estimates were due to salary increases from the Bureau of Labor and Statistics (BLS) and the Federal government (OPM), as well as the addition of one new form – "the carriage agreement" form.

A "carriage agreement" is legally binding contract to convey third-party water through our irrigation facilities; or water through third-party facilities, see 25 CFR 171.100. The proposed Agreement for the Carriage of Water form would allow BIA to determine whether BIA irrigation facility can support the third-party carriage or whether it is in the best interest of the BIA facility to convey our water through third-party facilities, see 25 CFR 171.605.

Public Burden								
Service	Number of Respondents	Annual No. of Responses	Hour Burden per Response	Total Annual Hour Burden	Annual Cost Burden			
Establishing a carriage agreement (Individual)	5	1	1	5	\$205			
Establishing a carriage agreement (Business)	3	1	1	3	\$195			
	Government Burden							
Service	Annual No. of Responses		Hour Burden per Response	Total Annual Hour Burden	Annual Cost Burden			
Establishing a carriage agreement (carrying third-party water through our facilities)	8		.25	8	\$53			

16. For collections of information whose results will be published, outline plans for tabulation and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the entire project, including beginning and ending dates of the collection of information, completion of report, publication dates, and other actions.

No results will be published.

17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.

We will display the OMB Control Number and expiration date on all forms.

18. Explain each exception to the topics of the certification statement identified in "Certification for Paperwork Reduction Act Submissions."

No exceptions are necessary to the certification statement.
