

Segment to provide safety oversight of these new functions with the intent of improving the safety and efficiency of rail operations. FRA is publishing this notice and inviting public comment on the railroad's field test request.

DATES: FRA will consider comments received by July 11, 2022. FRA may consider comments received after that date to the extent practicable and without delaying implementation of valuable or necessary modifications to a PTC system.

ADDRESSES:

Comments: Comments may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name and the applicable docket number. The relevant PTC docket number for this host railroad is Docket No. FRA-2010-0054. For convenience, all active PTC dockets are hyperlinked on FRA's website at <https://railroads.dot.gov/train-control/ptc/ptc-annual-and-quarterly-reports>. All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information.

FOR FURTHER INFORMATION CONTACT:

Gabe Neal, Staff Director, Signal, Train Control, and Crossings Division, telephone: 816-516-7168, email: Gabe.Neal@dot.gov.

SUPPLEMENTARY INFORMATION: On December 11, 2020, FRA certified ARRC's Interoperable Electronic Train Management System (I-ETMS) PTC system under Title 49 Code of Federal Regulations (CFR) Section 236.1015 and Title 49 United States Code (U.S.C.) 20157(h). Pursuant to 49 CFR 236.1035, a railroad must obtain FRA's approval before field testing an uncertified PTC system, or a product of an uncertified PTC system, or any regression testing of a certified PTC system on the general rail system. See 49 CFR 236.1035(a).

Interested parties are invited to comment on ARRC's field test request by submitting written comments or data. During FRA's review of this railroad's field test request, FRA will consider any comments or data submitted within the timeline specified in this notice and to the extent practicable, without delaying implementation of valuable or necessary modifications to a PTC system. Under 49 CFR 236.1035, FRA maintains the authority to approve, approve with conditions, or deny a railroad's field test request at FRA's sole discretion.

Privacy Act Notice

In accordance with 49 CFR 211.3, FRA solicits comments from the public to better inform its decisions. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at <https://www.transportation.gov/privacy>. See <https://www.regulations.gov/privacy-notice> for the privacy notice of www.regulations.gov. To facilitate comment tracking, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. If you wish to provide comments containing proprietary or confidential information, please contact FRA for alternate submission instructions.

Issued in Washington, DC.
Carolyn R. Hayward-Williams,
Director, Office of Railroad Systems and Technology.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA-2022-0044]

Agency Information Collection Activities; Notice and Request for Comment; Field Study of Heavy Vehicle Crash Avoidance Systems

ACTION: Notice and request for public comment on an extension of a currently approved information collection.

SUMMARY: The National Highway Traffic Safety Administration (NHTSA) invites public comments about our intention to request approval from the Office of Management and Budget (OMB) for an extension of a currently approved information collection. Before a federal agency may collect certain information from the public, it must receive approval from OMB. Under procedures established by the Paperwork Reduction Act of 1995, before seeking OMB approval, Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatements of previously approved collections. This document describes a collection of information for which NHTSA intends to seek OMB extension approval, titled "Heavy Vehicle Crash Avoidance Systems" and identified by OMB Control Number 2127-0741, which is

currently approved through August 31, 2022. This project has been delayed due to COVID-19 shutdowns and precautions. The extension is necessary to continue the current data collection to completion. This extension request updates the burden hours to reflect the numbers of respondents that are needed to complete the study, updates to time estimates for responses, and mean hourly rates. Additionally, this notice provides clarification on the burden hours and the costs to the public.

DATES: Comments must be submitted on or before July 11, 2022.

ADDRESSES: You may submit comments using any of the following methods:

- *Electronic submissions:* Go to <http://www.regulations.gov>. Follow the online instructions for submitting comments.
- *Fax:* (202) 493-2251.
- *Mail:* Docket Management, U.S. Department of Transportation, 1200 New Jersey Ave. SE, West Building, Room W12-140, Washington, DC 20590.
- *Hand Delivery:* 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12-140, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. Telephone (202) 366-9322.

Instructions: Each submission must include the Agency name and Docket number identified at the beginning of this document. Note that all comments received will be posted without change to <http://www.regulation.gov>, including any personal information provided. Please see the Privacy heading below.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477-78) or you may visit <http://www.dot.gov/privacy.html>.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>, or the street address listed above. Follow the online instructions for accessing the dockets via the internet.

FOR FURTHER INFORMATION CONTACT: Jenny Zhang, Office of Vehicle Safety Research, National Highway Traffic Safety Administration, U.S. Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590, Telephone: 202-366-3973; email address jenny.zhang@dot.gov. Please identify the relevant collection of

information by referring to its OMB Control Number.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995, before an agency submits a proposed collection of information to OMB for approval, it must first publish a document in the **Federal Register** providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. OMB has promulgated regulations describing what must be included in such a document. Under OMB's regulation (at 5 CFR 1320.8(d)), an agency must ask for public comment on the following: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) how to enhance the quality, utility, and clarity of the information to be collected; (d) how to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In compliance with these requirements, NHTSA asks for public comments on the extension of the following collection of information for which the agency is seeking approval from OMB.

Title: Field Study of Heavy Vehicle Crash Avoidance Systems.

Type of Request: Extension of a currently approved information collection.

OMB Control Number: 2127-0741.

Form Number: None.

Type of Review Requested: Regular.

Requested Expiration Date of Approval: Three years from date of approval.

Summary of the Collection of Information: The National Highway Traffic Safety Administration (NHTSA) is gathering information regarding drivers' naturalistic driving experiences and opinions about crash avoidance systems (CAS) consisting of Lane Departure Warning, Forward Collision Warning, Impact Alert, and Automatic Emergency Braking for heavy vehicles.

CAS technology has been advancing rapidly since the conclusion of the previous study, with products for heavy commercial vehicles becoming

commercially available. These systems present opportunities for improving driver awareness and behavior, improving drivers' responses to potential collisions, and mitigating or preventing collisions when drivers do not respond. The newest generation of CAS technology includes several new features, such as multiple sensors, improvements to radar algorithms, and new features such as full braking in response to static objects or pedestrians. However, it is unknown if this newest generation of products has been able to reduce the prevalence of false or nuisance alerts observed in the previous study, if there are any issues with new types of alerts that have been added since previous studies, or whether driver have negative perceptions of the technology due to these issues. As these technologies become more popular with fleets, it is important to understand their real-world performance and any unintended consequences that may arise from them.

Data collection began in August 2021 after COVID delays and a shortage of chips necessary for use in the data acquisition system necessary for the naturalistic driving portion of the study. As of December 31, 2021, one respondent has completed the study, three are in the field study portion, and one has completed the informed consent document and pre-field study surveys but still needs to go through the installation portion of stage one and stages two to three of the study. Information in this extension requests refers to the respondents and burden associated with completing the study.

Description of the Need for the Information and Proposed Use of the Information: The collection of information consists of: An informed consent for participation, a demographic questionnaire, an initial CAS technology questionnaire, and a post-study CAS technology questionnaire.

The information to be collected will be used as follows:

- *Informed Consent* is collected from respondents who agree to participate in the study; the informed consent has been approved by an Institutional Review Board.
- *Demographic questionnaire* is used to obtain demographic information so that potential analysis may account for participants from various groups (e.g., age, self-identified gender, driving experience, and experience with CAS technology).
- *Initial CAS technology questionnaire* is used to get information about drivers' beliefs and attitudes towards the CAS technology installed on the commercial vehicle they use for

their job prior to data collection. This questionnaire assesses perceived usability of the systems in terms of acceptance and satisfaction, as well as willingness to have this technology in their vehicle.

- *Final CAS technology questionnaire* is used to get information about drivers' beliefs and attitudes towards the CAS technology installed on the commercial vehicle they use for their job at the end of data collection. These questionnaires will also be used to assess perceived distraction potential of the systems in terms of acceptance and satisfaction, as well as willingness to have this technology in their vehicle. Each driver will complete a post-study questionnaire once, after the completion of his or her data collection. The post-study survey will gauge how drivers' attitudes and preferences may have changed over the course of participation.

- Each participating driver will have a data acquisition system (DAS) installed in their vehicle for approximately three months while they perform their normal work duties. This system will collect video of the driver and forward roadway, telemetry and vehicle network data related to driving, and activations of the vehicle's CAS.

Respondents: Respondents for this study are drawn from a convenience sample from trucking fleets across the United States. Drivers are recruited from fleets that have signed agreements with the research team and have trucks that are outfitted with CAS technologies. Recruitment will attempt to balance the number of vehicles using particular brands of CAS technology but will be subject to fleet availability and scheduling constraints. Requirements of drivers involved in the study do not extend beyond employment requirements for each fleet.

Estimated Number of Respondents: 170 remaining respondents for initial phases of the study; anticipating some drop-out, the end-goal number of remaining respondents is 149.

Estimated Number of Responses: 170 for the consent form (one per respondent); 170 for the Demographic Questionnaire (one per respondent); 170 for the Initial CAS Questionnaire (one per respondent); 149 for the Final CAS Questionnaire (one per respondent) that completes the study.

Estimated Total Annual Burden: 123.6 hours total.

Estimated Frequency: The Informed Consent Form, Demographic Questionnaire, and Initial CAS Technology Questionnaire are completed once at the start of participation and data collection. The

Final CAS Technology Questionnaire is completed once at the completion of participation, approximately three months later.

TABLE 1—BURDEN CALCULATIONS AND ESTIMATED OPPORTUNITY COST

Instrument	Number of respondents	Estimated time for completion	Total estimated burden hours †	Hourly wage	Estimated total opportunity cost
Stage One:					
Informed Consent Form	170	20	57 hours	\$23.42	\$1,334.94
Demographic Questionnaire	170	5	15 hours	23.42	351.30
Initial CAS Technology Questionnaire	170	25	71 hours	23.42	1,662.82
Stage Two:					
Naturalistic Driving Study	171	N/A	N/A	N/A	N/A
Stage Three:					
Final CAS Technology Questionnaire	149	25	63 hours	23.42	1,475.46
Total Burden Remaining			206 hours		4,824.52
Months Remaining			20		
Annual Burden Remaining			123.6 hours		2,894.71

The above table reflects the annual burden hours to be 123.6 to complete data collection. While the table reflects opportunity costs, this is not a burden incurred by the public for this information collection. The annual burden cost to respondents is zero.

The previous notice estimated total burden hours for this study to be 193.5 total. The total number of burden hours to complete data collection is now 206 based on updates to the time for the Informed Consent and the Demographic Questionnaire. Opportunity costs have been updated to reflect current average hourly wages; however, this is not a burden to respondents to the information collection.

Due to COVID-19 shutdowns and precautions, data collection efforts were suspended. NHTSA anticipates additional time beyond the August 31, 2022, expiration date of the currently approved collection to complete this effort. The federal government began this study at \$2,581,075 in contract expenses and has added expenses due to the time delays and resulting changes in technology. The total cost expected at this time is \$2,954,970 with an annualized cost to the federal government over the expected study time-to-completion of \$402,950.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for the Department's performance; (b) the accuracy of the estimated burden; (c) ways for the Department to enhance the quality, utility, and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will

summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended; 5 CFR part 1320; and 49 CFR 1.95.

Issued in Washington DC.

Cem Hatipoglu,

Associate Administrator for Vehicle Safety Research.

BILLING CODE 4910-59-P

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[Docket ID Number: DOT-OST-2010-0054]

Notice of Submission of Proposed Information Collection to OMB Agency Request for Reinstatement of Previously Approved Collections: Nondiscrimination on the Basis of Disability in Air Travel: Reporting Requirements for Disability-Related Complaints

AGENCY: Office of the Secretary (OST), Department of Transportation (Department or DOT).

ACTION: Notice and request for comments.

SUMMARY: In accordance with the *Paperwork Reduction Act of 1995* (44 U.S.C. Chapter 35, as amended), this notice announces the DOT's intention to reinstate an Office of Management and Budget (OMB) Control Number 2105-0551, "Reporting Requirements for Disability-Related Complaints." The information collection is related to a requirement in the Code of Federal Regulations (CFR) for carriers to report

annually to the Department the number of disability-related complaints they receive.

DATES: Interested persons are invited to submit comments regarding this proposal. Written comments should be submitted by July 11, 2022.

ADDRESSES: You may file comments identified by the docket number DOT-OST-2010-0054 by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov> and follow the online instructions for submitting comments. (You may access comments received for this notice at <http://www.regulations.gov> by searching docket DOT-OST-2010-0054.)

- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Ave. SE, West Building Ground Floor Room W12-140, Washington, DC 20590-0001;

- *Hand delivery:* West Building Ground Floor, Room W12-140, 1200 New Jersey Ave. SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202-366-9329.

Instructions: You must include the agency name and docket number DOT-OST-2010-0054 at the beginning of your comment. All comments received will be posted without change to <https://www.regulations.gov>, including any personal information provided.

Privacy Act: Anyone is able to search the electronic form of all comments received in any of DOT's dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register**
